## FOREWORD BY THE MEC FOR HEALTH

It is with a great sense of joy and pride that I present the 2022/23 Annual Report of the KwaZulu-Natal Department of Health. This past year has been an extraordinary journey. It has been filled with both achievements and challenges, as we continue to march forth in our quest to improve the health and well-being of every person in our province.

I am delighted to announce that we have reached a momentous milestone – our first unqualified audit in many years. This achievement demonstrates our commitment to transparency, accountability, and responsible management of public resources.

It also reaffirms our dedication to providing quality healthcare services that meet the needs of our diverse and vibrant community.

As we celebrate this milestone, we are nevertheless humbled by the knowledge that our work is far from over. There are still many audit improvements to be made, and we must embrace this opportunity to refine our practices and ensure more efficient use of public funds.

Our central goal as the KwaZulu-Natal Department of Health remains steadfast – **“Increased Life Expectancy.”**

To achieve this, we have focused on three key outcomes:

- a) Universal Health Coverage
- b) Improved Client Experience of Care
- c) Reduced Morbidity and Mortality

### NATIONAL HEALTH INSURANCE:

The 12<sup>th</sup> of June 2023 should go down as one of the important dates in South African public life. It is the day on which the NHI Bill was passed, marking an important milestone towards the ultimate implementation of National Health Insurance (NHI).

Through this Bill, our caring and visionary Government seeks to provide for universal access to health care services in the country, in accordance with the National Health Insurance White Paper and the Constitution of South Africa.

The Bill envisages the establishment of a National Health Insurance Fund and sets out its powers, functions, and governance structures. The Fund will purchase health care services for all users who are registered with it.

It aims to provide universal health coverage, ensuring equitable access to healthcare services for all citizens, regardless of their financial status.

By offering financial protection, NHI can reduce the burden of out-of-pocket expenses and catastrophic healthcare costs.

NHI emphasizes and promotes preventive care and primary healthcare and seeks to improve overall population health and reduce the burden of chronic diseases.

Centralized planning and management of NHI will lead to better co-ordination and resource allocation, ultimately enhancing the quality of care provided. By integrating various healthcare services, NHI will streamline the healthcare system and improve patient outcomes.

It will contribute to the development of a better-trained healthcare workforce and strengthen the health system. Through collective risk pooling, NHI ensures that everyone contributes to the

# 2022/23 ANNUAL REPORT

---

healthcare system and benefits when needed. Moreover, NHI has the potential to ease the strain on public hospitals by expanding access to primary healthcare services and preventive measures. Overall, NHI has the potential to radically transform South Africa's healthcare system and improve the health and well-being of its citizens. We will continue to strongly advocate for the implementation of NHI and will watch developments pertaining to it very closely.

## EMBRACING THE FOURTH INDUSTRIAL REVOLUTION:

We are cognisant of the realities and challenges faced by healthcare users and healthcare workers at the facility level. We are committed to being responsive to these challenges, by making decisions that are informed and driven by data, while promoting a culture of continuous improvement.

Another key highlight from the current financial year, which demonstrates our Government's seriousness about embracing the Fourth Industrial Revolution, was the going "live" of our "Bika Sikusize" mobile application (App).

This mobile app bears further testimony to our commitment to "Improved Client Experience of Care."

Loosely translated, *Bika Sikusize* means "Notify Us, So We Can Help You."

This mobile app serves as a one-stop platform for citizens to access accurate and up-to-date health information, including details about health facilities, services offered, operating hours, and relevant contact information.

This ensures that citizens have easy access to essential information and can make informed decisions about their healthcare.

It also ensures that if citizens are aggrieved or dissatisfied with any aspect of their healthcare experience, the app provides a formal channel for lodging complaints and grievances.

This ensures that their concerns are acknowledged and addressed promptly by the appropriate authorities.

It also has the ability to enable the public to report health-related issues, such as sanitation problems, disease outbreaks, or substandard healthcare services. This will then allow us as the Department to respond quickly and address these concerns in a timely manner.

## FIGHTING DISEASES: REDUCING MORBIDITY AND MORTALITY

Furthermore, we recognize that tackling health issues requires a united effort. Parents, community leaders, civil society, and the education department must come together to fight teenage pregnancy and reduce morbidity and mortality due to non-communicable diseases and sexually transmitted infections. By working as a collective force, we can create an environment that fosters good health and well-being from the grassroots level.

## IMPROVEMENTS OVER THE 2022/23 FINANCIAL YEAR:

We have noted a number of improvements in various critical areas over the past financial year, which we are very pleased about. These include:

- The initiation of a high number of clients on Tenofovir disoproxil, lamivudine and dolutegravir (TLD) transition, which has played an important part in achieving viral load suppression in adults.

## 2022/23 ANNUAL REPORT

---

- We have also noted a decrease in the HIV incidence and positivity rate among 15-24 year olds. This is mainly thanks to the implementation of HIV/AIDS prevention programmes such as Pre-Exposure Prophylaxis (PrEP), provision of condoms, and education through mass media. We have also benefitted from increased community mobilisation, which is aimed at behavioural modification and reducing HIV and TB infections, and encouraging positive sexual behaviour by individuals.
- We have also noted a reduction in the number of maternal deaths from COVID-19, with the implementation of the COVID-19 vaccination programme.
- We have also established the Onsite Midwife-led Birth Units (OMBUs) at Newcastle and Prince Mshiyeni Memorial Hospitals, which are conducting 100+ deliveries per month.
- Critically, we have also managed to reduce neonatal and under 1-year deaths as a result of:
  - a) Increased coverage of key interventions such as Kangaroo Mother Care (KMC) and therapeutic hypothermia; ventilation; continuous positive airways pressure (CPAP) support
  - b) Improved specialist support, a functional referral system, and improved capacity to provide respiratory support.
  - c) Provision of paediatric respiratory support in all hospitals.
- We managed to achieve a target of 160 Professional Nurses per 100 000 population. This came as a result of the absorption of 1 016 professional nurses, who were initially employed on contract during the COVID-19 pandemic.
- We reached our target of 33.7 Medical Officers per 100 000 population, as the Department had an increased allocation of Community Service Medical Practitioners (282) and Medical Interns (1 117).
- We are also happy that 95.9% of supplier invoices were paid within 30 days. This was as a result of training on "Accruals" and "Payables Not Recognised", which was conducted in August and September 2022 and the District Financial Roadshows conducted in March 2023.
- Through the implementation of the quality improvement plans, 93.4% (565/605) clinics obtained Ideal Clinic Status.
- We also welcome the fact that the Primary Health Care Utilisation rate gradually increased, thanks to the implementation of the full package of services post-pandemic. Our districts also continued conducting community screening activities and referring clients to clinics for investigations.
- We intensified our screening for mental disorders.
- The number of clients accessing rehabilitation services has also increased due to high demand from existing clients who are seen for review, and continuation of rehabilitation services, and newly referred clients.

As we move forward, we must be inspired by our successes, but also remain mindful of the road ahead.

We must continue to combat preventable diseases and improve health outcomes. We must continue to effectively address the quadruple burden of disease, which is made up of HIV, AIDS and TB; maternal, newborn and child health; incidents of personal injury and trauma; and non-communicable diseases (such as cancer, diabetes, obesity, hypertension and stroke).

## 2022/23 ANNUAL REPORT

---

We must continue addressing these diseases while empowering communities with knowledge and resources to make healthier choices, including internalizing and practicing a culture of disease prevention, regular screening and testing, and seeking help early.

We believe no woman should die from diseases such as breast cancer and cervical cancer, because these diseases are curable through early detection and early intervention.

Similarly, no man should die of prostate cancer because it is fairly easy to treat – **if it's diagnosed** early. So, in this regard, the importance of public health education, awareness, regular testing and screening cannot be over-emphasized.

I also want to commend the Head of Department Dr Sandile Tshabalala and dedicated management teams at different levels for the leadership they provided to steer this ship safely, over the past financial year.

I extend my heartfelt gratitude to every healthcare worker, support staff, and stakeholder who has worked tirelessly and contributed to our progress.

Your dedication and resilience have been the foundation of our achievements.

Together, let us march forward with renewed vigor and a shared vision of a healthier and brighter future for KwaZulu-Natal.

I am confident that, with the support of the kind and warm-hearted people of KwaZulu-Natal, we can overcome any obstacle and achieve our central goal of Increased Life Expectancy.

ENDS

## REPORT OF THE ACCOUNTING OFFICER

### DEPARTMENTAL OVERVIEW

The 2022/23 financial year marks the third year of 5-year strategic planning cycle. The 2020-2025 Strategic Plan is aligned with the National Development Plan, the Medium-Term Strategic Framework, the Provincial Growth and Development Plan, as well as legislative and policy mandates and the burden of disease that determines needs and demands for health care in the province.

The Department of Health remained committed to develop and implement a sustainable, coordinated, integrated and comprehensive health care system through the primary health care approach, which is based on accessibility, equity, community participation, use of appropriate technology and inter-sectorial collaboration.

In 2022/23, the policy priorities set out in the Annual Performance Plan (APP) were in line with the three over-arching outcomes that seek to achieve the IMPACT of “Increased Life Expectancy”. The outcomes are “Universal Health Coverage”, “Improved Client Experience of Care” and “Reduced Morbidity and Mortality”.

Details of the actual performance of the Department during 2022/23 are included in the Annual Report, highlighting the achievements and challenges. During this financial year, the Department:

- Managed 24 714 031 patients at Primary Health Care (PHC)
- Screened 13 964 514 people for mental disorders
- The mother to child HIV transmission rate at 0.35%<sup>1</sup>.
- The number of severe acute malnutrition deaths under 5 years increased from 185 to 206, pneumonia deaths under 5 years increased from 185 to 220 and the Diarrhoea deaths under 5 years increased from 138 to 184
- Diarrhoea incidence increased from 6.5/1 000 to 7.1/1 000; pneumonia incidence increased from 17.5/1 000 to 19.7/1000; and severe acute malnutrition incidence increased from 1.6/1000 to 1.9/1 000
- The number of children under 1 year fully immunised decreased from 242 394 to 234 249
- A total of 4 027 596 people were tested for HIV and a total of 1 561 281 patients remained on ART at the end of March 2023
- The maternal mortality in facility rate decreased from 100.6 per 100 000 live births to 81.5 per 100 000 live births

## Enabling Systems

### Human Resources

The Department had 68 637 filled posts with a vacancy rate of 11, 70 % as at 31st March 2023. It has been very difficult to reduce the vacancy rate in the Department due to an inadequate funding allocation received. On a year-on-year basis, the average human resource strength decreased by a further 1 564 employees from 70 201 in financial year 2021/22 to 68 637 in financial year 2022/2023 and this is consistent with the budget cuts being experienced.

It is unclear whether the trajectory will continue in the medium term, given the prescribed cumbersome appointment processes to fill vacancies, particularly non-exempt posts. The Medium-Term Expenditure Framework allocation demonstrated the adverse impact of the continued reduction of the Compensation of Employees annual baselines, which will more likely persist over the medium-term, placing evermore pressure on the Department to fund its Human Resource capacity requirements within its own allocation.

The Department has a Nursing College being the KwaZulu-Natal College of Nursing, which offers nurse training. The total number of students currently on training is 612, of which 87 are enrolled in Legacy nursing programmes accredited by the South African Nursing Council. It must be noted that 525 students are registered for the Diploma in Nursing, which forms part of the New Nursing Qualifications being offered in the Country and requires accreditation with the Council for Higher Education (CHE) and the South African Nursing Council (SANC). The accreditation processes with the above-mentioned accreditation bodies are currently underway for the remaining programmes to be offered by the Department's College. The Advanced Diploma in Midwifery (undergraduate) has been accredited by CHE with conditions including a CHE visit to the College, which will pave the way for implementation of this programme. Four Post Graduate Diploma programmes namely Mental Health, Perioperative, Nephrology and Primary Care have been accredited by SANC. Post Graduate Diploma in Mental Health Nursing awaits CHE accreditation.

Eight more new programmes have been submitted for accreditation and are being evaluated by accreditation bodies include: Two undergraduate programmes - Bachelor of Nursing and Higher Certificate in Nursing and Six Post Graduate Diploma programmes - Critical Care Nursing (Adult), Midwifery, Child Nursing, Emergency Care Nursing, Orthopaedic Nursing, and Ophthalmic Nursing. The Post Graduate Diploma in Oncology and Palliative Care Nursing is currently being processed for submission to accreditation bodies. Conceptualisation and curriculum development groundwork for the Post Graduate Diploma in Forensic Nursing has commenced. This brings the total number of new nurse training programmes currently

## 2022/23 ANNUAL REPORT

---

implemented and at different stages of development and accreditation to fifteen (four Undergraduate and eleven Post Graduate Diploma programmes). The projected enrolment numbers of both Undergraduate and Post Graduate students will increase in the next two years, in line with accreditation results and budget allocations.

To address the skills shortage in the medical Professionals, the Department has placed 199 bursary holders who trained in Cuba and 56 medical bursary holders who trained in South Africa. There are 46 bursary holders doing their 18 months integration programme in local universities. It must be noted that 100 bursary holders who trained in Cuba are doing their community service, 10 students are currently still in Cuba continuing with their studies at various levels of medical training and 8 are expected to return from Cuba in July 2023 to do their 18 months local studies. Within the same medical profession, 33 bursary holders who studied in the RSA programme are doing their community services, 54 bursary holders are currently doing their internship, and 69 bursary holders are currently at universities completing their studies. The total of 220 bursary holders inclusive of medical, pharmacy and allied professionals are currently in training at various universities.

The Department provided bursaries to in-service employees to address critical skills shortage **and improve employees' qualifications** which is necessary to improve performance or **compliance with professional bodies' requirements**, **462 employees have been awarded new bursaries** from this training initiative.

The Department implemented various training and development initiatives, which were reported in the Annual Training Report submitted to the Public Service Sector Education and Training Authority (PSETA) and Health and Welfare Sector Education and Training Authority (HWSETA).

The total number of employees trained was 21 048 out of 23 259 planned beneficiaries. This variance was due to most training being implemented out of the reporting cycle as there were delays in procuring service providers and the accreditation of our colleges.

### Infrastructure

Project progress has been measured using the approved Annual Implementation Plan (AIP) and the end of year AIP Infrastructure Reporting Module (IRM) 2022/2023 based report extracted from the Project Management Information System (PMIS). The AIP originally had 1 108 projects but at the end of the financial year had 1 225 projects. The increase in projects is mainly due to the early loading of projects in preparation for 2023/24 as well as to the re-evaluation of project progress, expenditure trends and re-prioritising of maintenance type projects such as

# 2022/23 ANNUAL REPORT

---

roof replacements, generators, and so on. A number of packages were also unbundled such as some fencing and Emergency Medical Services (EMS) Wash bays mainly because the Implementing Agent, KwaZulu-Natal (KZN) Department of Public Works, does not manage packages.

The following evaluation is noted (excluding maintenance, Health Technology (HT), leases and non-infrastructure):

- 24 Projects in planning had limited movement and no expenditure
- 1 Projects in design had limited movement and no expenditure
- 8 Projects remain in tender stage
- 109 projects remain in construction stage
- 2 projects remain in retention stage
- 24 Projects were closed.

## Critical Engineering Assets maintained

The 2022/2023 Infrastructure Development Annual Implementation Plan on the side of Engineering and Technical Services was developed to facilitate an increased investment to projects that address statutory compliance, safety and restoration of services that improve the reliability of state facilities. The emphasis was on Primary Health Care Facilities driven by the need to accelerate ideal clinic realization and maintenance. This is evidenced by the amount of budget allocations that address this critical area of infrastructure asset management.

### 1. Generators Installation Programme

The programme continues in 2022/23 until all healthcare facilities are equipped with standby electricity generating units.

### 2. Asbestos Eradication Programme

A total of 76 institutions were identified for this purpose with a total budget estimate of R225.5million. A total of 32 facilities have been successfully completed to a value of R18.7 million, 22 are on Planning stage with an estimated value of R152million, 16 are on various stages of Construction to a value of R31million. Only 6 are on various stages of tender stage to a value of R24million.

2. In addition, Mosvold Hospital asbestos eradication has a budget of R30million. The construction commencement and expenditure will take place in 2024/2025 R15million and 2025/2026 R 15 million. Ceza Hospital asbestos eradication has a budget amount of

## 2022/23 ANNUAL REPORT

---

R 15 million. The construction commencement and expenditure will take place in 2024/2025 for R 7.5 million and 2025/2026 for R 7.5 million

### 3. Perimeter Fencing Replacement Programme

A total of 47 institutions with a total budget allocation to the value of R 28.9million was allocated for the programme across the province for 2022/23. A total of 25 completed facilities to the value of R 14.4 million. A total of 18 are on various stages of Construction to a value of R 12.5 million. Only 4 are on various stages of tender stage to a value of R 1.9 million

### 4. A 72 HR Standby Water Tank Installation Programme

Additional pressure mounted for the Department to accelerate installation of back up water supply following lessons learned during the prolonged drought conditions in the province in the past few years. A total of 139 Water tanks with an estimated value of R 62.8 million was placed on the plan for 2021/22 and 2022/23. A total of 66 Water tanks have been completed to the value of R 24.1 million. A total of 2 Water tanks are in planning stage to a value of R 2 million, 39 are on various stages of construction to a value of R 17.3 million, 32 are on various stages of tender stage to the value of R 19.5 million.

### 5. Lift Replacement Programme

Installation of 16 Lifts at Addington Hospital was awarded in May 2020 and all 16 lifts are completed to the value of R 23.4million spent in 2022/23. The project for the installation of 9 lifts in various facilities in EThekweni Districts was also awarded December 2020, all 9 lifts are completed to the value of R10.1million spent in 2022/23. The refurbishment of 4 lifts at RK Khan Hospital was awarded in August 2021 and has been completed to the value of R2.3million spent in 2021/2023. The installation of 8 lifts at King Edward Hospital was awarded in August 2022 to the value of R11.3 million and the installation is in progress. The installation of two lifts at Harry Gwala Hospital nurses home was awarded in August 2022 to the value of R2.6million and the installation is in progress.

### 6. Autoclaves Replacement Programme

A total of 8 steam autoclaves were installed and commissioned in 2021/22 at R2million, works completion has been taken. A further 33 were put on the 2022 User Asset Management Plan (U-AMP) for implementation over 3 years as from the 2023/24 financial year. The project brief has been approved for the 3 year plan. Tender document for year 1 (2023/24) will be concluded in Q2 of 2023/24. No concept and design Health

## 2022/23 ANNUAL REPORT

---

Infrastructure Approval Committee (HIAC) approval is required since there is a standard autoclave replacement specification in place.

### Revenue

The Department did not reach its revenue collection target for 2022/23, this was mainly due to the COVID-19 pandemic, high unemployment rate and the challenges the Road Accident Fund is experiencing. While progress has been made in rolling out patient revenue systems in hospitals, the IT infrastructure and connectivity still poses a challenge.

The process to revive the efficiency within the Supply Chain Management (SCM) component of the Department is ongoing and progress is beginning to be evident. The time that is taken to process bids has been significantly reduced. The decentralization of delegations to institutions is yielding the desired results in that service delivery lead times have been greatly reduced. The system is now more responsive to end-user requests. Head Office SCM, as a result, is now better able to respond and process the bids quicker than previously. A total of 106 bids was advertised during the financial year, which excludes numerous quotations under R1 million.

### Financial Management Improvements

In order to further increase the efficiencies in the system, the Department has embarked on a process of implementing the Logistical Information System (LOGIS) system, which will assist in automating some critical aspects of the SCM system and thus allow for better monitoring and management. It is envisaged that implementation of the system will take up to two years due to the stringent requirements by National Treasury.

## 2022/23 ANNUAL REPORT

### Financial Performance

TABLE 1: DEPARTMENTAL RECEIPTS

Departmental receipts	2022/2023			2021/2022		
	Estimate	Actual Amount Collected	(Over)/ Under Collection	Estimate	Actual Amount Collected	(Over)/ Under Collection

# 2022/23 ANNUAL REPORT

---

## Financial Performance

The Department generates its revenue mainly from patients' fees, which includes claims medical aid for service rendered, Road Accident Fund (RAF) for treatment of patients injured on public roads and other health services rendered by hospitals to patients and other departments. It also generates revenue from use of Department facilities and accommodation by the staff which includes boarding fees, non-residents and parking fees.

During the last three previous financial years, the Department has seen substantial under collection against the sale of goods and services, due to the COVID-19 Pandemic, unemployment, and RAF. This is or was mainly due to the challenges RAF has experienced on their IT portal, which hampered the uploading and finalisation of claims, hence revenue collection, was decreased during the financial year. The set revenue target was under collected by R68 890 million, the budget revenue collection for 2022/23 was R358 656 million and the actual revenue collected was R297 796 million.

## Tariff policy

The main source of revenue for the Department, over and above its voted amount, is patient fees, which are charged using Uniform Patient Fee Schedule as prescribed by the National Department of Health and is reviewed annually. Boarding fee are treated as part of housing allowance, which is negotiated at Bargaining Council.

## Free Services

Free services rendered by the Department are in line with the Uniform Patient Fee Schedule and it includes primary health care services at all the Clinics and Community Health Centre's, old age pensioners, children under six years and pregnant women who are not members of medical aid.

# 2022/23 ANNUAL REPORT

---

## UNAUTHORISED EXPENDITURE

The Department did not incur any unauthorised expenditure for the financial year. However the balance of R93 825 million is for the prior year's which is awaiting approval from the relevant Committees.

### Unauthorised Expenditure Approved

Unauthorised Expenditure Act that approves and authorises the Unauthorised Expenditure incurred in the 2018 / 2019. The KwaZulu-Natal Unauthorised Expenditure Authorisation Act 2022 (Act 1 of 2022) dated 31st March 2022 was gazette to the value of R14 248 million. The funds were transferred on the 31<sup>st</sup> May 2022 to the Department's bank account and the required transactions were processed on 2<sup>nd</sup> June 2022.

## PUBLIC PRIVATE PARTNERSHIP

The Department has in place a Public Private Partnership (PPP) agreement with Cowslip Investments (Pty) Ltd and Impilo Consortium for the delivery of non-clinical services to the Inkosi Albert Luthuli Central Hospital. Details of the PPP and the transactions relating thereto are disclosed under notes of the financial statements. The PPP agreement was extended with expiry being July 2023.

## GIFTS AND DONATIONS

Donations to value of R 63 440 million were received and are reflected in the annexure to the Financial Statement and were utilised in accordance with the donor request. Aid assistance to the value of R8 525 million was received from Centres for Disease Control and Prevention (CDC) of the United States of America (USA).

## EVENTS AFTER REPORTING DATE

No event subsequent to balance sheet date occurred.

## EXEMPTIONS AND DEVIATIONS RECEIVED FROM THE NATIONAL TREASURY

The following exemptions have been obtained from the Provincial Treasury:

*Basic Accounting System (BAS)/Personnel and Salaries System (Persal) reconciliation*

The Provincial Treasury had approved a practice note on the compilation of the reconciliation. The Department was thereafter given approval to deviate from the practice note and utilize the original approach, which had been accepted by the Auditor-General.

## ACCOUNTING OFFICER STATEMENT OF RESPONSIBILITY AND CONFIRMATION OF ACCURACY OF THE ANNUAL REPORT

To the best of my knowledge and belief, I confirm the following:

All information and amounts disclosed throughout the Annual Report are consistent.

The Annual Report is complete, accurate and is free from any omissions.

The Annual Report has been prepared in accordance with the guidelines on the Annual Report as issued by National Treasury.

The Annual Financial Statements (Part F) have been prepared in accordance with the modified cash standard and the relevant frameworks and guidelines issued by the National Treasury.

The Accounting Officer is responsible for the preparation of the Annual Financial Statements and for the judgements made in this information.

The Accounting Officer is responsible for establishing and implementing a system of Internal Control that has been designed to provide reasonable assurance as to the integrity and reliability of the Performance Information, the Human Resources Information and the Annual Financial Statements.

The external auditors are engaged to express an independent opinion on the Annual Financial Statements.

In my opinion, the Annual Report fairly reflects the operations, the performance information, the human resources information and the financial affairs of the Department for the financial year ended 31 March 2023.

Yours faithfully,

Dr S C Tshabalala

Accounting Officer

KwaZulu-Natal Department of Health

## STRATEGIC OVERVIEW

### Vision

Optimal health for all persons in KwaZulu-Natal

### Mission

To develop and implement a sustainable, coordinated, integrated and comprehensive health system at all levels, based on the Primary Health Care approach through the District Health System, to ensure universal access to health care

### Core Values

- Trustworthiness, honesty and integrity
- Open communication, transparency and consultation
- Professionalism, accountability and commitment to excellence
- Loyalty and compassion
- Continuous learning, amenable to change and innovation
- Respect

### Legislative and Other Mandates

In terms of the Constitutional provisions, the Department is guided by the following sections and schedules, among others:

The Constitution of the Republic of South Africa, 1996, places obligations on the state to progressively realise socio-economic rights, including access to (*affordable and quality*) health care.

Schedule 4 of the Constitution reflects health services as a concurrent national and provincial legislative competence

Section 9 of the Constitution states that everyone has the right to equality, including access to health care services. This means that individuals should not be unfairly excluded in the provision of health care.

- People also have the right to access information if it is required for the exercise or protection of a right.
- This may arise in relation to accessing one's own medical records from a health facility for the purposes of lodging a complaint or for giving consent for medical treatment; and
- This right also enables people to exercise their autonomy in decisions related to their own health, an important part of the right to human dignity and bodily integrity in terms of sections 9 and 12 of the Constitutions respectively.

Section 27 of the Constitution states as follows: with regards to health care, food, water, and social security:

# 2022/23 ANNUAL REPORT

---

(1) Everyone has the right to have access to:

(a) Health care services, including reproductive health care.

(b) Sufficient food and water; and

(c) Social security, including, if they are unable to support themselves and their dependents, appropriate social assistance.

(2) The state must take reasonable legislative and other measures, within its available resources, to achieve the progressive realisation of each of these rights; and

(3) No one may be refused emergency medical treatment.

Section 28 of the Constitution provides that every child has the right to 'basic nutrition, shelter, basic health care services and social services.

National Health Act, 2003 (Act No. 61 of 2003)

Provides a framework for a structured health system within the Republic, taking into account the obligations imposed by the Constitution and other laws on the national, provincial and local governments with regard to health services. The objectives of the National Health Act

(NHA) are to:

- Unite the various elements of the national health system in a common goal to actively promote and improve the national health system in South Africa.
- Provide for a system of co-operative governance and management of health services, within national guidelines, norms and standards, in which each province, municipality and health district must deliver quality health care services.
- Establish a health system based on decentralised management, principles of equity, efficiency, sound governance, internationally recognized standards of research and a spirit of enquiry and advocacy which encourage participation.
- Promote a spirit of co-operation and shared responsibility among public and private health professionals and providers and other relevant sectors within the context of national, provincial and district health plans; and
- Create the foundation of the health care system, and understood alongside other laws and policies, which relate to health in South Africa.

In Chapter 1 of the NHA, the objects of the Act are to regulate national health and to provide uniformity in respect of health services across the nation by protecting, respecting, promoting and fulfilling the rights of (among other groups) vulnerable groups such as women, children, older persons and persons with disabilities.

## 2022/23 ANNUAL REPORT

---

Medicines and Related Substances Act, 1965 (Act No. 101 of 1965) - Provides for the registration of medicines and other medicinal products to ensure their safety, quality and efficacy, and provides for transparency in the pricing of medicines.

Hazardous Substances Act, 1973 (Act No. 15 of 1973) - Provides for the control of hazardous substances, in particular those emitting radiation.

Occupational Diseases in Mines and Works Act, 1973 (Act No. 78 of 1973) - Provides for medical examinations on persons suspected of having contracted occupational diseases, especially in mines, and for compensation in respect of those diseases.

Pharmacy Act, 1974 (Act No. 53 of 1974) - Provides for the regulation of the pharmacy profession, including community service by pharmacists

Health Professions Act, 1974 (Act No. 56 of 1974) - Provides for the regulation of health professions, in particular medical practitioners, dentists, psychologists and other related health professions, including community service by these professionals.

Dental Technicians Act, 1979 (Act No. 19 of 1979) - Provides for the regulation of dental technicians and for the establishment of a council to regulate the profession.

Allied Health Professions Act, 1982 (Act No. 63 of 1982) - Provides for the regulation of health practitioners such as chiropractors, homeopaths, etc., and for the establishment of a council to regulate these professions.

SA Medical Research Council Act, 1991 (Act No. 58 of 1991) - Provides for the establishment of the South African Medical Research Council and its role in relation to health Research.

Academic Health Centres Act, 86 of 1993 - Provides for the establishment, management and operation of academic health centres.

Choice on Termination of Pregnancy Act, 1996 (Act No. 92 of 1996) - Provides a legal framework for the termination of pregnancies based on choice under certain circumstances.

Sterilisation Act, 1998 (Act No. 44 of 1998) - Provides a legal framework for sterilisations, including for persons with mental health challenges.

Medical Schemes Act, 1998 (Act No. 131 of 1998) - Provides for the regulation of the medical schemes industry to ensure consonance with national health objectives.

Council for Medical Schemes Levy Act, 2000 (Act 58 of 2000) - Provides a legal framework for the Council to charge medical schemes certain fees.

Tobacco Products Control Amendment Act, 1999 (Act No. 12 of 1999) - Provides for the control of tobacco products, prohibition of smoking in public places and advertisements of tobacco products, as well as the sponsoring of events by the tobacco industry.

## 2022/23 ANNUAL REPORT

---

Mental Health Care 2002 (Act No. 17 of 2002) - Provides a legal framework for mental health in the Republic and in particular the admission and discharge of mental health patients in mental health institutions with an emphasis on human rights for mentally ill patients.

National Health Laboratory Service Act, 2000 (Act No. 37 of 2000) - Provides for a statutory body that offers laboratory services to the public health sector.

Nursing Act, 2005 (Act No. 33 of 2005) - Provides for the regulation of the nursing profession and for the establishment of a council to regulate these professionals including community service by these professionals.

Higher Education Act (Act No. 101 of 1997) as amended: Provides for the regulation of Higher Education Institutions and its registration, including the formation of governance structures guiding education and training of students.

National Qualifications Act (Act No. 67 of 2008): Provides for a single integrated system comprising three co-ordinated qualifications Sub-Frameworks

Traditional Health Practitioners Act, 2007 (Act No. 22 of 2007) - Provides for the establishment of the Interim Traditional Health Practitioners Council, and registration, training and practices of traditional health practitioners in the Republic.

Foodstuffs, Cosmetics and Disinfectants Act, 1972 (Act No. 54 of 1972) - Provides for the regulation of foodstuffs, cosmetics and disinfectants, in particular quality standards that must be complied with by manufacturers, as well as the importation and exportation of these items.

KwaZulu-Natal Health Act (Act No. 1 of 2009) and Regulations: Provides for a transformed Provincial Health System within framework of the National Health Act of 2003.

Public Service Act No. 64 of 1994: To provide for the organisation and administration of the public service of the Republic, the regulation of the conditions of employment, terms of office, discipline, retirement and discharge of members of the public service, and matters connected therewith.

Disaster Management Act: Classification of a National Disaster: COVID-19 (coronavirus).

Notice on the classification of the COVID-19 pandemic as a National Disaster based on the potential magnitude and severity of the COVID -19 pandemic on 15 March 2020.

**South Africa's National Strategic Plan for HIV, TB and STI's (2017-2022):** The fourth National Strategic Plan (NSP) that South Africa has adopted to guide its response to HIV, Tuberculosis and sexually transmitted infections

## OTHER LEGISLATION APPLICABLE TO THE DEPARTMENT

Criminal Procedure Act, 1977 (Act No. 51 of 1977), Sections 212 4(a) and 212 8(a) – Provides for establishing the cause of non-natural deaths.

Children's Act, 2005 (Act No. 38 of 2005) - The Act gives effect to certain rights of children as contained in the Constitution; to set out principles relating to the care and protection of children, to define parental responsibilities and rights, to make further provision regarding children's court.

Occupational Health and Safety Act, 1993 (Act No. 85 of 1993) - Provides for the requirements that employers must comply with in order to create a safe working environment for employees in the workplace.

Compensation for Occupational Injuries and Diseases Act, 1993 (Act No. 130 of 1993) - Provides for compensation for disablement caused by occupational injuries or diseases sustained or contracted by employees in the course of their employment, and for death resulting from such injuries or disease.

National Roads Traffic Act, 1996 (Act No. 93 of 1996) - Provides for the testing and analysis of drunk drivers.

Employment Equity Act, 1998 (Act No. 55 of 1998) - Provides for the measures that must be put into operation in the workplace in order to eliminate discrimination and promote affirmative action.

State Information Technology Act, 1998 (Act No. 88 of 1998) - Provides for the creation and administration of an institution responsible for the state's information technology system.

Skills Development Act, 1998 (Act No. 97 of 1998) - Provides for the measures that employers are required to take to improve the levels of skills of employees in workplaces.

Public Finance Management Act, 1999 (Act No. 1 of 1999) - Provides for the administration of state funds by functionaries, their responsibilities and incidental matters.

Promotion of Access to Information Act, 2000 (Act No. 2 of 2000) - Amplifies the constitutional provision pertaining to accessing information under the control of various bodies.

Promotion of Administrative Justice Act, 2000 (Act No. 3 of 2000) - Amplifies the constitutional provisions pertaining to administrative law by codifying it.

Promotion of Equality and the Prevention of Unfair Discrimination Act, 2000 (Act No. 4 of 2000) Provides for the further amplification of the constitutional principles of equality and elimination of unfair discrimination.

## 2022/23 ANNUAL REPORT

---

Public Service Act, 1994, as amended

To provide for the organisation and administration of the public service of the Republic, the regulation of the conditions of employment, terms of office, discipline, retirement and discharge of members of the public service, and matters connected therewith.

Division of Revenue Act, (Act No. 7 of 2003) - Provides for the manner in which revenue generated may be disbursed.

Broad-based Black Economic Empowerment Act, 2003 (Act No. 53 of 2003) - Provides for the promotion of black economic empowerment in the manner that the state awards contracts for services to be rendered, and incidental matters.

Labour Relations Act, 1995 (Act No. 66 of 1995) - Establishes a framework to regulate key aspects of *relationship* between employer and employee at individual and collective level.

Basic Conditions of Employment Act, 1997 (Act No. 75 of 1997) - Prescribes the basic or minimum conditions of employment that an employer must provide for employees covered by the Act.

Military Veterans Act, 2011 (Act No. 18 of 2011) - Provides for principles recognised by the State as governing the affairs of military veterans and for policy objectives in this regard

National Strategic Plan on Gender-Based Violence and Femicide: The Gender-Based Violence and Femicide National Strategic Plan (GBVF NSP) sets out to provide a cohesive strategic framework to guide the national response to the hyper endemic GBVF crisis in South Africa.

South Africa's National Policy Framework for Women's Empowerment and Gender Equality:

Outlines South Africa's vision for gender equality and for how it intends to realise this ideal

Note: The National Schools Nutrition Programme (NSNP) is the government programme that provides one nutritious meal to all learners in Primary and Secondary Schools that falls under the mandate of the Department of Education. The NSNP implementation falls outside the mandate for the Department of Health

## Policy Mandates

### National Health Insurance (NHI) Bill

South Africa is at the brink of effecting significant and much needed changes to its health system financing mechanisms. The changes are based on the principles of ensuring the right to health for all, entrenching equity, social solidarity, and efficiency and effectiveness in the health system in order to realise Universal Health Coverage (UHC).

To achieve Universal Health Coverage, institutional and organisational reforms are required to address structural inefficiencies; ensure accountability for the quality of the health services rendered and ultimately to improve health outcomes particularly focusing on the poor, vulnerable and disadvantaged groups.

In many countries, effective Universal Health Coverage has been shown to contribute to improvements in key indicators such as life expectancy through reductions in morbidity, premature mortality (especially maternal and child mortality) and disability. An increasing life expectancy is both an indicator and a proxy outcome of any country's progress towards Universal Health Coverage.

The phased implementation of NHI is intended to ensure integrated health financing mechanisms that draw on the capacity of the public and private sectors to the benefit of all South Africans. The policy objective of NHI is to ensure that everyone has access to appropriate, efficient, affordable and quality health services.

An external evaluation of the first phase of National Health Insurance was published in July 2019. Phase 2 of the NHI Programme commenced during 2017, with official gazetting of the National Health Insurance as the Policy of South Africa. The National Department of Health drafted and published the National Health Insurance Bill for public comments on 21 June 2018. During August 2019, the National Department of Health sent the National Health Insurance Bill to Parliament for public consultation.

The 2020 South African Health Review discussed health legislation and policy with a focus on disability. Chapter 4 of the 2020 South African Health Review (SAHR) states that Universal health coverage (UHC) implies that all people and communities are able to access the promotive, preventive, curative, rehabilitative and palliative health services they need. This should be achieved in ways that are equitable and of a high quality of service while protecting communities from financial harm. The resources required to align to the Framework and Strategy for Disability and Rehabilitation Services in South Africa 2015-2020 must be mobilised and equitably applied. Disability services and beneficiaries will need to be explicitly

# 2022/23 ANNUAL REPORT

---

referenced in the benefit package to be delivered under National Health Insurance (2020 SAHR).

The following National and Provincial Policies, Frameworks and Strategies are relevant to 2020-2025:

- National Health Insurance (NHI) Bill
- National Development Plan (NDP): Vision 2030
- Sustainable Development Goals (SDGs) 2030
- Revised Medium Term Strategic Framework (MTSF) and NDP Implementation Plan 2019-
- 2024 Provincial Growth and Development Strategy/plan (PGDS/P) 2020
- Plan of Action to Mitigate a COVID-19 Resurgence in South Africa
- KZN Economic Recovery Plan for COVID-19
- Public Service Regulations
- Health Compact Pillars

The changes to the institutional policies and strategies as per the Revised Strategic Plan (2020-2025) impacting upon and supplementing Departmental policies and plans. These are summarised below:

- Annual Budget Prioritisation Framework: Towards Budget 2022 – makes provision to ensure that the budget allocations are aligned with the MTSF priorities and development goals.
- Final Revised Medium Term Strategic Framework 2019-2024; 1 October 2021- included new interventions and associated targets adopted by the Cabinet Lekgotla in September 2021. The MTSF relates to priorities and interventions pertaining to the COVID 19 pandemic and related budget adjustments as well as priorities from the Economic Reconstruction and Recovery Plan (ERRP) that sets out a reconstruction and recovery plan for the South African economy that is aimed at stimulating equitable and inclusive growth, following COVID-19.
- **The Department of Planning, Monitoring and Evaluation's, National Annual Strategic Plan; 2022/2023** – The plan sets out government's priorities and targets for a year, to guide the development of Annual Performance and Annual Operations Plans for a particular year.
- **The Presidency's Ministerial Circular 1 of 2021** – provides guidance on the implementation of the 2019-2024 Medium Term Strategic Framework (MTSF) for the planning cycle and extends to planning priorities for the remaining MTSF period. This includes planning imperatives in respect of budgeting.

## 2022/23 ANNUAL REPORT

---

- The Provincial Growth and Development Strategy (PGDS); 2021 – is an update of the 2011 and 2016 PGDS documents. This document sets out strategies to support the growth and development of the province.

## 2022/23 ANNUAL REPORT

### Strategic Outcome Orientated Goals

The table below illustrates the alignment between the Department's Strategic Goals and other macro frameworks and plans.

TABLE 3: (A1) ALIGNMENT OF MACRO PLANS

KZN DOH Impact and Outcome 2020-2025	Revised MTSF Outcomes 2019-2024	National Development Plan: Vision 2030 goals	Sustainable Development Goals	Provincial MTSF Implementation Plan	Health sector's strategy 2019-2024
Impact: Increased Life Expectancy	Outcome: Progressive improvement in total life expectancy of South Africans	Goal 1: Life expectancy at birth increases to 70 years		Goal Indicator: Life expectancy at birth. Strategic Objective 3.2: Enhance the health of communities and citizens	Goal 1: Increase Life Expectancy improve Health and Prevent Disease  <i>Inter sectoral collaboration to address social determinants of health</i>
Outcome: Universal Health Coverage	Outcome: Universal health coverage for all South Africans achieved by 2030	Goal 6: Complete Health Systems reforms  Goal 8: NHI-Universal health care coverage achieved.  Goal 6a: Strengthen the district health system  Goal 7: Primary Health care teams provide care to families and communities	3.8 - Achieve universal health coverage (UHC)	3.2(a) Scale up implementation of strategic interventions to fast-track transformation of public health services towards universal health coverage.  3.2(e) Facilitate health research and knowledge management to inform evidence-based and responsive planning and decision-making.	Goal 2: Achieve UHC by Implementing NHI  Strategic Objective (SO): <i>Progressively achieve Universal Health Coverage through NHI</i>  <i>SO: Improve quality and safety of care</i>  <i>SO: Provide leadership and enhance governance in the health sector for improved quality of care</i>

## Auditor General Report on Predetermined Objectives

The AGSA currently performs certain audit procedures on the performance information to provide reasonable assurance in the form of an audit conclusion. The audit conclusion on the performance against predetermined objectives is included in the report to management, with material findings being reported under the Predetermined Objectives heading in the Report on other legal and regulatory requirements section of the auditor's report.

Refer to page 339 of the Report of the Auditor General, published as Part F: Financial Information.

## Overview of Departmental Performance

### Service Delivery Environment

#### Overview

The KwaZulu-Natal (KZN) population increased from 11 563 185 in 2021/22 to 11 683 165 due to changes in the 2022/23 mid-year estimates from Statistics South Africa (Stats SA). The main beneficiaries for public health services remained the uninsured population with only 9.8% of the population on medical aid (2020 General Household survey: 13<sup>th</sup> November 2021 StatsSA).

South Africa is classified as an upper-middle-income country with a per capita income of R55 258. Despite the perceived wealth, most of the country's households are plagued by poverty. Although significant progress was made prior to the economic crisis in addressing poverty, many South African households have fallen back or still remain in the trap of poverty through inadequate access to clean water, proper health care facilities and household infrastructure (Provincial Treasury, 2019).

Health is influenced by the environment in which people live and work as well as societal risk conditions such as polluted environments, inadequate housing, poor sanitation, unemployment, poverty, racial and gender discrimination, destruction and violence (National Department of Health, 2019). Globally, it is recognized that health and health outcomes are not only affected by healthcare or access to health services. They result from multidimensional and complex factors linked to the social determinants of health, which include a range of social, political, economic, environmental, and cultural factors, including human rights and gender equality (National Department of Health, 2019).

Comparing 2011 and 2016 data, there is a decline in people living in informal dwelling and an increase in traditional dwellings. The province has made gains in the access to piped water and electricity but uMkhanyakude remains at unacceptably high percentages of households with no access to piped water and electricity for lighting, food preparation and storage.

Epidemiologically, South Africa is confronted with a quadruple burden of disease (BOD) because of HIV and Tuberculosis (TB) TB, high maternal and child morbidity and mortality, rising non-communicable diseases and high levels of violence and trauma (National Department of Health, 2019). This is also the case in KZN.

The mortality data source in South Africa is Statistics SA (Stats SA) which uses data obtained from death notification administrative forms (Form BI-1663 and Form DHA-1663), filed by the

# 2022/23 ANNUAL REPORT

---

Department of Home Affairs. Furthermore, death notifications by Stats SA are compiled using the International Classification of Diseases (ICD). KwaZulu-Natal faces a convergence of infectious and chronic disease of lifestyle from which years of life are lost. In 2017, 76 60517 (17.2%) of deaths were reported in KZN, the second highest number of deaths after Gauteng province in South Africa.

According to the latest mortality report by Statistics South Africa, KwaZulu-Natal (KZN) has the second highest number of deaths in the country, contributing to 18.7% of the country's deaths. Other forms of heart disease was the leading cause of death accountable for 8.2% of deaths in the province. Overall, eThekweni and uMgungundlovu districts contributed to the highest numbers of deaths in the province. This can be attributed to their large population sizes relative to the other districts.

The ten leading causes of mortality in KwaZulu-Natal are discussed below. A staggering 27.7% of deaths are due to cardio- and cerebrovascular diseases and their risk factors, i.e., "other forms of heart disease", diabetes mellitus, cerebrovascular disease, hypertension, and ischemic heart disease. "Other forms of heart disease" includes congestive heart failure, myocardial infarction, cardiomyopathy etc. The risk factors for these diseases are linked. For example, congestive heart failure often occurs as a result of coronary heart disease, and coronary heart disease is directly linked to hypertension and diabetes. In addition to contributing to cardio- and cerebrovascular deaths, hypertension and diabetes are listed below as causes of death on their own.

Increasing prevalence of high blood pressure is connected to rising levels of obesity, which affects 68% and 31% in women and men in South Africa respectively (National Department of Health Statistics South Africa, 2016). Similarly, obesity is also a major risk factor for the development of diabetes. To reduce mortality in adults in KZN, the major areas of focus need to be cardio- and cerebrovascular diseases and their risk factors - hypertension and type 2 diabetes mellitus. The best strategies to reduce mortality from these conditions are firstly to prevent them from occurring by implementing programmes that reduce obesity. Secondly, the health services provided at primary health care level should focus more on detection and treatment of early disease.

Communicable diseases remain an important cause of death in KZN. The related infections of HIV and TB caused 5.4% and 6.8% of deaths respectively. KZN has one of the highest prevalence's of HIV in the world, and this drives the TB epidemic and may also impact on the incidence and outcomes of other infectious diseases such as pneumonia. It is essential that efforts to detect and treat HIV infection continue. In addition, the contribution of poverty to HIV, TB and other infectious diseases should not be underestimated. Poor nutrition, overcrowding in homes, and lack of water and sanitation facilities continue to contribute to the incidence of infectious diseases in KZN. Vaccination against all infectious diseases remains the most important health systems intervention to reduce mortality due to these pathogens.

## Services Provided

### *Community-based services*

Non-acute health services are provided at community and household level through Ward Based Outreach teams (WBOTs), School Health Teams, TB Surveillance and Multi Drug Resistant Tuberculosis (MDR-TB) Teams and Community Care Givers/Health Workers (CHWs/CCGs).

## 2022/23 ANNUAL REPORT

---

Services include health promotion/ education; screening for health conditions; appropriate referral to health facilities; follow-up and support of patients on treatment; home-based care; school health services including implementation of health promoting schools; the management of MDR-TB patients at household level; mental health and chronic care.

Phila Mntwana Centres, linked to Operation Sukuma Sakhe (OSS) War Rooms, provide promotive and preventive health services targeting children. OSS is used as vehicle for inter-government service integration at community level including addressing the social determinants of health e.g. poverty eradication, provision of sanitation, water, electricity and waste removal.

The Centralised Chronic Medication Dispensing and Distribution (CCMDD) Programme makes chronic medication available to patients at community level, close to where they reside. This decongests facilities, saves cost and travelling times to facilities and decreases waiting times at health facilities.

Services at truck stops, taxi ranks, and other high-risk areas increase access to basic and essential services e.g. testing for HIV, TB and other chronic conditions. Services offered at these easily accessible sites increases the possibility of timeous referral for appropriate clinical management of conditions at fixed facilities.

### *Primary Health Care (PHC) services*

Nurse driven services are provided at fixed (clinics and CHCs) and mobile clinics covering a comprehensive range of curative, preventative, rehabilitative and palliative services. Included are services for minor ailments; maternal, child and women's health; communicable and non-communicable diseases and conditions; oral and dental health; environmental health and nutrition. Mobile services are used to improve access in sparsely populated areas or areas with poor access to fixed facilities. Outreach services from District Hospitals and services rendered by Private Practitioners increases access to clinical services at entry point.

### *Hospital Services*

In and out-patient services are rendered at District, Regional, Specialised, Tertiary and Central Hospitals. District Hospitals form part of the District Health System and include services at General Practitioner level with varying degrees of General Specialist services to improve access in especially rural areas.

Regional Hospitals render services at General Specialist level and serve as referral for District Hospitals. All Regional Hospitals render a significant proportion of level-one services mainly due to demographic distribution of households and location of hospitals. Queen Nandi and Newcastle Hospitals provide mother and child services. McCord's Hospital is the Provincial Eye Care Hospital.

Specialised TB and Psychiatric hospitals provide acute and sub-acute services for the two clinical disciplines.

The Step Down/ Sub-Acute Hospitals provide stepdown care.

Tertiary Hospitals and one Central Hospital provide highly specialised tertiary and quaternary services.

# 2022/23 ANNUAL REPORT

---

Outreach services are provided by level 2 and 3 hospitals to improve access to quality clinical management at lower levels of care. District hospitals provide outreach services to PHC clinics.

## *Emergency Medical Services (EMS) and Patient Transport Services (PTS)*

Services include emergency response, special operations, communication, aeromedical services and patient transport services. Aeromedical services are provided by the use of all available aeromedical services in KZN, namely Air Mercy Services, Netcare and Black Eagle. These are dispatched as and when required.

## *Forensic Pathology Services*

Specialised Forensic Pathology Services are provided at Medico-Legal Mortuaries throughout the Province.

## *Clinical Forensic Medicine*

Crisis Centres have been established in all District and Regional Hospitals within the Province to strengthen clinical medico-legal services focusing on the management of survivors of violence (including rape and sexual assault).

## Service Delivery Challenges

The COVID – 19 pandemic resulted in an increased demand for Emergency Medical Services (EMS), particularly in urban areas, this resulted in a negative impact on response times to priority 1 emergency cases. The majority of the COVID – 19 related cases were in urban areas. The COVID – 19 pandemic further resulted in an increase in inter facility transfer which have a longer turnaround time and thereby reduces the number of cases each ambulance can attend within a 12 hour shift and delayed response times.

Should Emergency Medical Services (EMS) attain the National norm of 1 ambulance per 10 000 population, there are some cases that will still not be responded to within 30 minutes in urban areas and 60 minutes in rural areas due to distance, road infrastructure and terrain of the Province.

## *Service Delivery Improvement Plan*

The Department did not have a Service Delivery Improvement Plan that covered the 2022/23 financial year, as per the Department of Public Service and Administration's (DPSA) directive.

## *Organisational Environment*

A total number of 2 506 persons working days were lost as a result of strike action resulting from the non-agreement of the general salary adjustments for public servants. As is associated with strike action, service delivery at certain health facilities was compromised. The recoveries as part of the no work no pay principle are being done over 4 months effective from April 2023. The facilitation process to end the strike action was concluded on 14 March 2023, with the Employer and the Labour Unions that were not participating in the negotiations, signing a

## 2022/23 ANNUAL REPORT

---

settlement agreement that sought to end the strike and to have all Parties to the PSCBC participate in the 2023/24 wage negotiations.

The CEO posts for Benedictine, Catherine Booth, Clairwood, Fort Napier, GJ Crookes, Greytown, Nkandla, Nkonjeni, St Apollinaris and Wentworth Hospitals were filled during the reporting period whilst the CEO posts for Charles Johnson, Church of Scotland, Montebello, Ngwelezana, Rietvlei, and UMzimkhulu Hospitals and KwaMashu CHC were vacated during the same period for various reasons. The other senior appointments made in the Department for the reporting period were for the posts of Chief Financial Officer, Chief Director: Risk Assurance Services, Director: Strategic Health Programmes, Director: Security Management Services, Director: Employee Health and Wellness, District Directors: Umzinyathi and Uthukela District Offices whilst the posts of Chief Director: Human Resource Management, Director: Labour Relations, Director: Revenue and Debt Management were vacated in the same period.

267 employees demised whilst 49 employees were discharged as a result of ill-health and 843 employees retired. 57 691 employees made use of their sick leave at an average of 9 days per employee over the reporting period whilst a total of 35 146 days were taken as incapacity leave. (NB. HR Data for deaths are not captured as "COVID"). Disciplinary cases are delayed due to various reasons including, but limited to, unavailability of witnesses, illnesses of employee or the employee or employer representatives.

The implementation of National Health Insurance (NHI) Initiative ensured compliance with norms and standards of all 85 private hospitals. Accreditation and licensing of 8 228 private hospital beds was done in order to meet international norm of 1.5 beds for 1 000 population. In KwaZulu-Natal, there is now a total of 5 884 approved hospital beds. In order to provide qualitative health services, grant funding support was made available to the following community-based health services, at a total of R62.04 Million:

X6:	Disability and Rehabilitation-	R4.84 Million
X3:	Step-Down Care-	R12.9 Million
X26:	Mental Health Care Services	R1.3 Million
X7:	Primary Health Care	R5.5 Million
X13:	Palliative Care	R7.59 Million

Improved access to accredited Emergency Medical Services (EMS) was done by ensuring the following:

## 2022/23 ANNUAL REPORT

	Public Intermediate Life Support	Private Intermediate Life Support	Public Advanced Life Support	Private Advanced Life Support	Total
Ambulance Services licensed to operate in KwaZulu-Natal	241	222	13	18	494
Medical Response licensed to operate in KwaZulu-Natal:	36	22	24	58	140

Also, a total of seven (7) Medical Rescue vehicles and four (4) EMS air ambulances were licensed to operate in KwaZulu-Natal.

The implementation of the National Health Insurance (NHI) Reforms Initiative resulted to the following achievements:

- Improved patient experience of care from 69.9% to 82.1%, Primary Health Care (PHC) 72.2% to 84.5%, Districts hospitals 79.5% to 93%, Regional hospitals 85.1% to 94%, and Tertiary hospitals 83.7% to 77%.
- Contracting of General Practitioners in eleven (11) health districts.
- The department has invested in leadership development in order to have fit –for-purpose managers to ensure that client experience of care is improved. In the 2022/23 financial year, 186 departmental managers were enrolled on leadership capacity development programmes.

## 2022/23 ANNUAL REPORT

### Key policy developments and legislative changes

The following policies have been reviewed or approved within the 22/23 financial year:

Directorate	Policy Title	Purpose	Status	Last Review/Approval Date
Supply Chain Management	SCM Policy and Delegation of Authority <sup>2</sup>	To ensure compliance with audit and legislative requirements.	Approved	Apr-22
Financing	Provision of Funding to State Aided Institutions	To provide standard and uniform framework for the provision of funding to state aided institutions; To provide regulatory framework for the utilisation of funding by state aided institutions;	Approved	Jan-23
Nursing	Nursing Grounds	To provide guidance on managing and conducting nursing grand rounds (NGRs).	Review	Mar-23
College of Emergency Care	Development of learning programmes	To provide clear guidelines for the development of learning programmes in order to meet the outcomes of the relevant course curriculum so that learning programmes are developed and aligned to the standards set by the National regulatory institutions.	Review	Sep-22
College of Emergency Care	Recognition of prior learning	To ensure clear guidelines for the implementation of Recognition of Prior Learning (RPL) at the College of Emergency Care (COEC).	Review	Sep-22
College of Emergency Care	Staff training and development	To ensure that transparent and consistent processes are in place to guide employees who are required to participate in personal training and development.	Review	Nov-22

<sup>2</sup> Implementation resulted in delays in drafting of Infrastructure Specification and Evaluations being drastically reduced. Also, the delays in procuring emergency items or service has been significantly reduced.

## 2022/23 ANNUAL REPORT

Directorate	Policy Title	Purpose	Status	Last Review/Approval Date
College of Emergency Care	Student academic grievance	To provide guidance on the processes to be followed when resolving complaints and grievances.	Review	Sep-22
College of Emergency Care	Student recruitment, selection and admission	To ensure clear guidelines regarding the recruitment, selection and admission of prospective students of KwaZulu-Natal College of Emergency Care (COEC).	Review	Jan-23
College of Emergency Care	Student support	To provide clear guidelines for Student support	Review	Sep-22
College of Emergency Care	Teaching and learning	To provide clear guidelines for teaching and learning in order to meet the objectives and outcomes of the relevant course curriculum.	Review	Sept 22
IT	Shadow ICT policy	This policy provides guidelines for the appropriate use of shadow IT, explains the restrictions that will apply to it, and defines elements pertaining to employee and IT department responsibilities.	Review	Oct-22

Review	Jun-23
Risk Management	Fraud Prevention Policy	The Fraud Prevention Policy outlines the Departments focus and commitment to the reduction and possible eradication of incidences of fraud and corruption.	Review	01-Jun

## 2022/23 ANNUAL REPORT

---

### Achievement of Institutional Impacts and Outcomes

#### Outcome: Universal health coverage

The UHC service index is low at 59%, compared to the five-year target of 73.3%, and this is due to targets in the tracer indicators not being met. The high volume of medical claims and the backlog on court proceedings resulted in an increase in contingent liability of medico-legal cases to R 27.8 billion, pushing the performance further away from the 2024/25 target of R18 billion. The non-compliance to the non-negotiable vital elements in certain sub-domains resulted in the 28.2% actual performance on the percentage of facilities certified by the Office of Health Standards Compliance (OHSC), which is 153% lower than the 71.4% to be achieved by the end of 2024/25 financial year. The percentages of PHC facilities with functional clinic committees and hospitals with functional hospital boards decreased from the baselines due to expired membership and are at 22.7% and 50% respectively against the 100% targets. There were increases in the Professional Nurses per 100 000 and Medical Officers per 100 000 which is attributed to employment of additional nurses for COVID-19 purposes and allocation of additional Community Service Practitioners and Medical Interns.

The average emergency medical services response for both urban and rural areas has been decreasing from 51.7% in 2020/21 to 45.1% in 2022/23. The factors leading to the decline include insufficient base infrastructure, limited operational ambulances, inadequate staff complement especially intermediate and advanced life support paramedics, and increased demand for inter-facility transfers.

The number of bursaries awarded to first year nursing students and internal employees increased from 520 in 2021/22 to 622 in 2022/23. The change from a 4-year to 3-year programme and the redirection of funds from the Republic of South Africa (RSA)-Cuban Medical Programme allowed for the increase. Improvement of linen services is one of the outputs that the department is focusing on in the current strategic plan period. Despite the increase in the 2021/22 financial year, the percentage of facilities reporting clean linen stock outs has decreased by 9.6% compared to 2020/21 financial year. The tracer medicine stock out rate for facilities increased from 0.2% in 2020/21 to 1.7% 2021/22 and showed improvement in the reporting period by decreasing to 1.4%. The increase in the tracer medicine stock outs is attributed to supply constraints. There has been a steady increase in the number of new and replacement infrastructure projects completed, from 7 in 2020/21 to 45 in 2022/23. The percentage of preventative maintenance expenditure improved from 30% in 2020/21 to 49.9% in 2022/23.

# 2022/23 ANNUAL REPORT

Outcome: Improved patient experience of care.

There has been a gradual decrease in the Patient Experience of Care Satisfaction rate from 86.5% in 2020/21 to 84.4% in 2022/23. This is ascribed to limited access to care and negative staff attitudes, among other factors. On the other hand, the percentage of Severity Assessment Code 1 (SAC 1) incidents reported within 24 hours has been steadily increasing between 2020/21 (63.9%) and 2022/23 (74.5%). The increase in the SAC 1 incident reporting is due to adherence by Districts to timelines stipulated on guidelines for reporting Patient Safety Incidents.

Outcome: Reduced morbidity and mortality

The lack of a standardized tick registers in hospitals negatively influenced data recording. Requests for printing have been submitted and tools will be distributed upon receipt. The Programme will continue to conduct desktop analysis and engage districts on gaps. During 23/24 105% (26 040 456 / 24 714 031) of the PHC headcount was screened for TB symptoms.

GRAPH 1: NO. OF PATIENTS SCREENED FOR TB SYMPTOMS

Implementation of the targeted universal TB testing and the TB recovery plan post COVID-19 pandemic resulted in increased case finding.

GRAPH 2: NO. OF HIV DONE – SUM

The province is still experiencing inconsistencies in the standard of care for children and adolescent with HIV within facilities and the community. This has resulted in a testing and treatment gap within the paediatric and adolescent sub-populations. Provincially, the current performance is at 80-65-71 in terms of performance against 90-90-90 in children under 15.

# 2022/23 ANNUAL REPORT

GRAPH 3: ALL DS-TB CLIENT DEATH RATE

The death rate is highest amongst the HIV/TB co-infected patients who are virally unsuppressed.

GRAPH 4: ALL DS-TB CLIENT TREATMENT SUCCESS RATE

High loss to follow up (9.1%) which is fueled by duplicates, unevaluated patient outcomes and to some extent death rate (7.6%).

GRAPH 5: ART CLIENT REMAIN ON ART END OF MONTH – TOTAL

contributes mainly to failure to achieve TROA targets as it remains at 29% at 12 months. Positivity yield remains significantly low at 3% against a target of 6% which makes new initiations low despite some district efforts of targeted testing and index testing.

Steady improvement is noted year-on-year with a net gain on Total Patients remaining on ART (TROA). Net gain remains below input areas on TROA which result in disproportionate gain. Loss to Follow Up

“Lost to Follow Up” mainly contributes to failure on achieving the target with eThekweni, iLembe and uMkhanyakude Districts being above 30% on “loss to follow up”. 15% of loss to follow up is as a result of file and patient duplicates.

# 2022/23 ANNUAL REPORT

GRAPH 6: ART ADULT VIRAL LOAD SUPPRESSED RATE - (12 MONTHS)

There has been significant improvement on adult suppression, especially among

women which is consistently above 90%. Men sub-population remains below target. Efforts are in place to target men across treatment cascades in the form of Isibaya Samadoda/iKhosomba lamajita/ men's friendly services. Tenofovir Disoproxil, Lamivudine, Dolutegravir (TLD) an ART drug used in 1<sup>st</sup> treatment regime (which combines different types of drugs into one capsule), transition has registered benefits in terms of suppression goals.

GRAPH 7: ART CHILD VIRAL LOAD SUPPRESSED RATE - (12 MONTHS)

Sub-optimal viral suppression rates among HIV-infected children are attributed to issues such as adherence, disclosure, and administration of anti-retroviral medication. Dosing complexities cause under-dosing by care givers.

GRAPH 8: HIV POSITIVE 15-24-YEAR-OLDS (EXCL ANC) RATE

There is a delay in linking HIV patients, with opportunistic infections, to care.

# 2022/23 ANNUAL REPORT

GRAPH 9: TB INCIDENCE

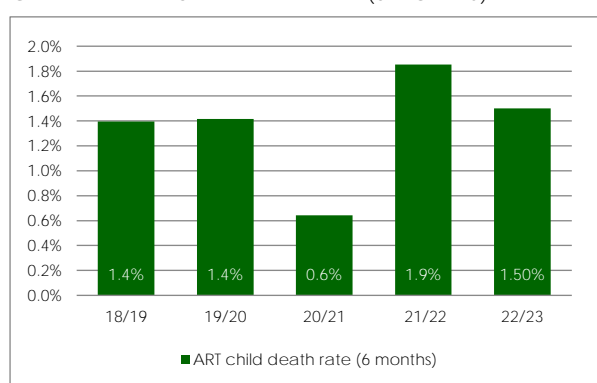

The increase in notification is attributed to positive yields on the implementation of “Finding TB Missing Cases” strategies targeting population at risk as well as the introduction of the urine test to screen for TB in HIV positive clients.

GRAPH 10: ART ADULT DEATH RATE (6 MONTHS)

The death rate has stabilized over the years. There is a noted challenge with linking HIV deaths to other causes of death. Late presentation has improved as more clients are identified earlier. Efforts to elevate Advanced Clinical Care are underway to identify clinical issues in this regard.

GRAPH 11: ART CHILD DEATH RATE (6 MONTHS)

As per earlier analysis, paediatric HIV care needs special attention in the form of matrix interventions. Sub-optimal clinical management including linkage to care, dosage adjustment and unsuppressed viral loads all contribute adversely to care in this age group.

GRAPH 12: ART DEATH RATE (6 MONTHS)

The ART death rate at six months has increased because of late presentation by patients to health facilities.

# 2022/23 ANNUAL REPORT

GRAPH 13: TB RIFAMPICIN RESISTANT/MDR/PRE-XDR TREATMENT SUCCESS RATE – SHORT

The target was missed, mainly due to high loss to follow up, as a result of limited resources to track, trace and monitor patients in the community. Deaths are highest in HIV/TB co-infected patients who are previous TB and ART Loss to follow up clients.

GRAPH 14: TB RIFAMPICIN RESISTANT/MDR/PRE-XDR TREATMENT SUCCESS RATE – LONG

There has been a for long treatment regimen treatment success rate due to high loss to follow up which increased from and high death rate Loss to follow is due to limited resources to track, trace and monitor patients in the community whereas death rate is because of late presentation more noticeable in co-infected HIV patients who are previous TB and ART loss to follow up.

# 2022/23 ANNUAL REPORT

GRAPH 15: 95-95-95 CASCADE – TOTAL POPULATION

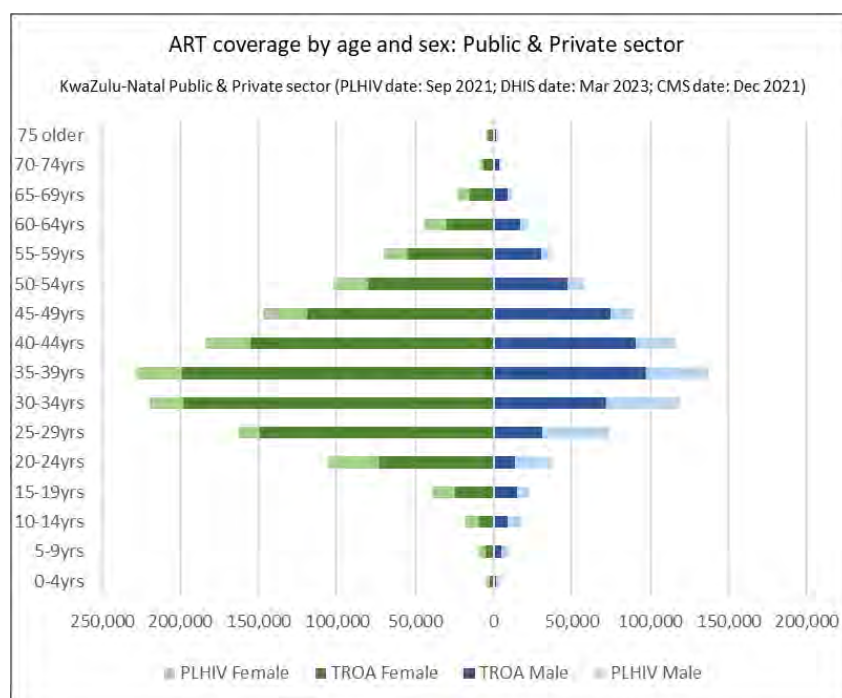

As of March 2023, KwaZulu-Natal is at 96-83-93 in terms of performance against the 95-95-95 targets across its total population using data available in the Public & Private sector. Data available from the private sector suggest that a total of 81 385 clients receive ART through private medical aid schemes in KwaZulu-Natal. For Adult Females and Adult Males this number is 51 935 and 28 582 respectively.

Results for each of the sub-populations vary, with adult females being at 96-89-94, Adult Males at 96-75-94, and children (<15) at 86-59-71. There are gaps across the cascade for adults & children. Case finding, ART initiation and retention have all underperformed and should be addressed through focused interventions in this sub-population.

To achieve 95-95-95 targets, KwaZulu-Natal must increase the number of clients on ART by 210 900. Adult females require an increase of 54 420, whereas an increase of 131 181 adult males on ART is required.

# 2022/23 ANNUAL REPORT

GRAPH 16: ART COVERAGE BY AGE AND SEX: PUBLIC AND PRIVATE SECTOR

As of March 2023, KwaZulu-Natal is at 80% ART coverage of the total PLHIV population using data from both the Private and Public Sectors. Results vary between male and female populations. Among all females ART Coverage is at 85%, while the data shows an ART coverage of 71% for all males. For Females, ART coverage among adults (>15 years) is at 86% and 53% for Female Children (<15 years). For Males, ART coverage among adults (>15 years) is at 72% and 48% for Male Children (<15).

GRAPH 17: DELIVERY 10 TO 19 YEARS IN FACILITY RATE

Multiple factors contributed to high teenage pregnancy including societal issues which are difficult to address. Low use of contraceptives amongst youth was also a challenge.

# 2022/23 ANNUAL REPORT

GRAPH 18: ANTENATAL 1<sup>ST</sup> VISIT BEFORE 20 WEEKS RATE

Poor linkage to care following positive testing is noted in most districts. One of the contributory factors is teenage pregnancy.

GRAPH 9: MATERNAL MORTALITY IN FACILITY RATIO – TOTAL

There has been a reduction in the number of maternal deaths from COVID-19 with the implementation of the COVID-19 vaccination programme for pregnant women. The evaluation of minimum standards has also yielded results. The establishment of Onsite Midwife-led Birth Units (OMBU's) at Prince Mshiyeni Memorial Hospital and Newcastle has also improved outcomes.

GRAPH 13: [NUMBER OF] INPATIENT DEATHS UNDER 5 YEARS – TOTAL

The majority of the under 5 deaths occurs in the Neonatal category (0 – 28 days) and this drives up the under 5 death rate. There is a correlation between neonatal death and maternal health, and therefore there is

a high number of deaths at regional hospitals and District Hospitals compared to Tertiary and Central Hospital level. The number of deaths between 1 and 5 years has dropped significantly over the previous 10 years.

Promotion of neonatal interventions including early breastfeeding initiation and rooming-in have yielded results. Implementation of primary health care programmes has also had a positive impact at hospital level. The provision of paediatric respiratory support in all hospitals is noted.

# 2022/23 ANNUAL REPORT

GRAPH 14: NEONATAL DEATH IN FACILITY RATE – TOTAL

Increased coverage of key interventions such as Kangaroo Mother Care (KMC); therapeutic hypothermia; ventilation; continuous positive airways pressure (CPAP) support has yielded results.

GRAPH 14: DEATH UNDER 5 YEARS AGAINST LIVE BIRTH RATE – TOTAL

Whilst the role of improved neonatal care at district hospitals is an important element in addressing under 5 deaths, this needs to be complemented by an increase in access to regional and tertiary level neonatal beds. Various strategies are being undertaken to commission more regional and Kangaroo Mother Care (KMC) beds, to strengthen the delivery of respiratory support in district hospitals and optimize use of the available beds. Unless the Department is able to increase the capacity of the neonatal services it is unlikely that the 2025 target will be met.

The major contribution to under 5 deaths is deaths in the neonatal period where the need for service exceeds the current capacity of the provincial neonatal services, especially at regional and tertiary level.

GRAPH 15: INFANT PCR TEST POSITIVE AROUND 10 WEEKS RATE

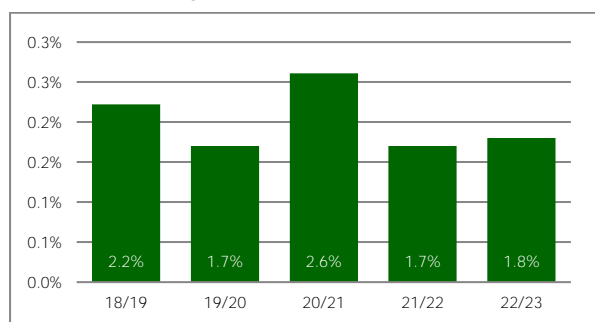

Positive performance due to the implementation of strategies to monitor Ante-Natal Care (ANC) early booking and initiation of HIV positive and breastfeeding women, to reduce high viral load.

# 2022/23 ANNUAL REPORT

GRAPH 15: CHILD UNDER 5 YEARS DIARRHOEA CASE FATALITY RATE – TOTAL

The child under 5 years diarrhoeal disease case fatality rate (CFR) has decreased to 1.8% since 2018/19 although there have been fluctuations from year to year. The lower number of deaths was associated with earlier presentation to the health service and improved assessment and treatment on admission. The Department is on track to meet the 2025 target for this indicator.

GRAPH 16: CHILD UNDER 5 YEARS PNEUMONIA CASE FATALITY RATE - TOTAL

Since 2020/21 there has been a decline in the child under 5 years pneumonia case fatality rate associated with a reduction in the incidence of pneumonia as well as the number of admissions and deaths due to pneumonia.

GRAPH 17: CHILD UNDER 5 YEARS SEVERE ACUTE MALNUTRITION CASE FATALITY RATE – TOTAL

Contributing factors include a history of poor infant and young child feeding practices, social ills, co-morbid conditions such as TB and HIV and delayed diagnosis of co-morbid conditions.

# 2022/23 ANNUAL REPORT

GRAPH 19: EARLY NEONATAL DEATH RATE PER 1 000 – TOTAL

Early neonatal deaths are primarily due to birth complications, hypothermia, unavailability of beds at higher levels of care and inadequate access to respiratory support. The majority of deaths occurred at Regional Hospitals due to inadequate bed numbers and high staff patient ratios.

GRAPH 20: STILL BIRTH IN FACILITY RATE – TOTAL

The province has not succeeded in dropping still birth rate (SBR) to below 20 / 1 000 due to various factors. Continuous infections during pregnancy, coupled with existing maternal medical conditions that women present with, when they become

pregnant are regarded as major contributors of still birth. Infections including syphilis are not adequately screened in Antenatal Care (ANC) clinics thus resulting in poor management and subsequently affect foetal wellbeing. Prompt treatment of positive syphilis test is mandatory to reduce foetal infections and other negative outcomes. Uncontrolled hypertensive disorders during pregnancy and unexplained intrauterine death due to silent, undetected placental dysfunction have also contributed to the negative performance.

## Conditional Grants

TABLE 6: COMPREHENSIVE HIV AND AIDS GRANT

Name of the Grant	Comprehensive HIV / AIDS Grant
Department who transferred the Grant	National Department of Health (NDoH)
Purpose of the Grant	<ul style="list-style-type: none"> <li>To top up on the Provincial Department of Health's Equitable Share funding</li> <li>To implement and sustain HAST programmes in KZN</li> <li>To contain HIV and AIDS, TB epidemic in KZN</li> <li>To provide critical resources (human and physical) to drive the HIV and TB programme to reach their targets</li> </ul>

## 2022/23 ANNUAL REPORT

Name of the Grant	Comprehensive HIV / AIDS Grant		
Expected outputs of the Grant and actual achievements.	Indicators	Expected Outcomes (Target)	Actual Achievements 2022/23 FY
	Number of facilities offering ART	No Set Target All KZN health facilities	680
	Number of new patients that started treatment on ART	119 981	106 476
	Number of patients on ART remaining in care	1 677 309	1 561 281  1 642 666 (Inc. private sector)
	Number of antenatal clients initiated on ART	14 264	13 447
	Number of beneficiaries served by Home-Based Carers	Not collected	
	Number active Home-Based Carers receiving stipends	Cadre No longer existing as Home Based Carers. Cadre integrated to CHW	
	Number of male condoms distributed	123 251 875	89,664,600
	Number of female condoms distributed	5,655,507	3,047,100
	Number of HTA intervention sites (cumulative)	172	101
	Number of HIV positive patients that started on IPT	12 913	81 540
	Number of active lay counsellors on stipends	1 391	1 468
	Number of clients tested for HIV (including antenatal)	2 748 692	4 028 641
	Number of health facilities offering MMC services	80	482  (Public facilities)  Private Hosp = 44  NGO=5

## 2022/23 ANNUAL REPORT

Name of the Grant	Comprehensive HIV / AIDS Grant		
			Non-Med Site= 6  Correc Centre = 17
	Number of MMCs performed	160 815	157 724
	Number of babies PCR tested around 10 weeks	51 147	49 516
	Number of sexual assault cases offered ARV prophylaxis	1 134	5 215
	Number of Doctors trained on HIV/AIDS, STIs, TB and chronic diseases	440	257
	Number of Professional Nurses trained on HIV/AIDS, STIs, TB and chronic diseases	3 388	5 619
	Number of HIV positive clients screened for TB	365 458	126 744
Amount per amended DORA (R'000)	R 6 396 700 (HIV&AIDS Component Conditional Grant)		
Amount received (R'000)	R 6 396 700		
Reasons if amount as per DORA was not received	N/A		
Amount spent by the Department (R'000)	R 6 396 700 (100% spent)		
Reasons for the funds unspent by the entity	N/A		
Reasons for deviations on performance	<p>The Comprehensive HIV/AIDS Component Grant has spent 100%, of its allocated R6.5billion budget for financial year 2022-2023, however in Quarter 3 the province was at 62% and was projecting under expenditure of R815m.</p> <p>Major cost driver, ARV Medicines, was the biggest contributing factor to the projected underspending at approx. 23% (R761m), non-filling of vacant posts on the CG, delayed procurement of clinical stationery for the programmes.</p>		
Measures taken to improve performance	<ul style="list-style-type: none"> <li>- Encourage and enforce health care facilities and Pharm Managers to submit payment packs to Provincial Pharmaceutical Supply Depot (PPSD) in a timely manner (within 5 days)</li> <li>- Monitor ddistricts to improve the verification process for supplier support documentation/invoices to either be rectified or paid in a timely manner.</li> <li>- Conduct monthly and quarterly financial reviews to monitor efficiencies</li> </ul>		

## 2022/23 ANNUAL REPORT

Name of the Grant	Comprehensive HIV / AIDS Grant
	<p>The journaling of funds was done late and to avoid this the plan will include procuring all physical resources in the first quarter to allow most payment in the following quarters, so that incorrect expenditure can be analysed and journaling can be done earlier enough. Funds for all items not found in the first quarter will be reallocated on arear with more financial pressure during the Business Plan review period taking into consideration the CG prescripts.</p>
Monitoring mechanism by the receiving Department	<p>Monthly</p> <p>HAST Programme performance information is analysed and monitored on a monthly basis against set targets.</p> <p>Monthly Provincial nerve centre meetings are held once or twice per quarter, where Districts Deputy Director: Clinical Programmes present their performance and share remedial action plans in areas of non-performance. Districts are further requested to report progress on the implementation of remedial actions in subsequent meetings. Province has developed countdown indicator reporting template which guide districts right from the first month, to see if they are on track or not. The countdown report is presented by all districts during provincial nerve centre meeting where the actual performance is assessed percentage (%) of annual target and Gap/surplus is highlighted in the report.</p> <p>Quarterly</p> <p>The integrated Strategic Health Programme performance review meetings are held quarterly. The main focus areas that the province had prioritise are:</p> <ul style="list-style-type: none"> <li>• Paediatric HIV Cascades, Adult Male HIV Cascades, Male Urethritis Syndrome incidence, Couple Year Protection rate, teenage pregnancy, Loss to follow up (HIV and TB), and TB death rates</li> </ul> <p>All districts were focussing on above priority areas in 2022/23, had developed remedial actions plans to improve these focus areas. Performance was presented in the quarterly meeting by all districts.</p> <p>Financial reports both at provincial and district level are also reviewed during SHP quarterly meetings.</p>

TABLE 7: NATIONAL TERTIARY SERVICES GRANT

Name of the Grant	National Tertiary Services Grant
Department who transferred the Grant	National Department of Health.
Purpose of the Grant	<p>Development and Provision of Tertiary Health Care Services. To compensate Tertiary Facilities or the additional costs associated with the provision of these services.</p> <p>Modernise and transform Tertiary Services that allow for improved access and equity to address the burden of disease.</p>
Expected outputs of the Grant	<p>Provision of full package of Tertiary Services based on the following.</p> <ul style="list-style-type: none"> <li>▪ Number of inpatient separations</li> <li>▪ Number of day patient separations</li> <li>▪ Number of outpatient first attendances</li> <li>▪ Number of outpatient follow-up attendances</li> </ul>

## 2022/23 ANNUAL REPORT

Name of the Grant	National Tertiary Services Grant
	<ul style="list-style-type: none"> <li>▪ Number of inpatient days</li> <li>▪ Average length of stay by facility (tertiary)</li> <li>▪ Bed utilisation rate by facility</li> </ul>
Actual outputs achieved	<p>Funds are transferred by the NDoH cover the following.            Full/Partial operating cost of designated NTSG Services e.g., Personnel Salaries including Occupational Specific Dispensation (OSD), and allowances.            Pharmaceuticals, Laboratory services and medical consumables.            An annualized amount to purchase new Medical Equipment, replace or upgrade old equipment in order to deliver tertiary services.            Modernisation of Tertiary Services where applicable.</p>
Amount per amended DORA (R'000)	R2 045 854 000
Amount received (R'000)	R2 045 854 000
Reasons if amount as per DORA was not received	Not applicable
Amount spent by the Department (R'000)	R2 045 854 000
Reasons for the funds unspent by the entity	The grant was fully spent during this financial year.
Reasons for deviations on performance	No deviation from the Division of Revenue Act (DORA).
Measures taken to improve performance	Business Plans are submitted in the beginning of the financial year with quarterly and annual targets. The Provincial Department of Health submit complete and accurate monitoring reports to the NDoH as per the agreed format and schedule for each of the designated Tertiary Services provided.
Monitoring mechanism by the receiving Department	<p>The Tertiary Services programme is directly managed and monitored by the Chief Directorate: Hospital Management Services supported by other Chief Directorates at Head Office such as Finance, Supply Chain Management and Planning, Monitoring &amp; Evaluation. The Chief Directorate: Hospital Management Services has a full time Deputy Director: Tertiary Services who manages the grant under the director supervision.</p> <p>The meetings are convened quarterly and all four benefiting Hospitals do presentation on their performance. Reports are reviewed, approved and signed off and submitted to NDoH quarterly.</p>

# 2022/23 ANNUAL REPORT

TABLE 8: SOCIAL SECTOR EPWP INCENTIVE GRANT FOR PROVINCES

Name of the Grant	Social Sector EPWP Incentive Grant for Provinces
Department who transferred the Grant	Public Works and Infrastructure (Vote 13)
Purpose of the Grant	To provide funding for job creation efforts in specific focus areas, where labour intensive delivery methods can be optimised
Expected outputs of the Grant	<ul style="list-style-type: none"> <li>• To incentivise provincial departments to expand work creation efforts through the use of labour intensive</li> <li>• delivery methods in the following identified focus areas, in compliance with the Expanded Public Works</li> <li>• Programme (EPWP) guidelines:</li> <li>• road maintenance and the maintenance of buildings</li> <li>• low traffic volume roads and rural roads</li> <li>• other economic and social infrastructure</li> <li>• tourism and cultural industries</li> <li>• sustainable land-based livelihoods</li> <li>• waste management</li> </ul>
Actual outputs achieved	EPWP achieved a total expenditure of R11 736 against R11 736 allocated budget. The percentage spent is 100%.
Amount per amended DORA (R'000)	R11 736 000
Amount received (R'000)	R11 736 000
Reasons if amount as per DORA was not received	n/a
Amount spent by the Department (R'000)	R11 736 000
Reasons for the funds unspent by the Entity	n/a
Reasons for deviations on performance	n/a
Measures taken to improve performance	<ul style="list-style-type: none"> <li>• reporting on EPWP performance within the required time frames</li> <li>• compliant reporting on EPWP Integrated Grant funded projects</li> <li>• implementing their approved EPWP projects on the project list, as planned towards the agreed work opportunity targets</li> <li>• submitting, on a quarterly basis, non-financial reports by the timelines stipulated in the clauses of the 2022 Division of Revenue Act</li> </ul>
Monitoring mechanism by the receiving Department	<ul style="list-style-type: none"> <li>• Provincial departments must report on all projects via DPWI's EPWP reporting system</li> <li>• Reports must be loaded on the EPWP reporting system every month. The system closes 15 days after the end of every quarter in order for progress to be assessed</li> <li>• The grant cannot be used for departmental personnel costs, however a maximum of five per cent of the grant can be used to fund contract-based capacity required to manage data capturing and on-site management costs related to the use of labour intensive methods</li> <li>• The grant can only be utilised for EPWP purposes and for the projects approved in each eligible provincial department's EPWP project list</li> </ul>

TABLE 9: HEALTH FACILITY REVITALISATION GRANT

Name of the Grant	Health Facility Revitalisation Grant
Department who transferred the Grant	Health (Vote 18)
Purpose of the Grant	<ul style="list-style-type: none"> <li>• To help accelerate construction, maintenance, upgrading and rehabilitation of new and existing infrastructure in health including, health technology, organisational development systems and quality assurance</li> <li>• To enhance capacity to deliver health infrastructure</li> <li>• To accelerate the fulfilment of the requirements of occupational health and safety</li> </ul>
Expected outputs of the Grant	<ul style="list-style-type: none"> <li>• Improved service delivery by provincial departments as a result of an enhanced and better quality of health services</li> </ul>

# 2022/23 ANNUAL REPORT

Name of the Grant	Health Facility Revitalisation Grant
	<ul style="list-style-type: none"> <li>Improved quality and quantity of well-maintained health infrastructure (backlog and preventative maintenance)</li> <li>Improved rates of employment and skills development in the delivery of infrastructure</li> <li>Value for money and cost-effective design of facilities in line with the framework for infrastructure procurement and delivery management</li> </ul>
Actual outputs achieved	HFRG achieved a total expenditure of R1 389 913 against a total budget R1 389 913. The percentage spent is 100%
Amount per amended DORA (R'000)	R1 389 913 000
Amount received (R'000)	R1 389 913,000
Reasons if amount as per DORA was not received	n/a
Amount spent by the Department (R'000)	R1 389 913,000
Reasons for the funds unspent by the Entity	n/a
Reasons for deviations on performance	n/a
Measures taken to improve performance	<p>100% budget allocated spent however, on-going improvement measures further implemented to maintain successful performance.</p> <ul style="list-style-type: none"> <li>Ensure proper training of staff and frequently monitoring of data</li> <li>Encourage Project Leaders to capture correct data and frequently update PMIS and use PMIS only as source when reporting</li> <li>Prioritise existing infrastructure over the building of new infrastructure to improve condition and reliability of the existing infrastructure</li> <li>Implementation of plant/equipment three year-servicing contracts has resulted to the improved spending on preventative maintenance</li> <li>Work stoppages on capital projects but managed them through continuous engagements with Project steering committees</li> <li>Establishment of Maintenance spokes in South, West and North areas</li> </ul>
Monitoring mechanism by the receiving Department	<ul style="list-style-type: none"> <li>The management and procurement of all projects funded through this grant must follow the prescripts of the infrastructure delivery management system and framework for infrastructure procurement and delivery management</li> <li>Provincial departments of health must enter into a service delivery agreement with their implementing agents</li> <li>Appropriately qualified built environment representatives from the provincial departments' infrastructure units must assist in the procurement of professional service providers and contractors by its implementing agent, through representation as a member on the specification, evaluation and adjudication committees of the implementing agent</li> <li>New facilities will only be funded from the grant if proof of operational budget that includes the approved organisational structure (stuff structure) is submitted prior to the approval of the clinical brief. Endorsement of the operational budget by the provincial treasury will have to be acquired as part of the approval process.</li> </ul>

## Donor Funds

### Donor Funds Received

TABLE 10: DONOR FUNDS RECEIVED

Astra Zeneca (Astra Zeneca Pharm)	
Full amount of the funding	R 196 000
Period of the commitment	Not specified.

## 2022/23 ANNUAL REPORT

Purpose of the funding	Drug Trials
Expected outputs	Drug Trials
Actual outputs achieved	The project is still in progress.
Amount carried over (R'000)	R26
Amount spent by the Department (R'000)	R0
Reasons for the funds unspent	The project is still in progress.
Monitoring mechanism by the Donor	Not specified.
Conforth investments	
Full amount of the funding	R 151 000
Period of the commitment	Not specified.
Purpose of the funding	Improvement of the infection control unit in ward A4.
Expected outputs	Installation of access control doors and purchasing of furniture in the Haematology Department.
Actual outputs achieved	Installations of 2 access control doors and additional seating for patients in ward A4 west.
Amount carried over (R'000)	R 33
Amount spent by the Department (R'000)	Nil
Reasons for the funds unspent	There has been challenges in locating the Donor, however the balance of the funds will be utilised within the same department.
Monitoring mechanism by the Donor	None
Impumelelo Trust Innovation:	
Full amount of the funding	R 24 000
Period of the commitment	Not specified
Purpose of the funding	Training programmes for HIV and AIDS
Expected outputs	Prize money to be spent on HIV/AIDS related project
Actual outputs achieved	None
Amount carried over (R'000)	R 24
Amount spent by the Department (R'000)	R 0
Reasons for the funds unspent	The project is still in progress and will be finalised in 2023/24.
Monitoring mechanism by the Donor	None.

## PROGRAMME 1 - ADMINISTRATION

### Programme Description & Purpose

Conduct the strategic management and overall administration of the Department of Health.

There are no changes to the Programme 1 structure.

*Sub-Programme 1.1: Office of the Member of the Executive Council (MEC)*

Render advisory, secretarial and administrative support, and public relations, communication and parliamentary support

*Sub-Programme 1.2: Management*

Policy formulation, overall leadership, management and administration support of the Department and the respective districts and institutions within the Department.

### Outcomes for the year under review

- Universal Health Coverage

### Outcomes, outputs, output indicators, Targets and actual achievements

The positive performance in the Professional Nurses and Medical Officers per 100 000 population occurred as a result of the nurses employed on contract during the Coronavirus Disease of 2019 (COVID-19) pandemic and the allocation of Community Service Medical Practitioners and Medical Interns, respectively. The training on "Accruals" and "Payables Not Recognised" that was conducted in August and September 2022 and the District Financial Roadshows conducted in March 2023 resulted in the improvement in the processing of payments.

## 2022/23 ANNUAL REPORT

TABLE 12: OUTCOME INDICATORS (PROGRAMME 1)

APP 2022/23: Page 124 : Table 23						
Outcome Indicator	Data source	Actual 2021/22	Target 2022/23	Actual 2022/23	Deviation from Planned 2022/23 Target	Comment on Deviation
<b>OUTCOME: UNIVERSAL HEALTH COVERAGE</b>						
Audit opinion of Provincial DoH	Annual Reports	Qualified	Unqualified	Unqualified	Achieved	No deviation
Contingent liability of medico-legal cases	Medico-legal case management system	R 27 815 450 163.36	R 28 450 000 000	R 29 444 363 341.92	(3.5%)	<ul style="list-style-type: none"> <li>•No system for archiving files due to challenges at Department of Justice.</li> <li>•There are still delays in the finalising of cases due to various factors including investigations and delays in court proceedings.</li> </ul>
UHC Service Index	SAHR	59%	73.3%	59%	(19.5%)	A wide variation in the range of values by province and by district is noted across the different tracers included in the index. This is an indication of the targets not met in the respective "tracers" in this indicator, largely informed by Programme 2.
Professional nurses per 100 000 population	Manual calculation	167.6/100 000	152.5/100 000	160/100 000	4.9%	Positive performance as a result of the 1 016 Nurses employed on contract during the Coronavirus Disease of 2019 (COVID-19) pandemic.
<i>Professional Nurses</i>	<i>Persal</i>	19 384	17 816	18 693		
<i>Population</i>	<i>Stats SA</i>	11 563 185	11 683 165	11 683 165		
Medical officers per 100 000 population	Manual calculation	35.1/100 000	27.4/100 000	33.7/100 000	23%	The Department had an increased allocation of Community Service Medical Practitioners (282) and Medical Interns (1 117).
<i>Medical Officers</i>	<i>Persal</i>	4 058	3 201	3 938		
<i>Population</i>	<i>Stats SA</i>	11 563 185	11 683 165	11 683 165

### Strategies to overcome areas of under-performance

- The Department embarked on a project to archive files, as a strategy to reduce the contingent liability
- Adapting the Universal Health Coverage (UHC) Service Index to allow maximal use of routine data and disaggregation will allow progress to be tracked, equity to be monitored, and the need for remedial action to be identified
- The recruitment process is underway to fill Community Health Worker (CHW) vacancies in 2023-24
- Implementation of alternative connectivity strategy at institutions, in order to address delays in the roll-out of the eHealth system, is ongoing
- The Department has a plan to utilise Mobile telephone Networks (MTN) services in those areas without Vodacom coverage

## PROGRAMME 2 - DISTRICT HEALTH SERVICES

### Programme Description & Purpose

There are no changes to the structure of Programme 2.

#### Programme Purpose

To render Primary Health Care and District Hospital Services.

#### Sub-Programmes

##### *Sub-Programme 2.1: District Management*

Planning and administration of health services; manage personnel and financial administration; co-ordination and management of Day Hospital Organisation and Community Health Services rendered by Local Authorities and Non-Governmental Organisations within the Metro; determine working methods and procedures and exercising district control.

##### *Sub-Programme 2.2: Community Health Clinics*

Render a nurse driven Primary Health Care service at clinic level including visiting points, mobile and local authority clinics.

##### *Sub-Programme 2.3: Community Health Centres*

Render primary health services with full-time Medical Officers in respect of mother and child, health promotion, geriatrics, occupational therapy, physiotherapy, and psychiatry.

##### *Sub-Programme 2.4: Community-Based Service*

Render a community-based health service at non-health facilities in respect of home-based care, abuse victims, mental and chronic care, school health, etc.

##### *Sub-Programme 2.5: Other Community Services*

Render environmental, port health and part-time district surgeon services, etc.

##### *Sub-Programme 2.6: HIV and AIDS*

Render a primary health care service in respect of HIV and AIDS campaigns and special projects.

##### *Sub-Programme 2.7: Nutrition*

Render nutrition services aimed at specific target groups and combines nutrition specific and nutrition sensitive interventions to address malnutrition.

# 2022/23 ANNUAL REPORT

---

## *Sub-Programme 2.8: Coroner Services*

Render forensic & medico legal services to establish the circumstances and causes of unnatural death

## *Sub-Programme 2.9: District Hospitals*

Render hospital services at General Practitioner level.

## Outcomes for the year under review

- Universal Health Coverage
- Improved Patient Experience of Care
- Reduced Morbidity and Mortality

## Outcomes, outputs, output indicators, Targets and actual achievements

### Primary Health Care

The implementation of the quality improvement programme yielded positive results in terms of Ideal clinic status obtained. Adherence to Patient Safety Incidents (PSI) Guidelines through monitoring, and feedback engagements with service delivery components resulted to the target being exceeded by 45%. A one % decline in the Patient Experience of Care satisfaction rate is attributed to responded negatively on access to services in particular the referral pathway, and the attitude of staff at Community Health Centres.

Positive results achieved through the implementation of the full package of services post pandemic; and Districts conducting community screening activities and referring clients to clinics for investigations, resulted to improved PHC utilization rate. Inflation on goods and services and energy costs that outperformed inflation, resulted to a higher than planned cost per headcount, even though it was still lower than the baseline. Unreliable connectivity is one of the reasons for delayed actual capturing of patient safety incidents, resulting to the underreporting of the Severity assessment code (SAC) 1 incidents .

### District hospitals

Adherence by Clinical Governance Committees to the meeting schedule to address incidents timeously as well as meet on demand when the need arises resulted to a three percent increase in the Patient Safety Incident case closure rate. The number of Maternal deaths in facility was lower than the target due to reduction of COVID-19 – related deaths and the continuing evaluation of minimum caesarean standards. Clinical support and effective referral pathways contributed to the reduction in inpatient deaths under 5 years. Oral rehydration corners in every clinic and Community Health Centre contributed to the reduction in deaths.

## 2022/23 ANNUAL REPORT

---

Reduction in Child under 5 years pneumonia case fatality rate is attributed to improved referral systems and access to oxygen contributed to the reduced mortality rate. The child under 5 years severe acute malnutrition rate decreased by eight percent despite the challenges which include; poorly skilled mothers in child feeding practices, food insecurity due to poverty, co-morbid conditions (Cerebral palsy, cardiac conditions, and TB & HIV), and late diagnosis and presentation of acute malnutrition cases. Late presentation to health facilities by clients and the high rate of infections like syphilis during pregnancy and uncontrolled hypertension disorders are the factors that contributed to the target not being met.

Improved clinical management of patients, resumption of the district hospital integrated package of services and increased patient activity resulted to achievement of average length of stay, bed utilisation rate and expenditure per patient day equivalent. The non-achievement of the Out-Patient Department (OPD) headcount new cases not referred is attributed to the absence of a gateway clinic at some hospitals.

### HAST

Late presentation, TB and HIV co-infection with other co-morbidity and the high loss to follow up rates remain the leading causes of the high death rate. The target for the All DS-TB client treatment success rate was not achieved despite the improvement against the baseline. The non-achievement of the All DS-TB client treatment success rate target is as a result of high loss to follow up which is fuelled by duplicates, unevaluated patients and to some extent death rate. The initiation of a high number of clients on Tenofovir disoproxil, lamivudine and dolutegravir (TLD) transition played an important part in the achievement of viral load suppression in adults. The HIV positive 15-24 year olds (excluding ANC) rate decreased due to the implementation of prevention programmes like Pre-Exposure Prophylaxis (PrEP), provision of condoms, education through mass media, increased community mobilisation aimed at reducing HIV and TB infections and increasing positive sexual behaviour by individuals. Facility and community HIV testing through outreach and community events conducted by the Department and Partners resulted to the target for the number of HIV tests done indicator being exceeded.

### **Maternal, Neonatal, Child & Women's Health & Nutrition**

The reduction in the number of maternal deaths from COVID-19 with the implementation of the COVID-19 vaccination programme. Evaluation of minimum standards continues. Onsite Midwife-led Birth Units (OMBUs) established at Newcastle and Prince Mshiyeni Memorial Hospitals. Neonatal death in facility rate decreased due to increased coverage of key interventions such as Kangaroo Mother Care (KMC); therapeutic hypothermia; ventilation; continuous positive airways pressure (CPAP) support. The implementation of strategies to

## 2022/23 ANNUAL REPORT

---

monitor Ante-Natal Care (ANC) early booking and initiation of HIV positive and breastfeeding women, to reduce high viral load resulted to positive performance in infant Polymerase Chain Reaction (PCR) test positive around 10 weeks.

The number of inpatient deaths under 5 years decreased due to Promotion of neonatal interventions including early breastfeeding initiation and rooming-in, implementation of primary health care programmes and provision of paediatric respiratory support in all hospitals across the province. Increased coverage and uptake of pneumococcal vaccines reduced pneumonia cases. Implementation of catch-up drives, ongoing routine services and data monitoring for action, resulted to the achievement of the immunisation under 1 year coverage. Vitamin A issued routinely at community level coupled with inclusion of Vitamin A for the measles campaign contributed significantly to the improvement of the Vitamin A dose 12-59 months coverage.

### Disease Prevention and Control

The number of deaths due to COVID-19 has decreased as a result of individuals choosing to vaccinate. Most deaths occurred among individuals with co-morbid conditions and the unvaccinated. Intensified focus on screening following the training of clinic staff by Mental Health Co-ordinators resulted to the achievement of the mental disorders screening rate. A high demand for rehabilitation services was noted from new and existing clients who were seen for review and continuation of rehabilitation services.

	Case management	All districts (eThekweni, Ugu, Harry Gwala, uMgungundlovu, Uthukela, Amajuba, Umzinyathi, Zululand, Ilembe, Umkhanyakude and King Cetshwayo	68922	N/A			COVID-19 Case Fatality Rate: Total	Reduction of morbidity and mortality due to COVID-19

# 2022/23 ANNUAL REPORT

---

## Strategies to overcome areas of under-reporting

### Primary Health Care

- Improve communication by conducting Open Days to educate clients on referral pathways.
- Engage Community Structures to assist in the communication and education of clients.
- Conduct Batho Pele workshops to engage staff on their attitudes and responsibilities to clients.
- Implementation of cost containment measures without compromising service delivery.
- Convene a Provincial Indaba to capacitate relevant stakeholders on PSI guidelines to enhance understanding of roles, responsibilities, data flow, recording and reporting processes.
- Discussions with the Office of Health Standards Compliance to identify alternate platforms where reporting can be accepted even when capturing cannot be done immediately due to various reasons. Discussions also include review of definitions related to capturing vs reporting/notification.

### District Hospitals

- Conduct Batho Pele workshops to engage staff on their attitudes and responsibilities to clients.
- Engage facilities to develop norms and standards on all Batho Pele principles.
- A joint implementation plan with Department of Social Development to Manage Malnutrition has been developed and implemented.
- Early identification of malnutrition cases in Phila Mntwana centres
- The province has developed a food security plan coordinated jointly with the Office of The Premier.
- Monitor the uptake of online inpatient management of severe acute malnutrition course.
- Have developed and distributed SOPs to guide management of malnutrition.
- Conduct community awareness engagements that emphasise early antenatal care booking allowing health care facilities to identify and treat conditions in time before delivery.
- Monitor adherence to clinical protocols for the management of hypertension
- Review protocols on screening for syphilis in pregnancy to allow earlier detection and treatment.
- Implement Dual Syphilis and Human Immunodeficiency Virus (HIV) test to hasten test and treat at antenatal care level.
- Conduct Essential Steps in Management of Obstetric Emergencies (ESMOE) master trainers to sustain local trainers' course.
- The department is exploring existing survey results related to why clients bypass PHC. A synthetic analysis of these will be done to determine reasons and then plan focused interventions.
- Medical Officers have been appointed to Clinics.

## 2022/23 ANNUAL REPORT

---

- These Districts to develop strategies to reduce Out-Patient Department (OPD) new cases not referred through assessing issues of accessibility, service times, etc.
- Convene a Provincial Indaba to capacitate relevant stakeholders on PSI guidelines to enhance understanding of roles, responsibilities, data flow, recording and reporting processes.

### HAST

- Co-ordinate the promotion of the Tuberculosis (TB) self-screening application targeting people living with HIV to improve early detection of TB.
- Coordinate the development and implementation of the standardised DS-TB mortality tool with partners.
- Monitor monthly implementation of the targeted universal TB testing Standard Operating Procedure (SOP) to detect and treat TB early.
- Monitor implementation of the adherence guidelines
- Continue to monitor implementation and uptake of lipoarabinomannan (ULAM) to improve early detection of TB amongst HIV positive patients.
- Continue to conduct Community awareness campaigns on importance of early detection of TB and adherence to treatment.
- Coordinate community awareness campaigns on importance of adherence to treatment.
- Market through social media the implementation of the TB self-screening App and monitor implementation.
- Implement eHealth information system and technology which will address patient file management and patient duplicates.
- Monitor the implementation of the integrated adherence guidelines.
- Engage districts to promote integrated community tracking and tracing of early and late missed appointments by all outreach teams.
- Monitor the actioning of early and missed appointment lists during Operation Phuthuma visits.
- Collaborate revival of support groups for People Living with HIV with stakeholders to improve treatment adherence and peer treatment support.
- Accelerate enhanced adherence counselling with detailed individual plans, especially following adherence guidelines (AGL) Provincial engagement update.
- Facilitate implementation of Case management strategy to recognize early warning signs of defaulting.
- Conduct Operation Mbo in iLembe and eThekweni to conduct data clean up.
- Rollout the Dolutegravir (HIV treatment) in children to improve viral suppression.
- Capacitate facility health care workers on revised 2023 disclosure guidelines through regional workshops.
- Monitor and support treatment literacy classes for the older children and care givers.
- Promote use of the integrated screening, testing and early treatment for HIV.
- Facilitate implementation of integrated HIV/TB facility mortality audits and share findings with service delivery platform.

## 2022/23 ANNUAL REPORT

---

- Facilitate inclusion of ART deaths at 6 months feedback reporting in the sub-district Nerve Centre meetings.
- Engage District Coordinators to monitor and action Electronic Drug Resistant Web-Based (EDRWEB) Tuberculosis Register dashboard to decrease unevaluated rate to 0%.
- Develop and facilitate implementation of the Drug-Resistant TB (DRTB) Linkage to care SOP.
- Coordinate Clinical update on DRTB management for clinicians, including Primary Health Care (PHC), outreach teams and linkage officers.
- Coordinate training on clinical and mortality updates and monitor implementation to improve DRTB management.
- Coordinate targeted Social mobilisations on importance of adherence to treatment, TB and Anti-Retro-Virals (ARVs).
- Monitor in collaboration with HAST the implementation of the Adherence Guidelines.
- Monitor implementation of the targeted universal TB Testing.
- Procure digital x-rays for Districts not supported by partners to find early TB cases and reduce the spread of TB
- Conduct community awareness to encourage early health seeking behaviour.
- Promote use of the integrated screening, testing and early treatment of HIV.
- Facilitate implementation of integrated HIV/TB facility mortality audits and share findings with service delivery platform.
- Facilitate inclusion of ART deaths at 6 months feedback reporting in the sub-district Nerve Centre meetings.
- Continue to engage National Department of Health (NDOH) with the cleaning of duplicate files.
- Monitor implementation of the integrated adherence counselling material.
- Coordinate community awareness campaigns on importance of adherence to treatment.
- Collaborate revival of support groups for People Living with HIV with stakeholders especially Office of the Premier (sector engagements) and Social Development. The support group platform assists with ensuring treatment adherence.
- Accelerate enhanced adherence counselling with detailed individual plans, especially following adherence guidelines (AGL) Provincial engagement update.
- Facilitate implementation of Case management strategy to recognize early warning signs of defaulting.
- Conduct facility based paediatric capacity building workshops covering clinical management, Psychosocial and Mental Health support.
- Revive support groups for older children and care givers to promote treatment adherence.
- Collaborate with civil society, Department Social Development and Department of Education to create a platform to reach children to test and treat HIV and promote treatment adherence.
- Data management submitted printing requests for tools to Supply Chain Management and distribution will be done on receipt of the tools.
- Continue to conduct desktop analysis and engage districts on gaps.

## 2022/23 ANNUAL REPORT

### Linking performance with budget

## PROGRAMME 3 - EMERGENCY MEDICAL SERVICES

### Programme Description & Purpose

Rendering pre-hospital Emergency Medical Services, including Inter-hospital Transfers and Planned Patient Transport

The previous structure included Sub-Programme 3.3: Disaster Management which is a Municipal function.

#### *Sub-Programme 3.1: Emergency Transport*

Render Emergency Medical Services including Ambulance Services, Special Operations, and Communication and Air Ambulance services.

#### *Sub-Programme 3.2: Planned Patient Transport*

Render Planned Patient Transport including Local Outpatient Transport (within the boundaries of a given town or local area) and Inter-City/Town Outpatient Transport (Into referral centres).

### Outcomes for the year under review

- Universal Health Coverage

### Outcomes, outputs, output indicators, Targets and actual achievements

Factors influencing the decline in performance include insufficient base infrastructure, limited operational ambulances, inadequate staff complement, especially intermediate and advanced life support paramedics, and increased demand for inter-facility transfers. Exorbitant overtime expenditure for compulsory overtime resulting in lower budget available for voluntary overtime therefore operational ambulance schedule cannot be maintained.

## 2022/23 ANNUAL REPORT

TABLE 27: OUTPUT PERFORMANCE INDICATORS AND MTEF TARGETS (EMS)

APP 2022/23: Page 166 : Table 47						
Output	Output Indicator	Actual 2021/22	Target 2022/23	Actual 2022/23	Deviation from Planned 2022/23 Target	Comment on Deviation
<i>OUTCOME: UNIVERSAL HEALTH COVERAGE</i>						
EMS P1 response in urban areas under 30 minutes	EMS P1 urban response under 30 minutes rate	42.9%	56.3%	41.9%	(34.5%)	<ul style="list-style-type: none"> <li>• <b>Influencing factors include</b> insufficient base infrastructure, limited operational ambulances, inadequate staff complement especially intermediate and advanced life support paramedics, and increased demand for inter-facility transfers.</li> <li>• <b>Exorbitant overtime</b> expenditure for compulsory overtime resulting in lower budget available for voluntary overtime therefore operational ambulance schedule cannot be maintained.</li> </ul>
	<i>EMS P1 urban response under 30 minutes</i>	44 726	79 956	39 676		
	<i>EMS P1 urban responses</i>	104 286	142 020	94 781		
EMS P1 response in rural areas under 60 minutes	EMS P1 rural response under 60 minutes rate	51.1%	69.1%	48.2%	(43.5%)	<ul style="list-style-type: none"> <li>• <b>Influencing factors include</b> insufficient base infrastructure, limited operational ambulances, inadequate staff complement especially intermediate and advanced life</li> </ul>
	<i>EMS P1 rural response under 60 minutes</i>	74 251	127 052	70 063		

## 2022/23 ANNUAL REPORT

APP 2022/23: Page 166 : Table 47

Output	Output Indicator	Actual 2021/22	Target 2022/23	Actual 2022/23	Deviation from Planned 2022/23 Target	Comment on Deviation
	EMS P1 rural responses	145 328	183 871	145 497		support paramedics, and increased demand for inter-facility transfers. • <b>Exorbitant overtime</b> expenditure for compulsory overtime resulting in lower budget available for voluntary overtime therefore operational ambulance schedule cannot be maintained.

### Strategies to overcome areas of under-performance

- Identify satellite bases that are strategically placed.
- Allocation of infrastructure budget to increase number of customized built bases.
- EMS operational staff roster and working hours to be revised in order to reduce the compulsory overtime expenditure. If this is achieved, Emergency Medical Services (EMS) will have budget for voluntary overtime as well as employing of new staff to ensure the operational schedule is achieved.

## 2022/23 ANNUAL REPORT

## PROGRAMME 4 – PROVINCIAL HOSPITAL SERVICES (REGIONAL AND SPECIALISED)

### Programme Description & Purpose

#### Programme Purpose

Deliver hospital services which are accessible, appropriate, and effective and provide general specialist services, including specialized rehabilitation service, as well as a platform for training health professionals and research. *There are no changes to the Programme 4 structure.*

#### *Sub-Programme 4.1: General (Regional) Hospitals*

Render hospital services at a general specialist level and provides a platform for training of health workers and research.

#### *Sub-Programme 4.2: Tuberculosis Hospitals*

Convert present Tuberculosis hospitals into strategically placed centres of excellence. TB centres of excellence will admit patients with complicated TB requiring isolation for public protection and specialised clinical management in the intensive phase of treatment to improve clinical outcomes. This strategy will reduce operational costs in the long term.

#### *Sub-Programme 4.3: Psychiatric/Mental Hospitals*

Render a specialist psychiatric hospital service for people with mental illness and intellectual disability and provide a platform for the training of health workers and research.

#### *Sub-Programme 4.4: Sub-Acute, Step down and Chronic Medical Hospitals*

Provide medium to long term care to patients who require rehabilitation and/or a minimum degree of active medical care but cannot be sent home. These patients are often unable to access ambulatory care at our services or their socio-economic or family circumstances do not allow for them to be cared for at home.

#### *Sub-Programme 4.5: Dental Training Hospital*

Render an affordable and comprehensive oral health service and training, based on the primary health care approach.

### Outcomes for the year under review

- Universal Health Coverage
- Improved Patient Experience of Care
- Reduced Morbidity and Mortality

## 2022/23 ANNUAL REPORT

---

### Outcomes, outputs, output indicators, Targets and actual achievements

#### Regional Hospitals

The improvement in the Patient Safety Incident (PSI) case closure rate is attributed to the PSI management committees meeting according to schedule and on demand to investigate and close cases where possible. Minimum standards for caesarean section safety implementation played a role in reducing maternal deaths. The decrease in child deaths is mainly due to paediatric respiratory support provided in all hospitals and the Implementation of Essential Packages of Care.

#### Specialised TB Hospitals

The decrease in the average length of stay is due to the decentralised TB management regimen and improved ART coverage.

#### Specialised Psychiatric Hospitals

The Patient Safety Incident (PSI) case closure rate increased from the baseline and the target was exceeded by 3.5 percent, as a result of functional governance structures that convene regularly to discuss and close incidents timeously.

#### Chronic/Sub-Acute Hospitals

There were no Severity assessment code (SAC) 1 incident reported for Chronic/Sub-Acute Hospitals.

## 2022/23 ANNUAL REPORT

## Strategies to overcome areas of under-reporting

### Regional Hospitals

- Engage Districts to develop systems that will keep clients informed of expected waiting times in all services at facilities.
- Conduct Batho Pele workshops to engage staff on their attitudes and responsibilities to clients.
- Pursue the development of additional paediatric critical care services.
- Bottleneck analysis and action plan to reduce malnutrition in the highly burden eThekweni metro is planned with the support of NDoH and United Nations Children's Fund
- Support Umzinyathi in the scaling up of family Mid-Upper Arm Circumference (MUAC) concept for early identification of at risk individuals.
- Implement new strategies at PHC level: Dual syphilis and HIV test at PHC antenatal care to improve test and treat; disseminate circular on syphilis to all districts for implementation.
- Commission the balance of mental health beds at King Dinuzulu Hospital.
- Engage Health Facilities Management to provide assistance to Townhill Hospital to fast-track infrastructure renovations.
- Motivate for filling of theatre posts to improve theatre time availability
- Use roving team of theatre staff to improve theatre utilisation capacity.
- Reprioritise 2023/24 budget and fill critical posts.
- Request budget allocation according to service needs.
- Monitor the cost drivers and implement cost saving measures without compromising on service delivery.
- Provincial review of the service platform and 24-hour access to services.
- Provincialisation of municipality clinics in eThekweni District.
- Convene a Provincial Indaba to capacitate relevant stakeholders on Patient Safety Incidents (PSI) guidelines to enhance understanding of roles, responsibilities, data flow, recording and reporting processes.

# 2022/23 ANNUAL REPORT

---

## Specialised TB Hospitals

- Engage Districts to develop systems that will keep clients informed of expected waiting times in all services at facilities.
- Conduct Batho Pele workshops to engage staff on their attitudes and responsibilities to clients.
- Conduct an investigation to determine the reasons for the low score on Patient Safety.
- Improve TB screening and TB case finding using community outreach teams and community health worker programme.
- Establish active TB case finding at all levels of care especially in patients with comorbidity.
- Facilitate merger of Doris Goodwin and Harry Gwala Hospital.
- Implementation of the hospital rationalization plan is in progress:
- TB beds are being repurposed.
- Commissioning of district services in Richmond Hospital.
- St Margaret Hospital is providing PHC services.
- Convene a Provincial Indaba to capacitate relevant stakeholders on PSI guidelines to enhance understanding of roles, responsibilities, data flow, recording and reporting processes.

## Specialised Psychiatric Hospitals

- Conduct Mental Health Indaba in order to devise new strategies for community integration of mental health care users.
- Expedite renovations at Townhill Hospital.
- Bed capacity review
- Townhill Hospital to provide specialist coverage at UMzimkhulu Hospital. Filling of vacant Medical Officers posts at UMzimkhulu Hospital expedited
- Adherence to referral guidelines.

## 2022/23 ANNUAL REPORT

### Chronic/Sub-Acute Hospitals

- Commission district services.

There were no Severity assessment code (SAC) 1 incident reported for Chronic/Sub-Acute Hospitals.

### Linking performance with budget

## PROGRAMME 5 – CENTRAL AND TERTIARY HOSPITALS

### Programme Description & Purpose

#### Programme Purpose

To provide tertiary health services and create a platform for training of health professionals

*There are no changes to the structure of Programme 5.*

#### Sub-Programmes

##### *Sub-Programme 5.1: Central Hospital Services*

Render highly specialised medical health tertiary and quaternary services on a national basis and serve as platform for the training of health workers and research.

##### *Sub-Programme 5.2: Provincial Tertiary Hospital Services*

To provide tertiary health services and creates a platform for the training of Specialist Health Professionals.

### Outcomes for the year under review

- Universal Health Coverage
- Improved Patient Experience of Care
- Reduced Morbidity and Mortality

### Outcomes, outputs, output indicators, Targets and actual achievements

#### Tertiary Hospitals

The target for the patient experience of care satisfaction rate indicator was exceeded by 1, 4 percent, even though the performance was lower than the baseline. The improvement in the Patient Safety Incident (PSI) case closure rate is attributed to the effectiveness of the governance structures. The implementation of the COVID-19 vaccine programme and minimum standards for caesarean section safety contributed toward the reduction of maternal deaths. The implementation of the water, sanitation, and hygiene (WASH) programmes resulted in a decline in the number of cases admitted to tertiary hospitals for management.

#### Central Hospitals

The number of maternal deaths decreased by 30 percent compared to the baseline. This is because of the continued training on the Essential Steps in the Management of Obstetric Emergencies (ESMOE) and implementation of the vaccination programme for pregnant

## 2022/23 ANNUAL REPORT

---

women against COVID-19. There has been continuous training on Severe Acute Malnutrition (SAM) protocol to foster better implementation on the management of SAM.

---

## Strategies to overcome areas of under-reporting

### Tertiary Hospitals

- In addition to neonatal interventions, maintain primary health care programmes and strengthen paediatric respiratory support in all hospitals across the province.
- Pursue the development of additional paediatric critical care services.
- Continue to support IMCI training to encourage early case detection and early referral of high-risk cases.
- Implementation of the dual syphilis and HIV test to improve test and treat, and of the circular on syphilis at tertiary level.
- Appoint roving team of theatre specialists (nurses and doctors) to assist with surgical backlogs.
- Fill critical posts and implement tertiary package of services.
- Revisit triaging system at Ngwelezane Hospital
- Review referral pathway for eThekweni District for alignment with services at the Dr Pixley Ka Isaka Seme Memorial Hospital.

### Central Hospitals

- Improve communication by conducting Open Days to educate clients on access to services and waiting times.
- Display notices on services rendered at this level of care.
- Conduct Batho Pele workshops to engage staff on their attitudes and responsibilities to clients.
- Explore development of additional paediatric critical care services.
- Establish improved respiratory support systems, nasal continuous positive airway pressure (nCPAP) and high flow nasal cannula (HFNC) in all district and regional hospitals.
- Monitor performance and clinical management.
- Replace critical staff subject to budget availability and improve access to services.
- Review target in line with Provincial characteristics and benchmark with other Provinces.
- Develop and implement plan to improve theatre use.

## PROGRAMME 6 - HEALTH SCIENCES AND TRAINING

### Programme Description & Purpose

Render training and development opportunities for actual and potential employees of the Department of Health.

*There are no changes to the structure of Programme 6.*

#### *Sub-Programme 6.1: Nurse Training Colleges*

Train nurses at undergraduate and post-basic level. Target group includes actual and potential employees.

#### *Sub-Programme 6.2: EMS Training Colleges*

Train rescue and ambulance personnel. Target group includes actual and potential employees.

#### *Sub-Programme 6.3: Bursaries*

Provision of bursaries for health science training programmes at under- and postgraduate levels targeting actual and potential employees

#### *Sub-Programme 6.4: Primary Health Care Training*

Provision of bursaries for health science training programmes at under-and postgraduate levels, targeting actual and potential employees

#### *Sub-Programme 6.5: Training Other*

Provision of skills development programmes for all occupational categories in the Department. Target group includes actual and potential employees.

### Outcomes for the year under review

- Universal Health Coverage

### Outcomes, outputs, output indicators, Targets and actual achievements

The change from a 4-year to 3-year programme allowed for an increase in the number of students. The re-direction of funds from the Republic of South Africa (RSA)-Cuban Medical

## 2022/23 ANNUAL REPORT

---

Programme to internal bursaries resulted to the target for number of internal employees awarded bursaries being exceeded.

## PROGRAMME 7 - HEALTH CARE SUPPORT SERVICES

### Programme Description & Purpose

To render support services required by the Department to realise its aims.

*There are no changes to the structure of Programme 7.*

#### *Sub-Programme 7.1: Medicine Trading Account*

To Render Pharmaceutical services to the Department. Manage the supply of pharmaceuticals and medical sundries to hospitals, Community Health Centres and local authorities via the Medicine Trading Account.

#### *Sub-Programme 7.2: Laundry Services*

Render laundry services to hospitals, care and rehabilitation centres and certain local authorities.

#### *Sub-Programme 7.3: Orthotic and Prosthetic Services*

Render specialised orthotic and prosthetic services.

### Outcomes for the year under review

- Universal Health Coverage

### Outcomes, outputs, output indicators, Targets and actual achievements

The number of facilities reporting clean linen stock outs in the reporting period reduced. This is attributed to improved data collection methods, remunerative overtime used to reduce accumulated soiled linen backlogs, outsourcing by facilities to private laundries when in-house capacity is constrained and increased laundry machine capacity at Regional Laundry Northern Natal (Dundee). Follow up on suppliers with overdue orders and maintaining stock piling towards the end of the contract to mitigate for stock outs during the transition between contracts resulted to treatment stock-outs of less than five percent.

## PROGRAMME 8 - HEALTH FACILITIES MANAGEMENT

### Programme Description & Purpose

Provision of new health facilities and the refurbishment, upgrading and maintenance of existing health facilities

*There are no changes to the structure of Programme 8.*

#### *Sub-Programme 8.1: Community Health Facilities*

Construction of new facilities and refurbishment, upgrading and maintenance of existing Community Health Centres and Primary Health Care clinics and facilities

#### *Sub-Programme 8.2: District Hospital Services*

Construction of new facilities and refurbishment, upgrading and maintenance of existing District Hospitals

#### *Sub-Programme 8.3: Emergency Medical Rescue Services*

Construction of new facilities and refurbishment, upgrading and maintenance of existing EMS facilities

#### *Sub-Programme 8.4: Provincial Hospital Services*

Construction of new facilities and refurbishment, upgrading and maintenance of existing Provincial/ Regional Hospitals and Specialised Hospitals

#### *Sub-Programme 8.5: Central Hospital Services*

Construction of new facilities and refurbishment, upgrading and maintenance of existing Tertiary and Central Hospitals

#### *Sub-Programme 8.6: Other Facilities*

Construction of new facilities and refurbishment, upgrading and maintenance of other health facilities including forensic pathology facilities and nursing colleges and schools

### Outcomes for the year under review

- Universal Health Coverage

### Outcomes, outputs, output indicators, Targets and actual achievements

The targets for percentage of health facilities with completed capital infrastructure projects and number of upgrade and addition projects completed were exceeded due to the storm

## 2022/23 ANNUAL REPORT

## Risk Management

The Department has an approved Risk Management Policy, Risk Appetite Statement, Risk Management Strategy and Implementation (Action) Plan. Furthermore, the Department has an approved Business Continuity Management Policy and Terms of Reference.

The Department conducts regular risk assessments at a strategic and operational level. Progress on implementation of the Action Plan is reported to the Management Committee and the Risk Management Committee on a monthly and quarterly basis, respectively.

The Department has a functional Risk Management Committee (RMC) comprising of internal officials with the Head of Department serving as the Chairperson. The RMC executes its mandate in terms of the approved Risk Management Charter and is accountable to the Head of Department. Four Internal Risk Management Committee meetings were held during the 2022/23 financial year.

The focus of the Department's Risk Management Unit has been on supporting the Department to continue to improve its risk management maturity through a programme of activity. In 2022/23 this included:

- Facilitating strategic and operational risk assessments,
- Risk support, advice and training within the business units
- Providing ongoing risk education aimed at enhancing risk awareness and
- E-Learning on Risk Management.

The Department is a member of the Provincial Cluster Audit and Risk Committee, which is also responsible for discharging an oversight role over Risk Management activities. Progress reports on all activities relating to risk management are submitted quarterly to Cluster Audit and Risk Committee through the Provincial Treasury.

There has been some progress in the management of risks, however this has not yet transmitted into significant improvements in the Department's performance as the risk maturity level is still at different levels within the organisation. Measures to improve the situation include changes to the risk management activities which should ensure closer monitoring of risk mitigation by the Accounting Officer and foster greater accountability and ownership at senior management level.

## Fraud and Corruption

The Department has established Directorate: Departmental Investigation Services (DIS) that focuses on two pillars of fraud risk management, namely fraud prevention and investigations;

# 2022/23 ANNUAL REPORT

---

the third element, which is the implementation of corrective actions, is handled by the Department's Labour Relations Office (LRO).

The Department, through its Fraud Prevention Plan and Strategies has adopted proactive measure to prevent risk of fraud and corruption, this include the pre-screening of applicants before an appointment is made and the requirement that all senior management be vetted. In addition, all senior management and designated employees are obliged to disclose their financial interests annually.

The Department provides for a confidential whistle-blowing platform that enables any member of staff and public to report suspected actions of fraud and corruption. The Ethics Office has introduced awareness publications aimed at, amongst other, educating employees on how to identify fraudulent and corrupt behaviour.

The Department has a case management system where all reported and known cases are recorded and monitored. Once a case is reported Departmental Investigations Services performs a preliminary investigation followed by a full investigation where appropriate. In addition, progress in respect of these cases, as well as those that have been referred by the Public Service Commission, through National Anti-Corruption Hot line (NACH), are reported quarterly to the Cluster Audit and Risk Committee (CARC).

## Minimising Conflict of Interest

There are several instances where conflict of interest (direct or perceived) may be prevalent.

1) Conducting business with the State in that officials are registered as Directors/Owners/Members of Companies that are registered on the Central Supplier Database (CSD).

A CSD report is accessed for each potential bidder or service provider who quotes through the procurement processes. If government employee's details are reflected on the CSD report this would be considered a conflict of interest and therefore involvement in such companies is expressly prohibited.

The SBD 4 form which is a supplier business declaration form, is another important tool in managing the conflict of interest in the SCM environment. The SBD 4 form is required to be completed and makes provision for listing of relatives of bidders who are employed by the State. At this point the respective SCM Committee's must exercise due diligence and examine for potential and/or direct conflict of interest.

2) Conflict of interest is also managed through the separation of functions at a SCM Finance and SCM level.

3) Instances of direct conflict as identified through audits and internal control processes are also another source of information. In this regard, once the list is sent to the Ethics Office,

## 2022/23 ANNUAL REPORT

---

communication is addressed to the identified officials reminding them of the provisions of the Regulations and instructing them to deregister the company from CSD or resign as a member/Director of the company and/or resign from Public Service. The Legislation is also clear that the act of conducting business with state is a criminal offence and an offender could be prosecuted accordingly. This is the final step, should officials not show any indication of willingness to comply.

Such cases are then referred to Labour Relations for disciplinary action and if need be to the Departmental Investigations Unit for further investigation with the intention of recovery.

4) The Provincial ORWOPS Committee receives all applications for ORWOPS and makes recommendations to the accounting officer based on the information supplied. Any potential/perceived / actual and direct conflict of interest are highlighted, and such applications are not recommended. This includes a CSD check and any official who has a company listed on CSD, has their application for ORWOPS rejected. A further level of intervention to avoid conflict of interest is the inclusion of an Addendum that the supervisor and CEO signs off, committing to monitoring, reporting and motivating for the revoking of the approved ORWOPS should any conflict of interest and/or compromising of service delivery arise.

5) Conflict of interest in the HRM recruitment and selection space is managed through completion of declarations or recusals.

6) All gifts, sponsorships and donations have to be declared on a monthly basis and the delegation for the acceptance resides with the Accounting Officer. The acceptance process is managed through the Ethics Office and a Donation/Gift/Sponsorship register is maintained. The register is collated and submitted on a monthly basis to the Accounting Officer and to the Finance Office.

7) Conflict of interests are also managed through the process of Financial Disclosure and any potential conflict of interest is addressed when identified.

8) The Department has an approved Policy on Conducting Business with the State which gives effect to the Regulation 13(c) of the Public Service Regulations (PSR), 2016. This Policy outlines the Statutory Mandate and serves to promote ethical behaviour among employees, eradicate and prevent unethical behaviour and reduce possible/perceived and potential conflicts of interest.

9) The Public Service Regulations Chapter 2 which focuses on conduct, financial disclosures, anti-corruption and Ethics Management and the Public Administration Management Act Chapter 3(8) is widely workshopped to all levels of employees in order to bring awareness to possible contraventions. The Department has further developed posters as well as a booklet on Ethics in the Workplace and these are distributed to all facilities and available on the intranet for downloading.

10) The Department has a Whistleblowing Policy which takes cognisance of the fact that every employer and employee has a responsibility to disclose criminal and/or any other irregular conduct in the workplace. This Policy provides users with the various avenues in which misconduct/fraud/irregular conduct can be reported anonymously.

# 2022/23 ANNUAL REPORT

---

11) The Department has an approved Fraud Prevention Plan which is the cornerstone of all fraud prevention enablers that exists to support the implementation of fraud risk management at both strategic and operational levels in the Department.

12) In 2020/21, the Director-General: DPSA approved the Framework and Strategy for implementing Lifestyle Audits in the Public Service and as of 1st April 2021 Lifestyle Audits became compulsory for all National and Provincial Departments. Departments are expected to conduct Lifestyle Audits guided by Regulation 22 of the Public Service Act, 1993. Departments follow a risk-based approach in order for it to be a legitimate fraud prevention and detection mechanism.

Furthermore, the DPSA, August 2018, developed a guide on the reporting of unethical conduct, corruption and non-compliance to the Public Service Act, 1994 and the Public Service Regulations, 2016 in the Public Service.

## Code of Conduct

Section 195 of the Constitution of the Republic of South Africa outlines the democratic values and principles governing the Public Administration.

The Public Service Code of Conduct is directional in nature and is the standard of behaviour that is expected from all public servants.

As such a breach of the Code of conduct is dealt with via the progressive disciplinary process depending on the nature of misconduct. Progressive discipline allows the supervisor/ manager to meet out consequence management, depending on the nature of the misconduct, and ranges from counselling up to dismissal.

The Department has developed a Code of Ethical Conduct handbook for employees which is informed by the Legislative framework governing the Public Service, the Code of Conduct for the Public Service, the Batho Pele Principles and the Integrity Management Framework for the Public Service amongst others. The principles of ethics and good conduct in the workplace which are outlined in the handbook seeks to promote an ethical Organisational Culture.

The Department has implemented a standardised employee Induction and Orientation programme which is being rolled out in all Districts for all newly appointed employees. This programme seeks to provide the employee with a basic understanding of the Public Service as well as expectations of the Department in terms of code of conduct and an emphasis of the applicable Public Service Regulations.

## Health and Safety Issues

The advent of Coronavirus Disease in March 2020 required the Department of Health to come up with interventions that were aimed at protecting the health and safety of our healthcare workers. These interventions included:

- The update of Occupational Health and Safety Guidelines to protect Healthcare Workers during COVID-19.
- implementation of risk improvement plan

# 2022/23 ANNUAL REPORT

---

- Conducting health education to employees to ensure that they take necessary precautions to protect themselves and others.
- Providing resources and a work environment that promotes personal hygiene. For example, hand soap, alcohol-based hand rubs containing at least 70 percent alcohol, disinfectants, and disposable towels for workers to clean their hands and their work surfaces.
- Decongestion of common areas e.g., boardrooms
- Provision of appropriate Personal Protective Equipment (PPE) to relevant Healthcare Workers based on Risk Assessment.
- Daily monitoring of COVID – 19 infection and management thereof
- Vaccination programme started in 2021 and all employees were encouraged to vaccinate.
- Integration of COVID – 19 guidelines into existing departmental service delivery platforms
- On the 4<sup>th</sup> of April 2022, National state of disaster on Covid-19 was lifted as a result, all regulations were repealed. However, as a department, we still conduct risk assessment in line with OHS Act
- The Department is continuing with conducting occupational health and safety audits and inspections aimed at prevention and improvement of the environment.
- Despite lifting of Covid-19 the Department still ensures strict adherence to hygiene protocol alcohol-based hand rubs are still provided in all departmental strategic points and service delivery platforms.
- Continuous awareness on HBA and health education and awareness on precautionary measures has been mainstreamed to all Employee Health and Wellness programme and trainings.
- Employees who want to participate in the vaccination programme are encouraged and supported to do so

## Health Portfolio Committee

The Health Portfolio Committee meetings took place as follows:

- 15 March 2022
- 12 April 2022
- 24 May 2022
- 03 September 2022
- 01 November 2022

The matters discussed include Annual performance plan, annual and quarterly reports, budget, responses to Youth Parliament and Finance committee resolutions.

# 2022/23 ANNUAL REPORT

---

## Detailed responses submitted to SCOPA

Report of the Standing Committee on Public Accounts March 2022 follow-up hearings on 2020/2021 report of the Auditor-General - Vote 7: Department of Health

1. The report emanating from the March 2022 Standing Committee on the Public Accounts hearings on the 2020/21 report of the Auditor-General in respect of the KwaZulu-Natal Department of Health, has reference.
2. Appended are the responses of the Department relative to the resolutions of the Standing Committee of the Public Accounts.

*RESOLUTION 49/2022: INCOMPLETE AND INCORRECT RECORDING OF IRREGULAR EXPENDITURE - R11.55 BILLION (RELATING TO RESOLUTION 225/2021)*

Noting that:

- (a) *The root cause of the findings on irregular expenditure was the inaccurate and incomplete disclosure of irregular expenditure by management at a facility level, since the department has been using a manual system to record and report on irregular expenditure. The department intends implementing consequence management against the CEOs of institutions who had contributed to the audit qualification.*
- (b) *The department has appointed a service provider to assist with the accurate and complete recording and disclosure of irregular expenditure incurred in 2021/22. The service provider will also review all prior years' irregular expenditure to ensure the opening balance for 2021/22 is adjusted accordingly. The project entails, among other things, the setting-up of an electronic tool (EASI) to record all transactions and the reconciliation and consolidation of the irregular expenditure register. Training on the use of the tool has commenced in all districts.*

The Committee Resolves:

That the Accounting Officer report to the Committee by 30 June 2022 on:

- [1] *Progress made in the implementation of consequence management against CEOs of institutions who had contributed to the audit qualification on irregular expenditure and the steps taken to do so, per CEO.*
- [2] *Progress made in the training of relevant staff on the EASI tool.*

## 2022/23 ANNUAL REPORT

---

[3] *Progress made in the implementation and effectiveness of the EASI tool in relation to the electronic recording of all transactions and the reconciliation and consolidation of the irregular expenditure register.*

### RESPONSE OF THE DEPARTMENT

[1] *Progress made in the implementation of consequence management against CEOs of institutions who had contributed to the audit qualification on irregular expenditure and the steps taken to do so, per CEO.*

Subsequent to the Department issuing letters regarding consequence management to the respective CEOs of institutions that were audited and who had contributed to the qualifications in the 2020/21 financial year, representations were received from CEO's relative to both punitive action and corrective action that they had instituted / implemented at their facilities.

[2] *Progress made in the training of relevant staff on the EASI tool.*

The EASI Tool has been implemented at the Head Office and at all facilities. All officials who are required to utilise the tool for the capture of all supply chain management transactions and the assessment thereof have been trained. There are in excess of 600 users who have been added to the system and have been responsible for the capturing and assessment of the transactions to determine whether these are irregular or not. The categories of users include those who are performing an oversight role, capturers as well as reviewers.

[3] *Progress made in the implementation and effectiveness of the EASI tool in relation to the electronic recording of all transactions and the reconciliation and consolidation of the irregular expenditure register.*

The population of payments for the 2021/22 financial year which amounted to 292 518 transactions totalling R 19,458,393,655.77, was imported onto the Tool and analysed by way of the completion of the evaluation checklists for various SCM processes such as requests for quotations, deviations, transversal contracts, competitive bids etc.

The resultant effect of this assessment was that as at 31 March 2022, the Department disclosed an amount of R 2,623,985,392.34 as irregular expenditure in the AFS. In this regard, there is an itemised register with uniform descriptions of contraventions and other pertinent information (e.g., payment number, order number, etc) which reconciles to the amount disclosed. The relevant supporting documentation has been uploaded to the EASI Tool and the Office of the Auditor-General has been given access to the EASI Tool to facilitate their audit for the 2021/22 financial year.

# 2022/23 ANNUAL REPORT

---

## RESOLUTION 50/2022: MISSTATEMENTS OF MOVABLE TANGIBLE ASSETS - R5.6 BILLION AND MINOR ASSETS - R855 MILLION (RELATING TO RESOLUTION 226/2021)

Noting that:

The department disagrees with the finding of the Auditor-General that it had applied incorrect criteria in the valuation of its assets. The department applied an asset valuation methodology that was approved by Provincial Treasury and endorsed by National Treasury. In the opinion of the department the Modified Cash Standard (MCS), issued by National Treasury, is not clear and lends itself to more than one interpretation. Despite numerous engagements, the disagreement has not been resolved.

The Committee resolves:

That the Accounting Officer report by 30 June 2022 on steps taken or to be taken, and the outcome of the engagement with the Provincial Accountant General, in reaching agreement with the Auditor-General on the interpretation of the Modified Cash Standard (MCS) relating to the fair valuation of assets.

## RESPONSE OF THE DEPARTMENT

The Resolution of the Committee is noted.

Appended are the initiatives / actions taken to address and resolve the Asset Valuation Methodology

- The deliberations on the asset valuation methodology have been at a stalemate despite various discussions between the Department, and both the Provincial Treasury and the National Treasury, relative to the interpretation of the standard, specifically with regards to the application of adjustment factors emanating from the conditional assessments. In this regard, there has been submissions and letters that were forwarded by the Department to address the qualification as well as the submission of a motivation for the formulation of conditional assessment indices, used to adjust the Annual Financial Statements (AFS) for the 2021/22 financial year. Unfortunately, all of these attempts have not resolved this disagreement.
- The National Treasury had invited all Departments for a presentation on an Asset Management draft framework where the issue of valuation was also discussed. This framework remains a draft framework and until it is adopted, it cannot be used for any purposes. However, it is worth noting that there was only one major difference between

## 2022/23 ANNUAL REPORT

the Departments adopted valuation methodology and that which was proposed during the workshop.

- The presenter proposed that the Department undertakes a thorough and vigorous process of conditionally assessing each asset and then assigning indicative percentages to adjust the deemed cost. The presenter used the following table to show how the indicative percentages should be allocated to each condition which will be used to adjust the deemed costs.

TABLE A - INDICATIVE PERCENTAGES	
CONDITION	INDICATIVE PERCENTAGES FOR ADJUSTMENT OF DEEMED COST
Very good	71% – 100%
Good	46% - 70%
Fair	26% - 45%
Poor	11% - 25%
Very poor	0% - 10%

- The above percentages are derived from Public Works and the CIDB, 2017 titled “National Immovable Asset Maintenance Management Planning Guidelines for Immovable Assets” as there are no similar guidelines for Moveable assets.
- According to the proposal, the Department will have to define each condition and then within each condition, develop a criterion, which shall be used to allocate an appropriate percentage within the range as provided above. As an example, a high back chair, were the condition is fair but each has different defects, may be reflected as below:
  - Fair with no defects - perhaps allocate 45% as an adjustment factor
  - Fair with some defects (wheels loose or armrest not stable) - perhaps allocate any percentage close to the medium number 36%.
- The presenter mentioned that the Department will have to use its judgment to decide on the final percentage and the final valuation amount.
- The Department did raise various concerns with this proposal and these concerns were duly submitted to KwaZulu-Natal Provincial Treasury for consideration and also for further submission to the National Treasury.
  - Cost factor - The Department will have to enlist the services of appraisers which may include Medical Experts, IT experts, etc. to assist with a proper conditional assessment of each asset. The Department has over 820 000 assets in the Fixed Asset Register (FAR) and this excludes assets classified as exclusions. With exclusions, the number exceeds 1 million assets. The cost of the conditional assessment for this number of assets could easily exceed R 80 million. This is simply unaffordable and no value for money accrues

## 2022/23 ANNUAL REPORT

---

to the Department for using this approach. Further, this is inconsistent with the cost/benefit principle which is one of the fundamental considerations in the preparation of the AFS. The Department holds the view that, it is completely unjustifiable to spend this amount of money in the face of budget cuts as this exercise that may not be useful to anyone including both management and users of the AFS. This defeats the reason and purpose of any AFS as the information contained may not meet the necessary qualitative characteristics.

- Provides for a wider area to exercise professional judgment - There may be material differences in the final valuation amount due to the quantum and the choice of the percentage as stipulated in the table above. Different officials/appraisals may conclude differently depending on their judgment. These differences in opinions etc. may cause further differences in opinions and will further widen the scope of the disagreement with Auditor-General.
- The Department strongly believes that the proposal as presented in the workshop is not the solution and therefore has requested all relevant stakeholders to urgently engage with a view to finding a lasting practical solution to this disagreement. This overemphasis on valuation in the public sector is really overrated, as in the public sector, assets are used solely to provide a service and, accordingly, the most important aspects of asset management are:
  - Performance - ability (function) of the asset to deliver/perform the required service
  - Maintenance - maintenance planning and execution to minimise asset outages and the impact of these on service delivery
- The Departments Asset Management has engaged extensively on the subject matter and also engaged other Departments of Health including Limpopo, Northwest, etc, and discovered that the Limpopo Department of Health's valuation methodology is similar to that which the Department has adopted. The Limpopo Provincial Treasury drafted the valuation methodology for all Departments and the Head of the Department in Limpopo signed off on this methodology prior to the implementation thereof.

### Way forward on Valuation

- The KwaZulu-Natal Accountant-General had in one of the meetings, promised to personally facilitate a process of resolving this long-standing disagreement with Auditor-General. The Department also believes that any valuation methodology signed off by Provincial Treasury will limit any disagreements. In spite of all the efforts made by the Department, this disagreement remains unresolved.

## 2022/23 ANNUAL REPORT

---

With due consideration to the above, the Department is of the view that the KwaZulu-Natal Accountant-General should facilitate a process of drafting a practical valuation methodology for all Departments in the Province and to be signed off by the Head of the Provincial Treasury prior to the implementation thereof. This will provide clarity in both the application and compliance and will remove any misinterpretations which may result in disagreements and qualifications.

*RESOLUTION 51/2022: PAYMENTS FOR GOODS AND SERVICES NOT RECEIVED - R16.15 BILLION (RELATING TO RESOLUTION 227/2021)*

*Noting that:*

- (a) The new Goods Received Note (GRN) has been fully implemented across the department as a system of internal control to ensure goods and services that are paid for were indeed received.*
- (b) All institutions must perform monthly reconciliations, maintain a GRN register and validate and verify all SCM transactions to ensure all goods and services are receipted on a GRN.*
- (c) The department is in the process of assessing compliance.*

*The Committee resolves:*

*That the Accounting Officer report by 30 June 2022 on progress made in the assessment of institutions and the findings, as well as remedial steps taken to address non-compliance and steps taken to implement consequence management in instances of non-compliance.*

### RESPONSE OF THE DEPARTMENT

The resolutions of the Committee are noted. Appended are the remedial steps taken to address non-compliance:

- Goods Receipt Notebook (GRN) Circular (Circular Number: 25/2021) was issued on 1 February 2021 to all Head Office Components and Institutions for immediate implementation, to ensure compliance.
- A re-affirmation letter to the institutions confirming that GRN's have been fully enforced and that no payment is to be made without it being attached, was circulated in February 2022.
- All institutions have been instructed that NO PAYMENTS must be processed without the mandatory GRN being attached to the Payment Voucher, which confirms the receipt of goods and services by the Department.

## 2022/23 ANNUAL REPORT

---

- The GRN must be completed upon the delivery of the goods as well as for the confirmation of the services that has been rendered.
- Inventory and Logistics Management Workshops were convened during March 2021 and April 2021 highlighting the compliance regarding GRN completion.
- The Inventory Management Team has been conducting GRN Compliance Assessments throughout the 2021/22 Financial Year on a sample basis and institutions were advised to rectify the gaps where it was identified.
- Audit Preparedness Workshops were convened during November 2021 and December 2021 for all District Offices and Institutions.
- District Champions were requested to conduct GRN Compliance Assessments
- An Inventory and Logistics Forum was held in March 2022 for all Districts and prioritised institutions, and GRN Compliance was part of Agenda.

*RESOLUTION 52/2022: MISSTATEMENT OF ACCRUALS - R 686.74 MILLION AND PAYABLES NOT RECOGNIZED - R1.1 BILLION (RELATING TO RESOLUTION 228/2021)*

*Noting that:*

- (a) The department has embarked on a process to implement LOGIS, an electronic logistical information system, to assist in accurately recording accruals and payables.*
- (b) Implementation is dependent on training of relevant officials by National Treasury. Over 1 300 officials must be trained on various modules. The roll-out of the training is slow.*
- (c) In the interim, relevant officials must review all transactions and verify accruals for accuracy and ensure all goods and services are receipted and perform other steps to ensure accuracy.*

*The Committee resolves:*

*That the Accounting Officer report to the Committee by 30 June 2022 on:*

- [1] Progress made in the roll-out of the training and the anticipated time frame for completing the training, as well as the project plan on the full implementation of LOGIS.*
- [2] An evidence-based assessment of the effectiveness of the measures implemented in the interim to ensure all accruals and payables are recorded accurately.*

# 2022/23 ANNUAL REPORT

## RESPONSE OF THE DEPARTMENT

The resolutions of the Committee are noted. Appended are the responses of the Department.

[1] *Progress made in the roll-out of the training and the anticipated time frame for completing the training, as well as the project plan on the full implementation of LOGIS.*

The Department has trained officials as per the below table.

LOGIS COURSE	NUMBER OF OFFICIALS TRAINED
Train-The-Trainer (Accredited Trainers)	8
LOGIS Literacy	103
LOGIS Orders	12
LOGIS Payments	15
LOGIS Posting (Warehousing)	4
System Controller Administrative	15
System Controller Functional	8

As mentioned above, the Department now has eight (8) accredited trainers who are able to facilitate training in the Department to all LOGIS users, going forward. It is planned that these trainers will commence training in the second quarter of 2022/23 financial year.

The implementation of the system is in progress and the following has been achieved:

- The System has been implemented at the Umgungundlovu District Office and has gone live on 20 May 2022. This is the first institution where it was implemented.
- The System is being implemented at four (4) other institutions, namely, Head Office, Greys Hospital, Dr Pixley Ka Isaka Seme Memorial Hospital and at the Prince Mshiyeni Memorial Hospital. Configuration is at advanced stage and it is envisaged that LOGIS will be fully implemented at these institutions by the end of July 2022.

Further the Department is targeting to implement LOGIS at ten (10) institutions by the end of March 2023 and at an additional ten (10) institutions by July 2023. It should be noted that the National Treasury does not allow sites to be activated (go live with LOGIS) between December and March each year, which is a limitation.

[2] *An evidence-based assessment of the effectiveness of the measures implemented in the interim to ensure all accruals and payables are recorded accurately.*

The Directorate: Expenditure Management from within the Departments Finance Branch has put together a team which is made up of officials from Expenditure Management and the Provincial Treasury to assist with the accurate reporting of the Accruals and Payables Not Recognised (PNR). Appended is a brief overview of the activities that the team has undertaken to ensure that all Accruals and Payables Not Recognised (PNR) are recorded accurately and completely:

## 2022/23 ANNUAL REPORT

---

- The team embarked on a process of checking all transactions listed on the Accruals and Payables Not Recognised listing.
- The transactions were checked against the source documents and all errors that were identified were subsequently corrected.
- The team commenced with the checking of the restated Accruals and Payables listing for March 2021. This exercise has been an arduous one with each team member having to check about 1040 transactions and thereafter proceeding with the checking of the 2021/22 Accruals and PNR's listing. This exercise was concluded on 23 May 2022.
- In an endeavour to reinforce the above, the Department's Expenditure Management has conducted workshops with the target audience being officials who are dealing with the processing of payments, Hospital CEO's as well as Directors within the Departments SCM Component. This training was aimed at emphasising the importance of ensuring that payments are processed within thirty (30) days.

*RESOLUTION 53/2022: MEDICO-LEGAL CLAIMS: R26.23 BILLION (RELATING TO RESOLUTION 229/2021)*

*Noting that:*

- (a) Proper record keeping and data storage are critical in the management of medico-legal claims. The department is doing research on the acquisition of an appropriate electronic storage system.*
- (b) The department has adopted a Provincial Clinical Governance Policy to guide facilities on the management of medico-legal cases.*
- (c) Medical malpractice litigation is on the rise and payment of claims have increased significantly. This presents a major risk. The department has not reported on any specific strategies adopted to mitigate its liability in respect of medico-legal claims, such as alternative dispute resolution and mediation procedures and interventions aimed at the improvement of health care in obstetrics and gynaecology specifically and public health care in general.*
- (d) In 2020/21 the department paid an amount of R116.561 million in respect of medico-legal claims. If payments for medico-legal claims are not budgeted for such claims are paid from the operational budget, thus impacting negatively on service delivery.*

*The Committee resolves:*

*That the Accounting Officer report to the Committee by 30 June 2022 on:*

## 2022/23 ANNUAL REPORT

---

- [1] *Progress made in the acquisition of a suitable electronic storage system to store medical records and the time frames for doing so.*
- [2] *A copy of the Provincial Clinical Governance Policy is to be provided.*
- [3] *Specific strategies implemented by the department to mitigate its liability in respect of medico-legal claims.*
- [4] *The amount budgeted for medico-legal claims in 2020/21, 2021/22 and 2022/23 respectively, as well as the amount paid in 2021/22 in settlement of medico- legal claims.*

### RESPONSE OF THE DEPARTMENT

The resolutions of the Committee are noted. Appended are the responses of the Department.

- [1] *Progress made in the acquisition of a suitable electronic storage system to store medical records and the time frames for doing so.*

#### Record Keeping and eHealth Implementation

The Department has started a process of ensuring the Digitisation of Patient's Records to ensure the safety of patient's information and the continuity of healthcare. Currently there are seven hundred fifty-five (755) health facilities installed with the Health Patient Record System (HPRS). The Department has developed a Records Management Policy and has workshopped it in all the Health Districts with the target being the officials who are seized with the responsibility of managing Health Records and essential Health Files.

At the Provincial Office there is a dedicated unit assigned with the responsibility of ensuring safe Health Records Management supervised by a director. Security controls have been improved in all the Health Facilities to prevent theft of patient's files.

- [2] *A copy of the Provincial Clinical Governance Policy is to be provided.*

#### Clinical Governance

The Department has an approved Clinical Governance Policy Framework and Guidelines for ensuring compliance with Standard Operating Procedures of Clinical Governance. Notwithstanding the above, the Department has compiled a new Clinical Governance Policy which is in the process of being finalised and approved.

At the Provincial and District Level, the Department has established committees to provide internal oversight over the Clinical Governance strategies implementation and capacity improvement.

The Department has employed Clinical Specialists whose daily work is to ensure improved Clinical Governance in all Health Facilities, they are referred to as District Clinical Specialists

## 2022/23 ANNUAL REPORT

---

Teams (DCST) and are placed at the Provincial Office and in all the eleven (11) health districts. The DCST work in collaboration with the Medical Managers and Nurse Managers, and the health programmes specialists to develop clinical quality improvement systems, training, and monitor their effectiveness.

There has been training of Clinical Health Specialists in the Medical and Nursing fields with the **different institutions of Higher Learning in order to have specialists' capacity within the Department to manage complicated cases in all the Clinical Domains**

In respect of contracting of Private Health professionals and services, the Department has contracted over one hundred and ten (110) Private General Medical Practitioners to ensure quality clinical services in Primary Health Care Facilities. The Department has also contracted Oncology Services from the private sector health firms to clear any service backlogs and reduce waiting times for newly diagnosed oncology cases.

*[3] Specific strategies implemented by the department to mitigate its liability in respect of medico-legal claims.*

Quality Assurance (QA) and Infection Prevention & Control Systems (IPC)

A Quality Assurance Unit has been established at the Provincial Office and has been complimented by the creation and filling of QA and IPC posts in all the Health District Offices and all qualifying Provincial Hospitals.

In May 2022, the Department approved a Provincial IPC Strategy with the aim of mitigating and reducing Hospital Acquired Infections and related complications.

Medico-Legal Management Capacity

The establishment of a Medico-Legal Unit was completed at the Provincial Office. Legal companies appointed through the Supply Chain Processes are part of a panel of experts to complement the internal departmental capacity to deal with Medico-Legal matters

The Medico-Legal Unit has been resourced with legally and medically qualified officials, whose complementary responsibility is to manage all Medico-Legal Matters, advise the Department on all medico-related matters, and the development of mitigation strategies.

The Department is now piloting the implementation of the Public Health Defence Court Judgement system. In this regard, the Department has established and resourced seven Public Health Defence Centres of Excellence where Medico-Legal settled and conceded cases shall be managed in order to reduce unnecessary costs against the Department as a result of future Medical Costs

# 2022/23 ANNUAL REPORT

---

[4] *The amount budgeted for medico-legal claims in 2020/21, 2021/22 and 2022/23 respectively, as well as the amount paid in 2021/22 in settlement of medico-legal claims.*

The Department has allocated a budget for Medico-Legal matters, as follows:

- 2020/21 : R 113,104 million
- 2021/22 : R 119,325 million
- 2022/23 : R 110,105 million

Total amount paid in 2021/22 in settlement of medico legal cases is R 265,883.93

*RESOLUTION 54/2022: MISSTATEMENTS ON ACHIEVEMENT OF PREDETERMINED OBJECTIVES: PROGRAMME 2 - DISTRICT HEALTH SERVICES (RELATING TO RESOLUTION 230/2021)*

*Noting that:*

*The department has implemented various interventions to address the material misstatements on reported achievements against the performance indicators. An assessment of the effectiveness of the interventions was conducted at the end of February 2022.*

*The Committee resolves:*

*That the Accounting Officer report to the Committee by 30 June 2022 on the outcome of the assessment on the effectiveness of the interventions implemented by the department to ensure performance information is accurate, as well as further interventions implemented to address any areas of non-compliance, including consequence management implemented against all officials who have been non-compliant.*

## RESPONSE OF THE DEPARTMENT

The Department has undertaken a brief assessment following the implementation of the Audit Improvement Plan (AIP) in December 2021. The Provincial Office has conducted twenty-four (24) site visits from February 2022 to May 2022, with the intention of monitoring and assessing the effectiveness of the plan, as well as to provide support to the facility in preparation for the audit at the time.

Following the assessment, the Department noted that there were areas that has a shown clear improvement. A tool was used to collate the responses for activities that the Provincial Office introduced in direct relation to improving the data quality. Areas where improvement was noted include:

## 2022/23 ANNUAL REPORT

- Audit Improvement activities have been cascaded down to facility level and workshopped. The Provincial office reports a 91% submission rate on the AIP.
- Facilities have developed their own AIP, and in some districts, have been reporting on them to the district office to allow for a more evidence-based report to the Provincial Office.
- A few district offices have improved on their monthly progress report with more details on their findings. This allows the Provincial Office to identify areas of concern and action them. Amajuba is one of the districts that has been diligently reporting. Other districts will be advised to complete their reports in the similar comprehensive manner.
- All SOPs were acknowledged and was said to be workshopped with all users. Evidence was provided where this was applicable.
- Training sessions were held at facility level for most districts in relation to current SOPs and policies.
- Facilities found that the reconciliation tool implemented in March 2022 by the Provincial Department assisted them with accurate reporting and revision of data prior to the audit.
- More CEO's have reported to include Data Management into their work plans compared to previous years.
- Facilities have started to maintain records of verification exercises compared to previous years as evidence of their interventions.
- Patient folder implementation was found to be on district procurement plans (the assessment is appended)

DISTRICT	PATIENT FOLDER IMPLEMENTATION PROGRESS (NUMBER OF FACILITIES IMPLEMENTED/TOTAL NUMBER OF FACILITIES)
Amajuba DM	26/26
eThekweni DM	137/137
iLembe DM	51/51
Harry Gwala DM	40/40
King Cetswayo DM	47/62
Ugu DM	52/52
Umgungundlovu DM	50/51
Umkhanyakude DM	59/59
Umzinyathi DM	72/72
Uthukela DM	36/37
Zululand DM	62/75

Improvement in Data Management at a Facility level can be addressed through:

- Filling of vacant information posts to improve data recording and collation. Since the assessment, the moratorium has been lifted and the Provincial office has advised facilities to fill their vacant posts where budget is available.

## 2022/23 ANNUAL REPORT

---

- Following a schedule of monthly Information meetings to review and discuss data. Recommendations have been made in this regard.
- Standardisation of the approved method of filing. Currently different filing methods are being utilised at various facilities.
- Fast-tracking the disposal of old files.

In summary, the Department acknowledges that there are still areas that need focused intervention and will continue to provide the support to these districts. Where districts and facilities are found to be non-compliant, relevant feedback will be provided to them to avoid recurring challenges.

*RESOLUTION 55/2022: IRREGULAR EXPENDITURE OF R1.629 BILLION IN 2020/21 (CUMULATIVE BALANCE IN PRIOR YEARS: R9.926 BILLION NOT YET CONDONED) (RELATING TO RESOLUTION 231/2021)*

Noting that:

- The department has appointed a service provider to assist in identifying and assessing all irregular expenditure in 2020/21 and prior years in line with the Irregular Expenditure Framework. The determination testing for irregular expenditure in 2018/19, 2019/20 and 2020/21 is in progress.*
- An amount of R2.677 billion relating to irregular expenditure relating to expired contracts in 2014/15, 2015/16 and 2016/17 was submitted to Provincial Treasury for condonation in March 2021. This amount has not been condoned as the department did not submit evidence to confirm that value for money was received and that remedial action and disciplinary action was taken, confirmation that the transactions are not subject to forensic investigation, and that value for money was received.*
- The department has submitted a revised submission of R1.133 billion for condonation in March 2022, which is under evaluation.*
- The department is in the process of clearing the list of expired contracts and will re-advertise the contracts for the security services, cleaning services, maintenance of gardens and patients' groceries by the end of March 2022.*

The Committee resolves:

That the Accounting Officer report to the Committee by 30 June 2022 on:

## 2022/23 ANNUAL REPORT

---

- [1] *Progress made in the determination testing of the 2018/19, 2019/20 and 2020/21 irregular expenditure and the anticipated timeframes for conclusion of this process and submission to Provincial Treasury for condonation.*
- [2] *Steps taken to perform the determination testing of the 2014/15, 2015/16 and 2016/17 irregular expenditure relating to expired contracts, and the time frames for conclusion thereof.*
- [3] *Progress made in the re-advertising of the expired contracts and when these contracts are anticipated to be finalized.*

### RESPONSE OF THE DEPARTMENT

The determination testing project had commenced on 9 May 2022 with the focus being on the R 1,7 billion that was declared as "under assessment" in the 2020/21 financial year. When the assessment for the 2020/21 financial year has been concluded, all findings will be tabled at the Departmental Loss Control Committee for "determination testing" and to come up with recommendations. The Department will work retrospectively to finalise the backlog up to the 2018/19 financial year.

Further, a request for condonation amounting to R 2,6 billion was submitted to the Provincial Treasury in March 2021. A team from the Provincial Treasury visited the Department to conduct sample testing on what was submitted, and it was noted that there were documents that were still outstanding from the Department. In this regard, the Department has experienced challenges in sourcing the documents as most of the senior management have exited the Department.

*RESOLUTION 56/2022: PROCUREMENT AND CONTRACT MANAGEMENT (RELATING TO RESOLUTION 234/2021)*

*Noting that:*

- (a) *The department has implemented a system of controls within SCM to ensure compliance with the relevant prescripts relating to procurement and contract management, including the implementation of a mandatory checklist.*
- (b) *Oversight and monitoring of the system is delegated to the respective District Directors and CEO's.*
- (c) *The department intends taking disciplinary action against the Chief Executive Officers of the facilities that had contributed to the findings relating to non-compliance with SCM prescripts.*

## 2022/23 ANNUAL REPORT

---

- (d) *The department is migrating towards maintaining an electronic records management system and in the meantime all contract documents are being scanned to address the finding on poor record keeping.*

The Committee resolves:

That the Accounting Officer report to the Committee by 30 June 2022 on:

- [1] *Progress made in the implementation of consequence management against CEOs of facilities who contributed to the findings relating to non-compliance with SCM prescripts, the outcomes thereof and time frames for concluding these matters.*
- [2] *Steps taken by the department to monitor compliance with the SCM control system by the respective CEO's.*
- [3] *Progress made in the implementation of an electronic records management system and time frames for doing so, as well as progress made in the scanning of all contract documents in the meantime and time frames for concluding the scanning.*

### RESPONSE OF THE DEPARTMENT

The resolutions of the Committee are noted. Appended are the responses of the Department.

- [1] *Progress made in the implementation of consequence management against CEO's of facilities who contributed to the findings relating to non-compliance with SCM prescripts, the outcomes thereof and time frames for concluding these matters.*

Subsequent to the Department issuing letters regarding consequence management to the respective CEOs of institutions that were audited and who had contributed to the qualifications in the 2020/21 financial year, representations were received from CEO's relative to both punitive action and corrective action that they had instituted / implemented at their facilities.

- [2] *Steps taken by the department to monitor compliance with the SCM control system by the respective CEO's.*

The CEOs are now required to report monthly on the status of procurement in their institutions.

- [3] *Progress made in the implementation of an electronic records management system and time frames for doing so, as well as progress made in the scanning of all contract documents in the meantime and time frames for concluding the scanning.*

Electronic records management has been implemented at Head Office and is in the process of being rolled out to all the institutions. The Department has implemented a contract for the

# 2022/23 ANNUAL REPORT

---

procurement of high-volume scanners by facilities. Where budget limitations exist, the normal photocopying machines are utilised by the facilities.

## RESOLUTION 57/2022: PERFORMANCE MANAGEMENT AND PERFORMANCE TARGETS (RELATING TO RESOLUTION 235/2021)

Noting that:

- (a) Non-compliance with Standard Operating Procedures at facility level had led to the findings on the failure to monitor progress made towards performance targets, core objectives and service delivery.
- (b) The department has implemented many interventions to address this finding, to ensure reconciliation, review, verification and validation of information at facility level.
- (c) The effectiveness of the audit improvement plan will be assessed by the end of March 2022.

The Committee resolves:

That the Accounting Officer report to the Committee by 30 June 2022 on the effectiveness of the implementation of the audit improvement plan and whether it has adequately addressed this finding.

## RESPONSE OF THE DEPARTMENT

Please refer to the response to Resolution 54/2022: *Misstatements on Achievement of Predetermined Objectives: Programme 2 - District Health Services.*

## RESOLUTION 58/2022: PROCUREMENT OF SANITIZER DETERGENT AT PRICES HIGHER THAN PERMISSIBLE IN MARCH 2020 - MATERIAL LOSS OF R1.3 MILLION (RELATING TO RESOLUTION 236/2021)

Noting that:

- (a) The investigation relating to the procurement of sanitizer in March 2020 at prices higher than permissible, resulting in a material loss of R1.3 million, has not yet been finalized. The department has sought legal opinion on a technicality and the legal opinion is still awaited.
- (b) The material irregularity was brought to the attention of the accounting officer on 12 February 2021. The slow progress made in the investigation is a matter of concern.

## 2022/23 ANNUAL REPORT

---

The Committee resolves:

That the Accounting Officer report to the Committee by 30 June 2022 on:

- [1] *Progress made in the finalization of the investigation, time frames for finalization thereof and the reasons for the delays, as well as steps taken to expedite the matter.*
- [2] *Once the investigation has been finalized, the findings and recommendations of the investigation, as well as steps taken to implement the recommendations, and time frames for doing so.*

### RESPONSE OF THE DEPARTMENT

- [1] *Progress made in the finalization of the investigation, time frames for finalization thereof and the reasons for the delays, as well as steps taken to expedite the matter.*

In this regard, the procurement of the sanitiser detergents at prices higher than that which was prescribed by the National Treasury, was investigated by the Special Investigations Unit (SIU) by proclamation of the President of the Republic of South Africa. The SIU finalised the report and submitted it to the Department in January 2022.

- [2] *Once the investigation has been finalized, the findings and recommendations of the investigation, as well as steps taken to implement the recommendations, and time frames for doing so.*

Subsequent to the undertaking and conclusion of the investigation by the SIU, the supplier National Community Marketing had then agreed to re-imburse the Department via the SIU an amount of R 1,304,000.00. The Acknowledgement of Debt was signed in the amount of R 1,304,000.00 by National Community Marketing for the contract, in the value of R 5,720,000.00.

The Department has liaised with the SIU relative to the amounts that have been paid by the supplier and in this regard, a copy of the "Debtors Account" was forwarded to the Department which reflects all payments including interest that was made by the supplier as of 25 April 2022 towards the settlement of the debt.

In this regard, payments in the amount of R 668,214.35 have since been received by the SIU on behalf of the Department and the balance of R 635,785.65 will be paid in instalments to the SIU.

Further, it should be noted that subsequent to the Department receiving the final investigation report, consequence management was implemented against the officials implicated in the matter, in the form of final letters of warning.

## 2022/23 ANNUAL REPORT

---

RESOLUTION 59/2022: MATERIAL IRREGULARITY RELATING TO RADIOLOGY EQUIPMENT CONTRACTS AWARDED TO BIDDERS WHO DID NOT SCORE THE HIGHEST POINTS - MATERIAL FINANCIAL LOSS OF R27.54 MILLION (RELATING TO RESOLUTION 237/2021)

Noting that:

- (a) The department received a legal opinion on the matter in August 2021. The opinion was sent to the Auditor-General who provided final recommendations in November 2021. The department subsequently (on a date not specified) sought the advice of the Provincial Accountant General on implementation of the Auditor-General's recommendations. This advice is being awaited. The department has not actioned the recommendation of the legal opinion.
- (b) The matter relates to procurement of radiology equipment in September 2017 at a cost of R27.54 million, which is likely to result in a material loss as the cost of the equipment was higher than the prices submitted by the highest scoring bidders.
- (c) The internal investigation was concluded in July 2019 and the forensic investigation was concluded in October 2020.
- (c) Notwithstanding SCOPA resolution 237/2021 calling for a report on the findings and recommendations of the final legal opinion by 31 January 2022, the department has not provided a suitable response.
- (d) The duration of the investigation(s), the delays in finalizing this matter, the manner in which the department conducted itself in relation to the investigation(s) and the failure to disclose (non-confidential) information to SCOPA, as an oversight body, when called upon to do so, are of great concern. Not only do the delays create a material risk of prescription and the consequential loss of substantial amounts of money; they may also thwart the implementation of consequence management.

The Committee resolves:

That the Accounting Officer report to the Committee by 30 June 2022 on:

- [1] The findings and recommendations of the legal opinion, as well as steps taken to implement the recommendations and time frames for doing so. Reasons must be provided if no steps have been taken.
- [2] The report need not disclose confidential information but must be of sufficient clarity and particularity to enable SCOPA to assess both the matters which gave rise to the investigation(s) as well as the Department's conduct in relation to the investigation(s).

# 2022/23 ANNUAL REPORT

---

## RESPONSE OF THE DEPARTMENT

The Resolution of the Committee is noted.

In this regard, the Department made representations to the Auditor-General and had indicated that this was made with the intention that there be a speedy and appropriate resolution to this matter.

Subsequently, the Auditor-General had responded relative to the "Determination on Appropriateness of Actions Taken" and had indicated that:

*"The response received relating to actions to resolve MI 01 of 2018-19, in accordance with the Public Audit Act, 2004 (Act No.25 of 2004) (PAA) and the Material Irregularity Regulations (the "regulations"). We received your written submission on 18 April 2022. We considered the representations made and the substantiating documents provided and have concluded that appropriate actions have been taken to address the material irregularity"*

The Auditor-General had considered the representations made by the Department and the substantiating documents provided and have concluded that appropriate actions have been taken to address the material irregularity.

## RESOLUTION 60/2022: INTERNAL INVESTIGATIONS (RELATING TO RESOLUTION 239/2021)

*Noting that:*

*All 169 internal investigations have been completed. One hundred and twenty-six cases have been finalized in terms of disciplinary action or other remedial steps or have been closed due to lack of evidence. Forty-three matters are still pending implementation of the investigative recommendations.*

*The Committee resolves:*

*That the Accounting Officer report to the Committee by 30 June 2022 on progress made in the implementation of the recommendations in the matters still outstanding and on the outcomes of these matters.*

## RESPONSE OF THE DEPARTMENT

The Resolution of the Committee is noted. Appended is a status relating to the forty-three (43) cases as requested by the Committee:

- A total of twenty-seven (27) cases were closed due to the following reasons:
  - lack of evidence

## 2022/23 ANNUAL REPORT

- Lack of alternative remedial action
- No disciplinary action to be effected
- Ten (10) cases were referred for disciplinary action and were subsequently finalised, with the officials being accordingly sanctioned
- Six (6) cases are pending, and disciplinary processes are in progress.

### RESOLUTION 61/2022: FORENSIC INVESTIGATIONS (RELATING TO RESOLUTION 240/2021)

Noting that:

- (a) The Forensic Unit has completed 8 investigations covering the period 1 April 2014 to 31 March 2021 and 6 investigations are still in progress.
- (b) The department's response to Resolution 240/2021 is inadequate in that the report does not provide the requisite information and the responses are not indicative of any progress made in most of the matters.
- (c) The following (non-confidential) information was requested from the department in relation to each matter, but was not provided:
- the nature of the allegations investigated.
  - the amounts involved.
  - the findings and recommendations in each matter.
  - the steps taken to recover any losses.
  - progress made in implementation of recommendations in FR 11/2016; and
  - progress made in the disciplinary proceedings in FR 02/2017, FR 05/2018, FR 06/2018 and FR 08/2018 and the outcomes thereof.
- (d) The reported status of each matter is as follows:

FR Number	Progress as at October 2021	Progress as at 31 January 2022
FR 02/2017	Report under review for implementation of disciplinary action	No further progress report and no time frames given
FR 05/2018	Criminal matter being investigated by Hawks. Department is proceeding with disciplinary action.	No progress report on criminal investigation or disciplinary matter(s)
FR 06/2018	Department is quantifying the value of irregular, fruitless and wasteful expenditure before proceeding with disciplinary action	No progress reported
FR 11/2016	Matter referred to Accounting Officer	No progress reported
FR 27/2016	Disciplinary hearings of 4 officials have been finalized. One was dismissed,	No progress on other matters such as civil recovery or criminal action reported

## 2022/23 ANNUAL REPORT

FR Number	Progress as at October 2021	Progress as at 31 January 2022
	three others received a written warning and 3 months' suspension without pay	
FR 08/2018	Disciplinary hearings have been finalized	Official resigned before disciplinary hearing was finalized. No other reports submitted
FR 17/2018	Matter under criminal investigation by Hawks	No progress reported
FR 10/2019	Matter under review by Auditor-General to evaluate material irregularity is addressed	AG provided recommendations in November 2021. Department consulted Provincial Accountant General to ensure material irregularity is resolved. No progress or time frames reported.

The Committee resolves:

That the Accounting Officer report to the Committee by 30 June 2022 on:

- [1] A detailed response to Resolution 240/2021, containing updated information on progress made in each matter.
- [2] Where no progress has been made, reasons must be provided as well as steps taken to expedite implementation.

### RESPONSE OF THE DEPARTMENT

The resolution of the Committee is noted. Appended is a status update of the investigations.

NO	DESCRIPTION	STATUS OF IMPLEMENTATION
1	FR02/2017	<p>The Department has not concluded the exercise to determine if the Department has obtained value for money and if any officials should be disciplined for irregular and fruitless and wasteful expenditure. The exercise is an extensive one and will take some time to complete.</p> <p>Once the exercise has been completed, and there is evidence of irregular and fruitless and wasteful expenditure, disciplinary action will be instituted against the implicated officials.</p>
2	FR05/2018	<p>The Department had registered the case with the SAPS and a case number was issued. Subsequently, the matter was then referred by the SAPS to the KZN Hawks for investigation.</p> <p>However, it was then discovered that the National Hawks was investigating the matter which then prompted a meeting between the National Hawks and KZN Hawks, which had resulted in a decision being taken that the KZN Hawks should proceed with the investigation.</p> <p>The investigation had commenced with the KZN Hawks engaging with the Department as well as with the National Prosecuting Authority and the Public Protector's office to solicit information. There has been several requests for information from the KZN Hawks and all requested information has been sourced and provided to the investigating team.</p> <p>Considering the above, the matter is still under investigation and a status report is awaited from the KZN Hawks.</p> <p>The Department of Public Prosecutions (DPP) has taken over the matter and have been conducting interviews with the Department's personnel.</p>

## 2022/23 ANNUAL REPORT

NO	DESCRIPTION	STATUS OF IMPLEMENTATION
		<p>Three Employer representatives and three Presiding Officers have been appointed to handle the disciplinary process. One employer representative has withdrawn her services and a new representative is to be appointed.</p> <p>The other two employer representatives are currently dealing with the matter; however, the challenge is that most of the implicated officials have resigned or left the Department, and thus it is work in progress.</p>
3	FR06/2018	<p>The Department has not concluded the exercise to determine if the Department has obtained value for money and if any officials should be disciplined for irregular and fruitless and wasteful expenditure. The exercise is an extensive one and will take some time to complete.</p> <p>Once the exercise has been completed, and there is evidence of irregular and fruitless and wasteful expenditure, disciplinary action will be instituted against the implicated officials.</p>
4	FR11/2016	The matter is being handled by the Office of the HOD and the Office of the Director-General.
5	FR27/2016	<p>Fourteen (14) officials were implicated in this matter. Appended is a status of the matter:</p> <ul style="list-style-type: none"> <li>▪ One (1) official tendered a resignation during the disciplinary process.</li> <li>▪ One (1) official had demised before the hearing could be held.</li> <li>▪ Two (2) officials were subjected to disciplinary enquiry and sanctioned to one month suspension without pay plus a final written warning and three months suspension without pay and a final written warning respectively.</li> <li>▪ The disciplinary enquiry relative to the other implicated officials are in progress. The challenge that the Department is facing is that the Employer representative has been in and out of Hospital due to ill health. However, the employer representative has indicated that he has recovered and will proceed to finalise the outstanding cases.</li> </ul>
6	FR08/2018	The officials were issued with written warnings and money wrongly paid to the companies was recovered. The matter has been finalised.
7	FR17/2018	The criminal investigation is currently underway with the Hawks. The Department is awaiting the status report on the investigation from the Hawks.
8	FR10/2019	<p>The Department is of the view that the officials tasked with evaluating the bid concerned were obliged to evaluate it based on what was presented to them. It was their understanding that what was provided for in the bid document as an 'objective criterion' was permissible and adequate and that they had acted in a genuine, honest, and law-abiding manner.</p> <p>The Department had submitted to the Auditor-General that the Department has duly noted the findings and had decided that after much deliberations and debate, and in acting within the permissible legal framework, the following will be done:</p> <ol style="list-style-type: none"> <li>a) All the officials involved in these transactions be sent to public sector workshops.</li> <li>b) Whilst cognisance has been taken of the various legislative prescripts and the provisions of Material Irregularity and the treatment thereof, the actions of the officials concerned were not malicious in intent and they acted within the framework of the bid document that was presented to them at the time. It thus follows that any resultant 'financial loss' cannot be deemed to be due to the negligence of the officials concerned, but can be attributed to a significant part to the poorly</li> </ol>

## 2022/23 ANNUAL REPORT

NO	DESCRIPTION	STATUS OF IMPLEMENTATION
		<p>crafted legislation. No recoveries can be made by the Department from any of the officials as any error committed was not entirely attributable to their actions.</p> <p>c) The Department's SCM Policy and related procedure manuals (SOPS) must reflect the requirements of how 'objective criteria' will be applied to limit any future obscurity in related matters. The BAT judgment quoted in the representations made is a clear indication that the Department has actively moved to address this area of weakness in the controls.</p> <p>The Auditor-General had considered the representations made by the Department and the substantiating documents provided and have concluded that appropriate actions have been taken to address the Material Irregularity.</p>

*RESOLUTION 62/2022: UNAUTHORIZED EXPENDITURE - 2018/19: R2.209 MILLION, 2019/20: R14.249 MILLION AND 2019/20: R91.618 MILLION (RELATING TO RESOLUTION 241/2021)*

Noting that:

- (a) *The unauthorized expenditure of R2 208 523.25 in 2017/18 was due to higher-than-expected maintenance costs.*
- (b) *The unauthorized expenditure of R14 248 580.04 in 2018/19 was due to higher than budgeted expenditure for medico-legal claims.*
- (c) *The unauthorized expenditure of R91 617 553.28 in 2019/20 was due to spending pressures relating to ARV medicines.*

The Committee resolves:

*That the Accounting Officer report to the committee by 30 June 2022 on:*

- [1] *Full particulars of the unauthorized expenditure for each financial year (2017/18, 2018/19 and 2019/20) as reported to Provincial Treasury in terms of section 38(1)(g) of the Public Finance Management Act, 1999 (PFMA).*
- [2] *Steps taken by the department to prevent the unauthorized expenditure as required by section 38(1)(c)(ii) of the PFMA.*
- [3] *Whether the unauthorized expenditure in each financial year is an overspending of the Vote itself or of a main division within the Vote or expenditure not in accordance with the purpose of the Vote or a main division within the Vote.*

# 2022/23 ANNUAL REPORT

---

[4] *Disciplinary steps taken against the officials responsible for the unauthorized expenditure as required by section 38(1)(h)(iii) of the PFMA, read with Treasury Regulation 9.1.3.*

[5] *Steps taken to recover any losses resulting from the unauthorized expenditure from the officials responsible in terms of Treasury Regulation 9.1.4 and 12.7.*

## RESPONSE OF THE DEPARTMENT

The Resolution of the Committee is noted. Appended are the responses of the Department to the Resolutions of the Committee.

[1] *Full particulars of the unauthorized expenditure for each financial year (2017/18, 2018/19 and 2019/20) as reported to Provincial Treasury in terms of section 38(1)(g) of the Public Finance Management Act, 1999 (PFMA).*

### ▪ Unauthorised Expenditure 2017/18

The Vote was underspent by R 19,157 million, mainly under Programme 7: Health care Support (R 12,803 million) due to delays in the delivery of hospital linen. Programme 2: District Health Services was underspent by R 6,354 under Machinery and Equipment as a result of challenges, including lengthy SCM processes, as well as enforced savings to reduce over-expenditure. Cash-blocking had also impacted on the spending under these Programmes and had resulted in the overspending of the Vote as a whole.

Whilst the overall Vote was underspent, the Health Facility Revitalisation Grant was overspent by R 2,209 million. This was largely due to a higher-than-expected costs on maintenance at facilities as well as the construction costs relating to the Jozini CHC project, amongst others.

Further, in respect of the HIV/AIDs Conditional Grant, there was an increase in clients diagnosed with HIV which had resulted in more clients being initiated on ARV Treatment. Medication in this regard could not be stopped.

### ▪ Unauthorised Expenditure 2018/19

The Vote was overspent by R 2,658 million, mainly under Programme 4: Provincial Hospital Services. This was due to a higher than budgeted expenditure for medico-legal claims. The Human Papillomavirus Vaccine Grant was under-spent by R 11,590 million. This was primarily due to the delayed receipt of invoices for the procurement of the vaccine fridges and the rental vehicle hire costs. The delayed invoices had resulted in the Department being unable to process the payments timeously. A further factor that contributed to the underspend was the unavailability of vaccines from suppliers.

The unauthorised expenditure of R 14,248,580.04 in the 2018/19 financial year was as a result of the overall overspending and the surrendering of the underspent conditional grant funds.

# 2022/23 ANNUAL REPORT

---

## ▪ Unauthorised Expenditure 2019/20

In the 2019/20 financial year, the over-spending of the Vote amounted to R 74,740 million, mainly under Programme 2: District Health Services, due to pressures relating to ARV medicines. This was due to an increase in clients diagnosed with HIV which had resulted in more clients being initiated on ARV Treatment, and thus the issuing of medicines could not be stopped.

The National Health Insurance grant which largely provides for the contracting of private doctors at NHI pilot sites was only allocated funding in the Adjustments Estimate. The Grant was under-spent by R 16,877 million largely due to the late receipt of the Grant and the Department's inability to develop a contingency plan due to restrictive DORA conditions, which only allow for the appointment of health care professionals from the Grant.

In summary, the unauthorised expenditure of R 91,617,553.28 in the 2019/20 financial year had resulted from an overall overspending and the surrendering of the underspent conditional grant funds.

*[2] Steps taken by the department to prevent the unauthorized expenditure as required by section 38(1)(c)(ii) of the PFMA.*

In its endeavour to prevent unauthorised expenditure, the Department was forced to delay the filling most the vacant posts as well as deferring the procurement of machinery and equipment.

In respect of HIV/AIDs, the Department had budgeted based on the projections of patients that will be initiated on treatment and to mitigate the challenge of unauthorised expenditure, representations were made to the National Department of Health for the provision of donations which the Department had received as follows:

- 2020/21 Financial Year - R 47 million
- 2021/22 Financial Year - R 218 million

In light of the aforementioned, the Department was able to contain its expenditure.

## Medico-legal Claims

In its endeavours to prevent unauthorised expenditure, the Department undertakes the following on an annual basis:

- The budget for medico-legal matters are set in the most beneficial scenario for the Department at the beginning of the financial year. During the mid-year adjustment, all expenditure incurred for the settlement of medico-legal claims is balanced and estimates for the next six (6) months is provided.

## 2022/23 ANNUAL REPORT

---

- The year-end adjustment process focuses on optimising the allocated budget per program and per economic classification.
- The review of patient safety incidents is undertaken at a facility and district level, in line with guidelines issued by the National Department of Health.
- The Department is in a difficult position regarding the allocation of increased budget for medico-legal claims as this results in the reprioritisation of the service delivery budget which is required to address issues like shortage of key staff, medical equipment, electronic patient record system, etc.

[3] *Whether the unauthorized expenditure in each financial year is an overspending of the Vote itself or of a main division within the Vote or expenditure not in accordance with the purpose of the Vote or a main division within the Vote.*

- The unauthorized expenditure of R 2,208,523.25 in 2017/18 resulted in the exceeding the Vote.
- The unauthorized expenditure of R 14,248,580.04 in 2018/19 resulted in the exceeding the Vote.
- The unauthorized expenditure of R 91,617,553.28 in 2019/20 resulted in the exceeding the Vote.

[4] *Disciplinary steps taken against the officials responsible for the unauthorized expenditure as required by section 38(1)(h)(iii) of the PFMA, read with Treasury Regulation 9.1.3.*

- Overspending on ARV medicine - No disciplinary actions was taken against officials as patients could not be denied life-saving treatment.
- Medico-legal Claims - Over spending as a result of Higher than Budgeted for medico legal claims
- It is extremely difficult to estimate the medico-legal claims that will be settled within a financial year as the court decides which cases will be prioritised / attended to.
- 96.8 % of the claims settled over the years related to cases where the Department conceded liability. The Department settled had 404 cases (385 with conceded liability and 19 without). The percentage for 2018/19 financial years is slightly less and 95.5%.
- Where is it deemed necessary, gross transgressions are reported to the respective professional bodies for the health professionals.

[5] *Steps taken to recover any losses resulting from the unauthorized expenditure from the officials responsible in terms of Treasury Regulation 9.1.4 and 12.7.*

## 2022/23 ANNUAL REPORT

---

The unauthorised expenditure was unavoidable despite the Department implementing strict controls and was unfortunately unable to prevent the over-expenditure. The over-expenditure that was incurred was for service delivery and thus no particular official can be held accountable.

RESOLUTION 63/2022: *FRUITLESS AND WASTEFUL EXPENDITURE - R2.175 MILLION IN 2020/21 (PRIOR YEARS - R2.585 MILLION) (RELATING TO RESOLUTION 242/2021)*

Noting that:

- (a) *The department has recovered an amount of R169 531 in relation to salary overpayments made in 2020/21.*
- (b) *The department has not reported on the outcomes of the disciplinary processes or progress made therein, or on steps taken to recover the balance of the fruitless and wasteful expenditure or progress made in the recovery thereof.*
- (c) *The department has also not reported on progress made in the investigation of the fruitless and wasteful expenditure of R2.585 million in prior financial years, or on disciplinary steps taken or steps taken to recover losses.*
- (d) *The slow progress in conducting the investigations and implementing consequence management and recovery of losses is a matter of concern.*

The Committee resolves:

That the Accounting Officer report to the Committee by 30 June 2022 on:

- [1] *Progress made in finalizing all investigations relating to fruitless and wasteful expenditure, as well as in implementing consequence management and the recovery of losses.*
- [2] *The report must provide the findings and recommendations of the investigations and details of steps taken to implement the recommendations, with time frames for doing so.*
- [3] *Reasons must be provided for the slow progress, as well as steps taken to expedite the investigations and implementation of recommendations.*

### RESPONSE OF THE DEPARTMENT

The resolutions of the Committee are noted. Appended are the responses of the Department.

- [1] *Progress made in finalizing all investigations relating to fruitless and wasteful expenditure, as well as in implementing consequence management and the recovery of losses.*

## 2022/23 ANNUAL REPORT

---

In May 2022, the Department finalised investigations into Fruitless and Wasteful Expenditure to the value of R 3.143 million. The Department's Financial Misconduct Committee found that no particular individual could be held responsible in their individual capacity, and thus there would be no reasonable prospect of a successful recovery should the matter be pursued.

The cost of pursuing the investigations would not make economic sense and the cost of such investigations would possibly not only exceed the amount of the Fruitless and Wasteful Expenditure incurred but would be a costly and wasteful exercise and can constitute Fruitless and Wasteful expenditure in itself. The Accounting Officer subsequently granted approval to write the amounts off.

*[2] The report must provide the findings and recommendations of the investigations and details of steps taken to implement the recommendations, with time frames for doing so.*

Further to the above, the Department also finalised investigations into Fruitless and Wasteful Expenditure to the value of R 1.443 million in May 2022. The Institutional Loss Control Committees recommended that these amounts be written off for the reasons stated above. The Accounting Officer subsequently granted approval for the write-off of these amounts.

*[3] Reasons must be provided for the slow progress, as well as steps taken to expedite the investigations and implementation of recommendations.*

It should be noted that thirteen (13) Human Resource Management related cases to the value of R172,012.73 were fully recovered.

Cognisance should be taken of the fact that the Department views Fruitless and Wasteful Expenditure in a very serious light and has always conformed to the provisions of the Guide on Managing Discipline in the Public Service, thus ensuring that it does not fall foul of the guide and that its actions are procedurally, substantively and administratively fair thus adhering to the rules of natural justice.

With due consideration to the above, disciplinary action will be implemented where there is prima facie evidence of wilful wrongdoing or misconduct on the part of any official.

## 2022/23 ANNUAL REPORT

---

RESOLUTION 64/2022: FILLING OF CRITICAL POSTS (RELATING TO TRANSVERSAL RESOLUTION 290/2021)

Noting that:

The CFO post was re-advertised in January 2022 and a selection committee has been appointed.

The Committee resolves:

That the Accounting Officer report to the Committee by 30 June 2022 on progress made in the filling of the CFO post and anticipated time frames for the appointment to be made.

### RESPONSE OF THE DEPARTMENT

It should be noted that the post of the Chief Financial Officer (CFO) was advertised on 11 January 2022 with the closing date being 28 January 2022. Subsequently, the Department received ten (10) applications for the post.

On 18 March 2022, the shortlisting for this post was conducted and three (3) candidates were shortlisted. Subsequent to the shortlisting, the Department conducted the interviews on 31 May 2022. Cognisance should be taken of the fact that the candidates were scheduled for the competency test on 21 June 2022, and the Department is awaiting the outcome of the results from the service provider.

# 2022/23 ANNUAL REPORT

---

Standing Committee on Public Accounts - The Resolutions of The Standing Committee on Public Accounts (Scopa) Convened During October 2022 to Consider The 2021/2022 Reports of The Auditor-General on Provincial Government Departments and Public Entities: Departments of Health

1. The Standing Committee on Public Accounts (SCOPA) convened hearings during October 2022 to consider the 2021/2022 reports of the Auditor-General on provincial government departments and public entities has reference.
2. Appended are the responses of the Department relative to the Resolutions of the Committee.

## INTRODUCTION

The Department of Health has received a qualified audit opinion for the past 5 years.

The basis for the qualified opinion in 2021/22 is fivefold:

- Material Misstatements of irregular expenditure.
- Misstatements of movable tangible assets and minor assets for the third time.
- Payments for goods and services not received.
- Accruals and payables not recognised.
- Procurement and contract management

The Auditor-General has furthermore reported that:

- There has been little or no improvement in internal control.
- Management has been slow in addressing previous audit findings.
- Management has failed to implement proper control systems relating to asset management, supply chain management, expenditure management and reporting on predetermined objectives.
- The lack of oversight and monitoring by management resulted in excessive irregular expenditure and non-compliance with procurement and contracts management prescripts.
- There were material misstatements in the financial statements submitted as well as in reported performance information.
- Medico-legal claims escalating.
- Lack of effective document management system.

## 2022/23 ANNUAL REPORT

---

In responding to the resolutions noted below, the department must adequately and comprehensively indicate how each of these issues will be addressed to avoid a future recurrence.

RESOLUTION 157/2022: DEPARTMENT OF HEALTH: QUALIFIED AUDIT OPINION: IRREGULAR EXPENDITURE STATED AT R16,17 BILLION (202/211: R12.2 BILLION)

Noting that:

- (a) Transactions which did not meet the definition of irregular expenditure were incorrectly recorded as such by the department. The Auditor-General was unable to determine the impact of this misstatement.
- (b) The Auditor-General was also unable to obtain sufficient and appropriate audit evidence for irregular expenditure and was consequently unable to determine whether any further adjustments were necessary to the irregular expenditure stated at R11.55 billion.
- (c) There has been no or little improvement over the past years on internal control processes, including processes to identify and record irregular expenditure.
- (d) Section 38(1)(a)(i) of the PFMA places an obligation on an accounting officer to ensure the department has effective, efficient, and transparent systems of internal control. Wilful or negligent failure to do so constitutes an act of financial misconduct in terms of section 81(1)(a) of the PFMA.
- (e) The department has appointed a service provider to assist with the correct classification of all irregular expenditure relating to 2021/22 and prior financial years by the end of the 2022/23 financial year.

The Committee resolves: -

That the Accounting Officer comprehensively report to the Committee by 31 January 2023 on:

[1] The reasons for:

- v. The lack of effective, efficient, and adequate systems of internal control to ensure that irregular expenditure is identified and recorded correctly.
- vi. the failure by the accounting officer to exercise adequate oversight over the implementation of such systems; and
- vii. Why such failure does not constitute an act of financial misconduct.

# 2022/23 ANNUAL REPORT

---

- viii. *The measures to be implemented to ensure that adequate systems of internal control are in place and are adequately monitored henceforth to avoid ensure a recurrence.*

## RESPONSE OF THE DEPARTMENT

The Resolution of the Committee is noted. Appended is the progress report of the Department on Irregular Expenditure relative to the resolutions of the Committee.

It should be noted that the National Treasury had amended the Fruitless and Wasteful Expenditure Framework in 2019 and had instructed Departments to apply this retrospectively. The retrospective application meant transactions that had occurred prior to 2019 should be subjected to the new provisions of this amended framework. Cognisance should be taken of the fact that the Department's irregular expenditure date as far back as 2008 and the supporting documentation for these transactions have either been misplaced or lost and therefore the Department has experienced difficulty in performing an assessment and determination test, as prescribed.

### 1. CONDONATION OF IRREGULAR EXPENDITURE

In this regard the Department has undertaken the following:

- Submitted a condonation submission to the Provincial Treasury (PT) in December 2022 and this related to all transactions up to the 2013/14 financial years including transactions for the IDT and leased properties for 2014/15 for 2016/17 financial years.
- Finalised a detailed re-determination test for the condonation submission entitled "Request for condonation of Irregular Expenditure - 2021/2022 financial year" which was submitted earlier to the Provincial Treasury. This submission dealt with the expired contracts relating to security, cleaning, patient catering, and patient groceries.
- Further, the Department is currently assessing whether there are other cases for possible condonation which should be submitted to the PT and in this regard, the Department is planning to finalise and submit all condonation submissions before the end of February 2023.

### 2. ASSESSMENT AND DETERMINATION TESTING

The Department has assembled a team consisting of various officials from Supply Chain Management, Finance, etc. to assist with the assessment and determination testing of Irregular Expenditure. This team has analysed the Irregular Expenditure declared in the previous financial years and as reported in the report of the Auditor-General for the same periods. This

## 2022/23 ANNUAL REPORT

---

information has assisted the Department in developing a comprehensive Irregular Expenditure plan aimed at resolving this qualification.

In this regard, an assessment and determination template has been developed and finalised which will be used for the 2022/23 financial year. The questionnaire for the assessment is being reviewed and will be finalised soon. The training of the team will commence as soon as all necessary documents and preparatory work has been completed. The actual work relating to the assessment and determination has commenced in the last week of January 2023. All cases requiring further investigation will be referred to the Departments Investigation Unit for further processing.

RESOLUTION 158/2022: DEPARTMENT OF HEALTH: QUALIFIED AUDIT OPINION: MISSTATEMENTS OF MOVABLE TANGIBLE CAPITAL ASSETS (R5.5 BILLION) AND MINOR ASSETS (R595 MILLION)

Noting that:

- (a) *The finding of the Auditor-General that the department did not correctly record movable tangible capital assets and minor assets and applied incorrect criteria to fair value its assets and that the Auditor-General was unable to determine the impact of the misstatements and to obtain sufficient appropriate audit evidence for movable tangible capital assets and minor assets.*
- (b) *Consequently, the Auditor-General was unable to determine whether any adjustments were necessary to the movable tangible assets stated at R5.5 billion and minor assets stated at R595 million.*
- (c) *The department, commenced with physical verification of all movable and transport assets in October 2022, the process is anticipated to be completed on the 31 January 2023.*

The Committee resolves: -

*That the Accounting Officer report to the Committee by 31 January 2023 on progress made in resolving this audit finding and steps taken to facilitate a speedy resolution of the matter.*

### RESPONSE OF THE DEPARTMENT

The Resolution of the Committee is noted. Appended is the progress report on Asset Management.

# 2022/23 ANNUAL REPORT

---

## 1. VALUATION

- The revised valuation methodology has been discussed with KwaZulu-Natal Provincial Treasury and a preliminary discussion with National Treasury had occurred where no major concerns were raised by National Treasury except for clarity-seeking questions on some aspects of the valuation methodology. It was resolved that an official meeting between the Department, the Provincial Treasury and the National Treasury will be scheduled during January 2023 and thereafter the National Treasury will provide a written opinion on the revised valuation methodology.
- The valuation methodology will then be shared with Auditor-General to reach a principal agreement before implementation. The consultation with Auditor-General is anticipated to take place towards the latter part of January 2023.
- The implementation of the revised methodology will commence in January 2023 and will be finalised by the end of March 2023.
- Head Office asset management officials had commenced with the exercise to standardise the asset descriptions, and this will be completed in January 2023. A cost database consisting of the 2021/22 asset additions and 2022/23 Quarter 1 and Quarter 2 asset additions has been compiled.
- The payment vouchers to support the asset base values database, to be used for the fair valuation exercise has been filed electronically.
- The review of conditional grading from the 2022/23 verification data will be ongoing until the completion of the annual asset physical verification exercise, by February 2023.
- Notwithstanding the above, capacity challenges remain a critical risk in the completion of the valuation work as the same Head Office officials, in addition to their normal duties, will be expected to work on this historical valuation backlog within very limited timeframes. It is anticipated that additional resources may be required to assist with the completion of the valuation work in time for the asset register submission and the regulatory audit.

## 2. EXISTENCE and COMPLETENESS

- The Department commenced with the 2022/23 annual physical verification of all movable and transport assets in October 2022.
- The physical verification is taking into account the revised asset conditional grading which will be used to adjust the base values in line with the revised valuation methodology.

## 2022/23 ANNUAL REPORT

---

- The physical verification of assets will also assist in identifying assets for disposal, which may reduce the number of assets to be fair valued.
- The verification data is being timeously reviewed and any identified errors and exceptions are being corrected timeously.
- The scanners being used for verification have aged beyond their useful life and these constantly breakdown. This directly poses a huge risk in completing the verification exercise in time and therefore compromising the assurance to completely limit the audit risk on existence and completeness of assets.
- The new scanners ordered in 2022 have since been received and are now being prepared for distribution across the province. Training on their usage is also being arranged and this is anticipated to commence immediately and to be concluded during the week ending 10 February 2023.
- Schedules for "Theft and Loss" assets that are under investigation have been extracted for institutions to investigate further. Theft and Loss cases' resolutions include assets being found during the 2022/23 annual asset physical verification exercise and the asset register has been subsequently updated accordingly. Further, all institutions will be required to submit reports for all theft and loss cases that have been investigated and closed by end of January 2023. This will allow the Head Office to request the approval for the write-off thereof.

RESOLUTION 159/2022: DEPARTMENT OF HEALTH: QUALIFIED AUDIT OPINION: PAYMENTS FOR GOODS AND SERVICES NOT RECEIVED (R16.15 BILLION)

Noting that:

- (a) *The Auditor-General was unable to obtain sufficient appropriate evidence that payments made were in respect of goods and services received by the department, as internal controls had not been established to confirm the receipt of goods and services.*
- (b) *The partial and phased-in implementation of the Goods Receipt Notebook (GRN) was not considered adequate by the Auditor-General.*
- (c) *Consequently, the Auditor-General was unable to determine whether any adjustments were necessary to goods and services stated at R16.15 billion.*
- (d) *Section 38(1)(a)(i) of the PFMA places an obligation on an accounting officer to ensure the department has effective, efficient, and transparent systems of internal control.*

# 2022/23 ANNUAL REPORT

---

*Wilful or negligent failure to do so constitutes an act of financial misconduct in terms of section 81(1)(a) of the PFMA.*

- (e) The department has fully implemented and enforced the use of the Goods Received Notebooks in the 2021/22 financial year and has commenced with internal control assessments to ensure compliance, however, these did not yield results.*
- (f) The department will continue to implement corrective measures till the qualification is completely cleared.*

*The Committee resolves: -*

*That the Accounting Officer report to the Committee by 31 January 2023 on:*

- [1] The reasons for not implementing an adequate system of internal control as contemplated by section 38(1)(a)(i) of the PFMA and why this does not constitute an act of financial misconduct.*
- [2] An evidence-based assessment of the effectiveness of the implementation of the Goods Received Notebooks as a system of internal control as contemplated by section 38(1)(a)(i) of the PFMA to address this audit finding and to avoid a recurrence.*

## RESPONSE OF THE DEPARTMENT

The Department has fully implemented and utilised the Goods Received Note (GRN) to record the receipts of goods and services. This process which has now been fully institutionalised had commenced in the preceding audit period, as evidenced by the Auditor-General issuing a modified audit opinion. This will result in the complete clearing of the qualification in the next audit cycle.

RESOLUTION 160/2022: DEPARTMENT OF HEALTH: QUALIFIED AUDIT OPINION: MISSTATEMENTS OF ACCRUALS (R528,61 MILLION) AND PAYABLES NOT RECOGNISED (R998,93 MILLION)

*Noting that:*

- (a) The department did not adequately record accruals and payables not recognised, due to inadequate systems and processes to account for this disclosure. The Auditor-General was unable to determine the impact of the misstatements.*
- (b) Consequently, the Auditor-General was unable to determine whether any adjustments to accruals stated at R 528,61 million and payables not recognised stated at R998,93 billion were necessary.*

## 2022/23 ANNUAL REPORT

---

- (c) Section 40(1)(b) of the PFMA places an obligation on the accounting officer to prepare financial statements in accordance with generally recognised accounting practice. Wilful or negligent failure to do so constitutes an act of financial misconduct in terms of section 81(1)(a) of the PFMA.
- (d) The department has not been able to accurately record accruals and payables not recognised, due to the lack of a computerised logistical information system. The department is in the process of implementing LOGIS and have trained sixty-five (65) users on the system.

The Committee resolves: -

That the Accounting Officer report to the Committee by 31 January 2023 on progress made in the implementation of LOGIS and provide an evidence-based assessment of the effectiveness of the system to address this audit finding as well as assurance that a recurrence will be avoided.

### RESPONSE OF THE DEPARTMENT

In this regard, the Department has adopted a phased-in implementation plan over a period of three (3) years for LOGIS, due to the unavailability of both the National Treasury and the Provincial Treasury to provide the requisite support. The Department needs to have in excess of 1,400 officials trained across the province prior to them being granted access to the system to transact. This training is on-going, subject to the availability of the National Treasury. The project plan is progressing according to schedule.

### RESOLUTION 161/2022: DEPARTMENT OF HEALTH: UNCERTAINTY RELATING TO THE OUTCOME OF LITIGATION (R17,01 BILLION)

Noting that:

- (a) The department is the defendant in various litigation matters relating to medical negligence and other claims against the state amounting to R 17,01 billion. This figure represents an increase of R2.984 billion in respect of medico-legal claims in 2020/21.
- (b) This potential liability places a strain on the public health sector and the budget of the department and is a matter of concern.
- (c) The department is faced with a challenge of growing medico-legal claims which now sits at approximately R26 billion. Majority of cases are relating to Obstetrics and Gynaecology.

## 2022/23 ANNUAL REPORT

---

- (d) A total of R268 million was paid in the current year. 57% of the payments related to the eThekweni Region for which the highest payments were relating to cases in Prince Mshiyeni Hospital.
- (e) Some of the Patient Safety Incident (PSI) cases were not closed or the closure of the cases were delayed at Prince Mshiyeni Hospital. Delays were also identified in the closure of patient complaints. Delays in the closure of PSI cases and patient complaints may increase the likelihood that patients affected by such cases may turn to litigation for redress.
- (f) Root causes identified include shortage of medical/administration staff, poor controls over filing and storage of medical files as well as delays in addressing cases relating to PSI.
- (g) Monies paid for legal claims could be used for improving the lives of the citizens through service delivery. The e-health electronic patient management system is currently only being utilised at four hospitals for chronic illnesses with additional functionalities still to be added.
- (h) Manual patient carrier cards linked to a patient folder were still being used throughout the province and the inability to locate patient files, as well as deficiencies in patient information recorded resulted in a disclaimer of audit opinion in APO. It is also one of the root causes for some of the medico-legal claims.

The Committee resolves: -

That the Accounting Officer report to the Committee by 31 January 2023 on:

- [1] A breakdown of the medico-legal claims, per hospital, as well as the age, value, and nature of each claim.
- [2] The number and value of the claims that were successfully defended in 2021/22 and the two financial years prior thereto.
- [4] An assessment of the impact of the lack of proper record-keeping on the liability of the department for claims paid in 2021/22 and the two financial years prior thereto, either by way of court order or a settlement.
- [5] Outcome of strategies adopted by the department to mitigate its liability in respect of medico-legal claims, including but not limited to early investigation and settlement of claims where liability is established, improved record-keeping for evidential purposes, use of alternative dispute resolution mechanisms, use of private sector expert legal practitioners to defend claims, contingency fee arrangements and training of staff to avoid future claims, and the like.

## 2022/23 ANNUAL REPORT

---

[6] *Progress made in law reform and legislative interventions pertaining to medico-legal claims in the public health sector, including capping of claims and other interventions as proposed by National Treasury in 2020.*

### RESPONSE OF THE DEPARTMENT

The Resolution of the Committee is noted. Appended are the responses of the Department relative to the resolutions of the committee.

[1] *A breakdown of the medico-legal claims, per hospital, as well the age, value and nature of the claim*

A breakdown provided to the Committee as required

[2] *The number and value of the claims that were successfully defended in 2021/2022 and the two financial years prior thereto.*

- *It should be noted that 93.2% of all cases settled in the last 3 years are with conceded liability or 68 of 73*
- *Percentage paid is decreasing over the years 2019/2020 64.2% 2020/2021: 56.9% and 2021/22 :50,3%*
- *Most cases related to cerebral palsy under Obstetric and Gynae.*
- *Average amount paid per case is R 7,3m and highest for paediatrics and Obstetrics.*
- *Note the low number of cases settled per annum 73 over 3 years and less than 40 per annum*
- *Backlogs continue to increase as new cases with summons per annum by far exceed the cases settled.*
- *Covid impact is noticeable 2021 fin year.*

[3] *An assessment of the impact of the lack of proper record-keeping on the liability of the department for claims paid in 2021/22 and two financial years prior thereto, either by way of court or a settlement*

In addressing this matter, cognisance should be taken the following:

Although undoubtedly there are instances where medical records go missing, and such occurrences have a negative impact on the outcome of a particular matter, it would be too simplistic a conclusion to draw to assume that missing records were the principal reason for a decision to concede liability.

In the main the decision to concede liability is made on account of a failure to comply with prescribed known standards and / or negligence either through omissions or commissions. In some instances, the record is present but improperly completed or not properly maintained.

## 2022/23 ANNUAL REPORT

---

In every instance a decision to concede liability is ultimately based on the opinions of our own expert clinicians.

There are some difficult matters where the presence of certain records would perhaps have made a positive contribution to the Department's case. There have been instances where challenges were experienced which related to the security of medical records. The Department is attempting to address these challenges by:

- Rolling out of an electronic record keeping system, where possible. This would require substantial financial resources for which the Department would require support in order for it to achieve its objectives.
- Convening frequent workshops and issuing communiques to highlight the problem and suggesting risk mitigation strategies in order to minimise the risk.

In respect of the specific question regarding how many decisions to concede liability were made in the 2019/2020, 2020/2021 and 2021/2022 financial years, the Departments analysis has revealed the following:

- Liability was conceded for 39 matters.
- Out of the 39 matters, in only one instance, could it be stated that liability was conceded based primarily on the fact that there were no medical records.

[4] *Outcome of strategies adopted by the department to mitigate its liability in respect of medico-legal claims, including but not limited to early investigation and settlement of claims where liability is established, improved record-keeping for evidential purposes, use of alternative dispute resolution mechanisms, use of private sector expert legal practitioners to defend claims, contingency fee arrangements and training of staff to avoid future claims, and the like.*

- Quality Management under Clinical Services and Clinical Governance continuously update the mitigating strategies within the available resource and human capability mix. Facilities receive information of all cases approved and settled to assist them to prevent a re-occurrence of the event. Record keeping at facilities is mainly manually and problematic; insufficient progress has been made to go digital.
- Only recently have private firms of attorneys been engaged to actually run cases for and on behalf of the Department. As such it is too early to indicate whether the engagement of private attorneys have had a positive effect.
- There are occasions where individual state attorneys acquit themselves very well and as well as any other private firm would have.

## 2022/23 ANNUAL REPORT

---

- There are also indications that where some private firms have been engaged to act for and on behalf of the Department, they have done no better and sometimes worse than the Office of the State Attorney.
- It is most important to bear in mind that medico legal litigation is a specialised field and that not every private legal firm is necessarily equipped to provide a better service than that which is provided by the office of the state attorney's office.
- It must be understood that the current medico-legal crisis is a complex issue and will ultimately require legislative intervention. At the end of 2021, the SA Law reform commission published a long-awaited paper on the subject. The Department together with other provincial Departments provided input to the law reform commissions' paper. The SA Law reform commission gave the distinct indication that it refused to deal with the problem piece-meal. It is expected that there might be considerable delays before the SA law reform commission actually passes the necessary legislation required to deal with the problem.
- Notwithstanding this the medico-legal unit currently functioning under the legal services unit produced a detailed comprehensive medico-legal strategy entitled medico legal plan. This plan analyses in detail the problem of medico legal claims and has made numerous recommendations as to how the Department might best address it.
- However, the Department faces the following dilemmas:
  - On the one hand, due to the Office of the State Attorney being so overburdened, the delivery of legal representation is less than satisfactory and to address this matter, the Department has been forced to contract private attorneys.
  - The cost involved in so doing is enormous and could in some instances prove counterproductive.
  - Due to medico-legal litigation being a specialised and developing field, the engagement of private attorneys will not necessarily provide a better result in every instance.
- A potential solution to the problem might best be addressed if the Department of Justice addresses the problem surrounding an overburdened State Attorney.
- Alternatively, a specialised medico-legal claims unit with proper resources and back-up might better address the problem.
- Training of staff and review of clinical negative outcomes with development and updating of policies is on-going.

## 2022/23 ANNUAL REPORT

---

- The Department is in the process of developing a policy on mediation which would facilitate a process of alternative dispute resolution. The Department has already implemented as a standard practice, that when letters of demand have been received, potential litigants are invited to resolve the matter through mediation. The Department has already as a standard practice, even when litigation has been commenced through the issue of summons, invoked the provisions of rule 41A. These offers have not been accepted by the plaintiffs and there is little the Department, or anyone can do to enforce that since it is the constitutional right of any person to have their matter heard in court.
- It also appears that mediation is most effective shortly after the event (Patient Safety incident/Adverse incident) has taken place. Mediation loses its efficacy after the plaintiff has resorted to litigation.

[5] *Progress made in law reform and legislative interventions pertaining to medico-legal claims in the public health sector, including capping of claims and other interventions as proposed by National Treasury in 2020.*

- A Public Health Sector strategy was developed; however, the implementation has been progressing very slowly.
- As indicated the responses, the SA Law reform Commission have been very slow, and the necessary legislation required to address the problem is not expected to be rolled out very soon. As indicated the Department has in fact developed a comprehensive detailed plan to address the situation.

RESOLUTION 162/2022: DEPARTMENT OF HEALTH: PREDETERMINED OBJECTIVES:  
PROGRAMME 2 - DISTRICT HEALTH SERVICES

Noting that:

- (a) *The supporting evidence for the HIV and TB-related indicators, Maternal health-related indicators and fatality rate indicators differed materially from the reported achievement. This was due to the lack of accurate and complete records.*
- (b) *The Auditor-General was unable to obtain appropriate audit evidence for the reported achievements in the Ideal Clinic Status rate, due to the lack of accurate and complete records.*
- (c) *Section 40(3)(a) of the PFMA provides that the annual report submitted by the Accounting Officer must fairly present the situation of the department, including its performance against predetermined objectives, and the wilful or negligent failure to do so constitutes an act of financial misconduct in terms of section 81(1)(a) of the PFMA.*

# 2022/23 ANNUAL REPORT

(d) *The department has conducted refresher training sessions on Monitoring and Evaluation, Data Management and Planning activities and has updated its Audit Improvement Plan and will monitor progress monthly, in addition to other measures implemented to ensure accuracy of the performance information.*

The Committee resolves: -

That the Accounting Officer report to the Committee by 31 January 2023 on:

- [1] *The reasons for the lack of monitoring the accuracy of reported performance information and why this does not constitute an act of financial misconduct.*
- [2] *An evidence-based assessment of the effectiveness of the measures implemented to address this audit finding and to provide assurance that the measures implemented will avoid a recurrence.*

## RESPONSE OF THE DEPARTMENT

The Resolution of the Committee is noted. Appended are the responses of the Department relative to the resolutions of the committee.

- [1] *The reasons for the lack of monitoring the accuracy of reported performance information and why this does not constitute an act of financial misconduct.*

The Department acknowledges that the reports indicate poor performance based on the audit findings. It also acknowledges that these are recurring findings from the last financial year. As a department, we have seen a slight improvement in certain aspects of the audit report where error rates were reduced from previous years. The previous report sent to the committee listed the interventions that the Department initiated in order to mitigate some of these findings. Please find the major interventions listed below:

Action / Activity	Progress
The Department will be conducting comprehensive training/orientation on all M&E, Data Management and Planning guidelines and policies to all districts. These training sessions will cover all audit findings, gaps identified and will highlight critical expectations from the facilities	Training has been completed in all of the 11 districts. All aspects relevant to the audit have been extensively addressed and will be monitored through the AIP as well as through on-site visits. These training sessions included technical workshops, audit roadshows and general monitoring and evaluation, planning and data training.
The Department will continue monitoring the Audit Improvement Plan on a monthly basis. This document will act as a tool to monitor compliance to all post audit activities that were committed to by the districts.	All districts are submitting status of implemented action in respect of the audit improvement plan, on a monthly basis. Feedback is provided to districts where evidence of improvement is lacking.
The Department to implement verification, reconciliation and internal audit tools that have	Tools have been developed and fully implemented at all Hospitals and CHC's.

## 2022/23 ANNUAL REPORT

Action / Activity	Progress
been revised to ensure that they are directly linked to accountability at each level. This initiative to <b>enforce compliance to the SOP's as well as ensure sign off by the Accounting Officer based on reliable data.</b>	However, due to these tools not being able to be monitored at the Provincial level, these will be reviewed during facility visits. Facility Managers to ensure that this is being completed earnestly.
The Department will conduct regular mini audits to confirm the adequate implementation and <b>operational effectiveness of the SOP's.</b>	The Department (Provincial Office) has conducted 103 facility visits and will continue to provide support and mentorship to individual facilities to ensure they fully understand the expectations from the Department.
The Department commits to visiting all CHC's prior to the commencement of the next audit, providing support and mentoring. Cato Manor and Nseleni CHC will be prioritised.	15 of the 23 CHC's have been visited up until December 2022. Quality Improvement plans <b>have been developed for each of the CHC's.</b> These facilities will be assessed again during the year.
Feedback will be provided to all facilities who are found to be non-compliant to the policies and <b>SOP's and the overall mismanagement of data</b>	Feedback reports have been shared with Management Teams following mini audits at facilities.

While the above interventions are in place and the Department is satisfied at this time with its progress, there are still elements that exist that need to be considered which may explain the continuous recurring findings for performance information.

Some reasons for deviation are provided below:

1. Low district/provincial staff to facility ratio. There are limited resources in the information field that are available to perform support visits to monitor data on a regular basis. The Provincial Office is responsible for ensuring that the relevant policies are developed and implemented. However, we find there is still non-compliance at lower levels which is not possible to pick up during desktop reviews. With the huge number of public health facilities, it is almost impossible to provide individual support to all facilities.
2. There are still manual data collection systems within our facilities which make up for huge volumes of paper and data reported daily. This makes it difficult to monitor all steps in the information system at a facility when visited.
3. Manual data collection also impacts on high risk of error rates.
4. Review of data takes place at District and Provincial levels on a regular basis. Data is reviewed using available functionalities (albeit limited) on the system. Monthly data is compared to identify outliers in the system. If the data trend does not show any outliers, it is very difficult to pick up errors at higher levels without having access to the data source to do a complete recount of data.

## 2022/23 ANNUAL REPORT

---

5. Data verification needs to be strengthened as a daily task by facility staff. The Department has run workshops with the relevant M&E staff to address this, with the onus on facility-based staff to monitor daily outputs from staff at each facility.

The Department does not feel that this is an act of financial misconduct, as the errors identified at facility level are not intentional. Reasons for the errors are listed above. The Provincial Office has access to an electronic system (webDHIS) which it utilises to extract all data for reporting purposes. All data that is extracted for the compilation of the Annual Performance Report is as exactly as reported on the system. This has been audited previously and have found to be done in accordance to the policies. The extracting of data is done following an extensive verification process by districts and facilities, and in line with the District Health Management Information System policy. However, it is not possible for the Department to identify errors when compiling the report that is caused by human error or from negligence at lower levels.

The Department will be consulting with the Office of the Auditor-General to determine the most reasonable and effective way of auditing the Departments report. The Department would recommend auditing the report against an electronic system and not against paper-based records.

Notwithstanding the above, the error rates have been reduced from previous years. Despite the context of an environment with limited storage space, manual collection tools, an information system that is not captured at point of service and limited warm bodies to carry out the work needed to monitor data full time, error rates are being addressed, in a phased approach. The Department is currently working on promoting a culture of understanding the importance of performance information and records management within a facility to improve data quality.

### Strategic Health Programme

The Departments Strategic Health Programme (SHP) Managers are conducting:

- Facility support visits during the second week of every month to audit reported performance information (key SHP indicators) against source documents,
- Patient files audits to check adherence to programme policies, guidelines and SOPs.

In this regard, the key findings with recommendations are being shared with facility management and quality improvement plans are developed onsite during the visit and monitoring is undertaken during subsequent visits.

Further, the CHC's will also form part of the facilities that would be visited by SHP Managers. The support visits will be undertaken jointly with Data Management team, where feasible.

## 2022/23 ANNUAL REPORT

---

SHP has instructed all districts to allocate daily targets to Data Capturers (DC) to capture at least 120 patient files per Data Capturer. In cases of low volume facilities, the Data Capturers were instructed to capture all patient files on the Tier.net system on daily basis and all system modules to be updated daily.

The Primary Health Care Operational Managers have been instructed to monitor the Data Capturers workload report on a weekly basis to monitor if the Tier.net system is updated daily, as expected at their facilities. In addition, facilities have been instructed to appoint HAST and MCWH champions who are responsible for actioning the Tier.net line lists reports on a weekly basis. These initiatives are aimed at improving data that is generated from Tier.net monthly, quarterly and captured/loaded into the webDHIS.

Furthermore, SHP has recruited more than 400 Data Capturers who have been allocated in facilities (others form part of District roving teams) and 24 District HAST FIOs to complement the existing staff in order to improve data quality at a facility level. SHP has also procured desktop computers and allocated these to facilities to support the rollout of the Tier.net system.

### Ideal Clinic

All Primary Health Care facilities are utilising the Ideal Clinic website to capture the findings from the self- assessments in the first quarter. The Perfect Permanent Team verifies the Facility self -assessment and captures this onto the system by end of the second quarter. The system is able to retrieve the Ideal clinic results from the previous years. Facilities implement Quality Improvement Plans (QIPs) that are generated by the system, quarterly, to address all gaps.

Quarterly engagements with District Directors, Clinical and Programmes Managers, Quality Assurance Co-ordinators and Infection Control and Prevention Co-ordinators will commence in January 2023. These engagements will be in the form of field visits (converging at one facility to do a walk about and address Ideal clinic concerns as a Provincial team)

*[2] An evidence-based assessment of the effectiveness of the measures implemented to address this audit finding and to provide assurance that the measures implemented will avoid a recurrence*

The Department will conduct face to face visits to facilities in order to assess and evaluate them. The Provincial Department has committed to visiting all CHC's before March 2023 in an effort to improve operations and systems at each of these facilities. Management Teams at the CHC will ensure that all recommendations are carried out, and that District teams provide further oversight. Evaluations will be conducted 3 months following the visit to a selected number of CHC's. The first revisit will be done in January 2023 to assess improvements. 15 out of 23 CHC's have been completed so far.

## 2022/23 ANNUAL REPORT

In addition to the above, the Department has completed a follow up visit at one of the audited facilities and it was identified there has been some noted improvement in some of the data elements. The Department will continue to support the CHC's where possible to note their improvements.

Data element	JUNE 2022 VISIT			JAN 2023 VISIT		
	WEB DHIS	PHC TICK REGISTER	ERROR RATE	WEB DHIS	PHC TICK REGISTER	ERROR RATE
Antenatal 1st visit before 20 weeks	103	97	6	125	112	10

RESOLUTION 163/2022:      DEPARTMENT OF HEALTH: ANNUAL FINANCIAL STATEMENTS: MATERIAL MISSTATEMENTS NOT CORRECTED

Noting that:

- (a) The financial statements submitted for auditing were not prepared in accordance with the prescribed financial reporting framework and supported by full and proper records.
- (b) Material misstatements of a disclosure item identified by the auditors were corrected but the uncorrected material misstatements and supporting records that could not be provided resulted in the financial statements receiving a qualified opinion.
- (c) Section 40(1)(a) and (b) of the PFMA provide that an accounting officer must keep full and proper records of the financial affairs of the department and prepare financial

## 2022/23 ANNUAL REPORT

---

statements in accordance with generally recognised accounting practice. Wilful or negligent failure to do so constitutes an act of financial misconduct in terms of section 81(1) of the PFMA.

- (d) These misstatements relate to the audit findings on the incorrect recording of irregular expenditure, movable tangible capital assets and minor assets, accruals and payables not recognised and payment of goods and services.

The Committee resolves: -

That the Accounting Officer report to the Committee by 31 January 2023 on:

An evidence-based assessment of the effectiveness of the measures implemented to address these audit findings and to provide assurance that a finding of uncorrected material misstatements on the same or similar grounds will not re-occur.

### RESPONSE OF THE DEPARTMENT

The Resolution of the Committee is noted. Appended are the responses of the Department.

The Departments Annual Financial Statements (AFS) were prepared in terms of the guidelines and template issued by the National Treasury. However, due to the nature of the findings on Irregular Expenditure, Moveable Tangible Capital Assets and minor assets, Accruals and Payables not recognized, and payments for Goods did not receive the material adjustments relative to these disclosures could not be effected to the AFS.

Investigations will be undertaken to determine if any official acted wilfully or negligently. Further, the Department has experienced capacity constraints in key areas, and this is being addressed with appointments in key positions at both the head office and at institutions.

Refer to the responses for resolution 157/2022 Irregular expenditure, resolution 158/2022 moveable tangible Capital Assets and minor assets, 159/2022 payment for goods and services not received, and resolution 160/2022 accrual and payables not recognised on a detailed action plan being implemented.

### RESOLUTION 164/2022: DEPARTMENT OF HEALTH: EXPENDITURE MANAGEMENT: NON-PAYMENT OF INVOICES WITHIN 30 DAYS

Noting that:

- (a) Some payments were not made within 30 days or an agreed period after receipt of an invoice, as required by Treasury Regulation 8.2.3.
- (b) The department achieved an overall compliance level of 95.48%.

## 2022/23 ANNUAL REPORT

---

- (c) *The department has attributed its failure to achieve a 100% compliance to matters such as the size of the department and high volumes of payments, a shortage of critical skills and vacant posts, system downtime and the lack of a computerised system.*

*The Committee resolves: -*

*That the Accounting Officer report to the Committee by 31 January 2023 on the outcome of steps taken to address this finding and an evidence-based assessment of the effectiveness of the measures implemented to prevent a recurrence.*

### RESPONSE OF THE DEPARTMENT

The Resolution of the Committee is noted. In this regard, the Department has implemented the following strategies to address the abovementioned challenges:

- Shortage of critical skills and vacant posts
  - The Department has commenced with the processes of filling vacant posts. However, the process is slow due to the lack of funding. The Department has engaged with Provincial Treasury to assist with funding for vacant posts.
- Systems downtime
  - The Department has engaged with Telkom SA who is currently implementing the alternative connectivity strategy through the existing DOH/Telkom Master Service Agreement (MSA).
  - This project is being rolled out to all the hospitals across the province in two phases i.e. Phase One, is for 42 prioritised hospitals that are planned to be completed within this financial year (2022/23) and Phase Two, will be to implement the solution to the remaining hospitals in the next financial year.
  - Phase One - The site assessments for the 42 hospitals has been completed and the implementation of the alternative connectivity strategy is underway.
  - Phase Two - The site assessments for the remaining hospitals has been completed and the implementation will take place in the 2023/24 financial year.
  - Due to the ongoing connectivity challenges and over utilised SITA network, the alternative connectivity strategy that is being implemented will run parallel to the SITA network and will carry non-transversal services data (e.g. KZN eHealth system, PACS/RIS, MS Teams), whilst the SITA network will continue to focus on transversal services (e.g. BAS, LOGIS and PERSAL).

# 2022/23 ANNUAL REPORT

---

- This will address the ongoing SITA connectivity challenges by freeing crucial non-transversal systems and the transversal systems which will be running in parallel.
- Lack of computerised system
  - The Department has implemented LOGIS at the uMgungundlovu District Office and at Head Office. The Department took a decision to implement LOGIS in these two pilot sites to reduce the risks associated with changing systems and disruption. Three (3) other sites will be going live in the new financial year.

## RESOLUTION 165/2022: DEPARTMENT OF HEALTH: NON-COMPLIANCE: PROCUREMENT AND CONTRACT MANAGEMENT

Noting that:

- (a) *The Auditor-General made the following findings in relation to non-compliance with procurement and contract management prescripts:*
- i. Limitations relating to the use of competitive bidding and quotation processes.*
  - ii. Procurement without inviting competitive bids.*
  - iii. Limitation relating to confirmation on whether awarded suppliers were involved in any corrupt activities.*
  - iv. Limitations relating to confirming whether preference point system was applied in the procurement of goods and services above R30 000.*
  - v. Some of the contracts were awarded to bidders that did not score the highest points in the evaluation process.*
  - vi. Some of the contracts were extended or modified without the approval of a properly delegated official.*
  - vii. Local content – Bid documents not stipulating minimum requirements.*
  - viii. Conflict of interest - Persons in service of the department with interests in the awards of the department failed to disclose interest.*
  - ix. Conflict of interest – Some of the persons in service of the department whose close family members, partners or associates had an interest in contracts awarded by the department failed to disclose the interest.*

The Committee resolves: -

That the Accounting Officer report to the Committee by 31 January 2023 on:

## 2022/23 ANNUAL REPORT

---

- [1] *The reasons for the lack of proper controls and the exercise of proper oversight in monitoring compliance with applicable supply chain management prescripts and why this does not constitute an act of financial misconduct.*
- [2] *The reasons for the failure by the Accounting Officer to prevent the abuse of the supply chain management system as required by Treasury Regulation 16A.9.1, to reject bids from suppliers whose tax matters had not been declared by SARS to be in order as required by Treasury Regulation 16A.9.1(d), or to reject awards to suppliers who committed a corrupt or fraudulent act in competing for the contract were rejected as required by Treasury Regulation 16A.9.1(e) and 16A.9(2)(a)(ii).*
- [3] *Evidence that the measures put in place to address each of the areas of non-compliance identified by the Auditor-General have been effective in ensuring compliance with the legislative prescripts relating to contract and procurement management and to avoid a recurrence.*
- [4] *Disciplinary steps taken against all officials responsible for the transgressions identified by the Auditor-General, the outcomes thereof, specific sanctions imposed and time frames for finalisation of the disciplinary matters.*
- [5] *Steps taken to address the lack of a proper records management system, time frames for implementation of interventions and an assessment of the effectiveness of the measures implemented to address the findings of the Auditor-General in this regard.*

### RESPONSE OF THE DEPARTMENT

The Resolution of the Committee is noted. Appended are the responses of the Department relative to the resolutions of the committee.

- [1] *The reasons for the lack of proper controls and the exercise of proper oversight in monitoring compliance with applicable supply chain management prescripts and why this does not constitute an act of financial misconduct.*

The manual nature of the existing system has made monitoring compliance a challenge in the Department. In order to mitigate this, a CEO reporting pack has now been implemented whereby CEOs report on a monthly basis on the goings on in each facility.

- [2] *The reasons for the failure by the Accounting Officer to prevent the abuse of the supply chain management system as required by Treasury Regulation 16A.9.1, to reject bids from suppliers whose tax matters had not been declared by SARS to be in order as required by Treasury Regulation 16A.9.1(d), or to reject awards to suppliers who*

## 2022/23 ANNUAL REPORT

---

*committed a corrupt or fraudulent act in competing for the contract were rejected as required by Treasury Regulation 16A.9.1(e) and 16A.9(2)(a)(ii).*

The Department previously checked the status of tax compliance during the evaluation stage. Unfortunately, entities would sometimes run into trouble during the period of evaluation and final award resulted in an altered tax status. The Department has now made it mandatory that a CSD report is drawn to check tax compliance on the morning of the Bid Adjudication Committee meeting.

*[3] Evidence that the measures put in place to address each of the areas of non-compliance identified by the Auditor-General have been effective in ensuring compliance with the legislative prescripts relating to contract and procurement management and to avoid a recurrence.*

The Department has adopted a new SCM Policy; Delegations of Authority; and Standard Operating Procedures that have been workshopped extensively across the districts.

*[4] Disciplinary steps taken against all officials responsible for the transgressions identified by the Auditor-General, the outcomes thereof, specific sanctions imposed and time frames for finalisation of the disciplinary matters.*

Pursuant to receiving the various audit reports, the Department has been reviewing the findings to identify officials who were responsible for transgressions that were identified by the Auditor-General. Once this has been finalised, an investigation will be undertaken if it is suspected that there was any financial transgressions as well as if fraudulent, corrupt or criminal acts had occurred which resulted in the incurrence of irregular expenditure. Once completed, this investigation will then provide the Head of Department with at least the following facts about the transactions as well as information relating to the:

- Root causes that led to the transgression.
- Impact of the transgression.
- Information on fraudulent, corrupt or criminal related act(s)
- Employee(s) responsible for the irregular expenditure.
- Loss suffered by the Department.
- Whether the matter must be referred to the law enforcement agencies; and
- Any breakdowns in the designed internal controls and the impact thereof.

Once the investigations have been concluded and an official/s have been identified as liable, the relevant consequence management processes will be implemented, and appropriate actions taken against the responsible officials.

## 2022/23 ANNUAL REPORT

---

Further, cognisance should be taken of the fact that the Department applies the consequence management framework to address misconduct, fraud, corruption, unethical behaviour and poor performance and in this regard, has received a number of investigation reports that has presented findings and recommendations which require implementation to effect accountability, compliance and oversight.

In order to achieve the above, the Department has implemented the following:

- Disciplinary action has been implemented against officials implicated in fraud, corruption, unethical conduct or financial mismanagement.
- As at 31 December 2022, the Department had processed eight (8) forensic investigations reports and the implicated officials were sanctioned as follows:
  - Three (3) officials have resigned from the Department prior to the disciplinary action being instituted against them. PERSAL records were updated to ensure that the disciplinary process continues in the event that they are subsequently re-appointed in the Public Service.
  - Three (3) officials were issued with final written warnings and three (3) months suspension without pay.
  - One (1) official was issued with a written warning.
  - One (1) official was dismissed from the Public Service.

In response to the prevalence of fraud, corruption and mismanagement of financial resources, Department has sought a number of remedies to curb these anomalies by reviewing its policies, embarking on proper management of records and developing Standard Operating Procedures (SOPs).

*[5] Steps taken to address the lack of a proper records management system, time frames for implementation of interventions and an assessment of the effectiveness of the measures implemented to address the findings of the Auditor-General in this regard.*

The availability of physical storage space is a challenge in the Department. This makes the filing systems to be less than ideal; however, the Department is embarking on a process whereby all documents are scanned prior to being filed to ensure that a record is kept of the transactions. At Head Office this has been fully implemented and facilities are also in the process of implementing. The challenges being addressed are the availability of high speed/ industrial scanners that will allow this process to be fully implemented.

Records and Document Management will continue providing training on proper management of public records. Furthermore, records inspections will be conducted, and

# 2022/23 ANNUAL REPORT

---

support and guidance will be provided. The Department through Public Works has embarked on a project to repurpose the Central Provisioning Stores building to be converted into a purpose-built archives repository. It is currently at the design stage with a consultant team appointed to present design options.

## RESOLUTION 166/2022: DEPARTMENT OF HEALTH: STRATEGIC PLANNING AND PERFORMANCE MANAGEMENT

Noting that:

- (a) *Specific information systems were not effectively implemented to enable the monitoring of progress made towards achieving targets, core objectives and service delivery as required by Public Service Regulation 25(1)(e)(i) and (iii).*
- (b) *The department has determined that the finding relates to non-compliance of Standard Operating Procedures at facility level. The department has implemented several measures to address this finding and to ensure verification and validation of information captured and that Data Management SOP's will be implemented.*

The Committee resolves: -

That the Accounting Officer report to the Committee by 31 January 2023 on:

- [1] *The reasons for the failure to effectively implement information systems to enable the monitoring of progress made towards achieving targets, core objectives and service delivery.*
- [2] *An evidence-based assessment of the effectiveness of the measures implemented to address this audit finding and to provide assurance that a recurrence will be avoided.*

## RESPONSE OF THE DEPARTMENT

The Resolution of the Committee is noted.

- [1] *The reasons for the failure to effectively implement information systems to enable the monitoring of progress made towards achieving targets, core objectives and service delivery.*

The Department has implemented the necessary information systems in order to record and report on data from its facilities. The compliance to each of the policies and guidelines has not been thorough and has therefore affected the effectiveness of the reporting. The previous report sent to the committee listed the interventions that the Department initiated in order to mitigate some of these findings. One of these interventions involve robust training of the current

## 2022/23 ANNUAL REPORT

---

policies, and the other is related to facility support visits. The trainings have been provided to all districts and all relevant staff. Oversight is provided to the facilities by the PHC Supervisors, District Office as well as Head Office Data Management.

The following reasons are submitted for your consideration.

1. Noncompliance to basic policies and guidelines within the Department.
2. Low district/provincial staff to facility ratio. There are limited resources in the information field that are available to perform support visits to monitor data on a regular basis. The Provincial Office is responsible for ensuring that the relevant policies are developed and implemented. However, we find there is still non-compliance at lower levels which is not possible to pick up during desktop reviews. With the huge number of public health facilities, it is almost impossible to provide individual support to all facilities.
3. Limited consequence Management to facilities who do not perform well.
4. There are still manual data collection systems within our facilities which make up for huge volumes of paper and data reported daily. This makes it difficult to monitor all steps in the information system at a facility when visited.
5. Manual data collection also impacts on high risk of error rates.
6. Review of data takes place at District and Provincial levels on a regular basis. Data is reviewed using available functionalities (albeit limited) on the system. Monthly data is compared to identify outliers in the system. If the data trend does not show any outliers, it is very difficult to pick up errors at higher levels without having access to the data source to do a complete recount of data.
7. Data verification needs to be strengthened as a daily task by facility staff. The Department has run workshops with the relevant M&E staff to address this, with the onus on facility-based staff to monitor daily outputs from staff at each facility.

The above mentioned are some of the reasons why systems are not being implemented effectively. The Department is currently working on promoting a culture of understanding the importance of performance information and records management within a facility before huge changes are seen.

*[2] An evidence-based assessment of the effectiveness of the measures implemented to address this audit finding and to provide assurance that a recurrence will be avoided.*

The Department has decided to conduct face to face visits to facilities in order to assess and evaluate them. The Provincial Department has committed to visiting all CHC's before March 2023 in an effort to improve operations and systems at each of these facilities. We are relying on the Management Teams at the CHC to ensure that all recommendations are carried out,

## 2022/23 ANNUAL REPORT

---

and that District teams provide further oversight. Evaluations will be conducted 3 months following the visit to a selected number of CHC's.

The first revisit will be done in January 2023 to assess improvements. 15 out of 23 CHC's have been completed so far.

RESOLUTION 167/2022: DEPARTMENT OF HEALTH: MATERIAL IRREGULARITIES:  
PROCUREMENT OF SANITIZER DETERGENT AT PRICES HIGHER  
THAN PERMISSIBLE

Noting that:

- (a) Through an emergency procurement process on 25 March 2020, the department ordered 40 000 units of 1L hand sanitizer at R143,00 per unit. The total value of the order was R5.72 million.
- (b) The department failed to comply with the National Treasury Instruction Note 8/2019-20 in that it procured the sanitizer at a price higher than the permissible cost of R110.40 per unit of 1L, resulting in a material loss of R1.3 million.
- (c) The Accounting Officer was notified of the material irregularity on 12 February 2021. An internal investigation is underway.
- (d) This matter was investigated by Special investigation Unit (SIU) by proclamation of the President of the Republic of South Africa.
- (e) On conclusion of the investigation, the supplier National Community Marketing has agreed to re-imburse the department via SIU the sum of R1,304000.00.
- (f) Payment in the amount of R668, 214,35 has been paid, the balance will be paid in instalments via SIU.

The Committee resolves: -

That the Accounting Officer report to the Committee by 31 January 2023 on:

- [1] Progress made in the payment of the balance, considering the time lapse since it was brought to the attention of the Accounting Officer, steps taken to expedite the finalisation of the full payment to the department.

### RESPONSE OF THE DEPARTMENT

Cognisance should be taken of the fact that subsequent to the undertaking and conclusion of the investigation by the SIU, the supplier National Community Marketing had then agreed to re-imburse the Department via the SIU an amount of R 1,304,000.00 which culminated in an

## 2022/23 ANNUAL REPORT

---

Acknowledgement of Debt being signed in the amount of R 1,304,000.00 by National Community Marketing.

It should be noted that the SIU were primarily responsible for the recovery of the outstanding amount and the supplier was responsible for paying the monies directly to the SIU. In this regard, the Department has been liaising with the SIU relative to the amounts that have been paid by the supplier and in this regard, the Department is awaiting a statement of account from the SIU to confirm whether the debt has been settled or if there is an outstanding amount.

RESOLUTION 168/2022: DEPARTMENT OF HEALTH: INTERNAL CONTROL: APPROVED POLICIES AND ACTION PLANS NOT IMPLEMENTED TO ADDRESS PREVIOUS AUDIT FINDINGS

Noting that:

- (a) *The Accounting Officer did not ensure that approved policies and action plans are implemented to address previous audit findings on the financial statements, predetermined objectives, and compliance with legislation.*
- (b) *Consequence management was not effectively implemented for non-performance and slow responses in addressing and implementing recommendations and transgressions were reported.*
- (c) *Management did not implement a proper document management and record-keeping system to ensure that complete, relevant, and accurate information is accessible and available to support financial and performance reporting, including compliance with legislation.*
- (d) *Controls and processes over the preparation of the financial statements and the annual performance report were not effectively implemented to ensure they are accurately prepared and comply with the applicable framework, which resulted in material misstatements in the financial statements and the annual performance report.*
- (e) *The position of the chief financial officer, which is a critical post, has been vacant for a significant period.*
- (f) *In addressing these findings, the department has:*
  - i. *revised its SCM Policy and will conduct performance reviews to monitor implementation of the audit improvement plans and compliance with existing SOP's; and*
  - ii. *implemented a document management system at its central SCM unit to ensure that documents are safely stored and in relation to patient records, the department has developed an e-health system.*

# 2022/23 ANNUAL REPORT

---

The Committee resolves: -

That the Accounting Officer report to the Committee by 31 January 2023 on:

[1] An evidence-based assessment of the effectiveness of the interventions implemented by the department to:

- iv. Address the root causes of the qualified audit opinion and the key risk areas.
- v. ensure that proper systems of internal control are implemented, that audit findings are addressed promptly and fully and that an adequate system of document management and record-keeping is implemented; and
- vi. Provide for adequate oversight and monitoring by management over compliance with applicable laws and regulations.

## RESPONSE OF THE DEPARTMENT

The Resolution of the Committee is noted. Appended are the responses of the Department relative to the resolutions of the committee.

### 1. DEVELOPMENT AND IMPLEMENTATION OF AN AUDIT IMPROVEMENT PLAN

The Department had reviewed the findings of the Auditor-General as contained on the Audit Report as well as those reported on the Management report, and in this regard, the Department has embarked on an improvement strategy which includes the development of an Audit Improvement Plan (AIP) as well as various activities to strengthen the control environment.

The Audit Improvement Plan which incorporates both the Audit Report Findings as well as the findings reported on Annexure A and Annexure B of the Management Report. The AIP details the following:

- Root Causes
- Actions / Corrective Measures / Task Details
- Action Owners / Responsible Officials to drive the implementation
- Action Date
- Completion date

Subsequent to the compilation of the AIP, it was forwarded to management in the Department as well as to the various facilities as well as to the Provincial Treasury. In this regard, the status of implemented actions was obtained as of 30 September 2022 and will be obtained on a quarterly basis to evaluate the status of implemented actions

# 2022/23 ANNUAL REPORT

---

Further to the above, and as part of the strategy to strengthen controls, the Departments Audit and Internal Control Component together with the assistance of the District Monitoring and Evaluation (M&E) teams are currently undertaking assessments to verify and validate the implemented actions at a facility level and if control deficiencies are identified, further actions are developed to strengthen the control environment.

## 2. AUDIT PREPAREDNESS

On 4 November 2022, the Department had scheduled a meeting with the Finance Managers from all facilities and district offices. The intention of this engagement was to appraise all Finance Managers on the following as well as to advise them of the tasks that would need to be undertaken to ensure that the Department ensures that the internal control weaknesses that were identified during the audit are addressed which will contribute towards the Department receiving an Unqualified audit opinion.

- 2021/22 Regularity Audit.
  - Audit findings and what gave rise to the qualifications.
  - Performance Management and Consequence Management.
  - Roles of the Finance Managers in the validation of all SCM transactions and the correction of the AFS Disclosures.
  - Roles of the District M&E teams in the validation of all SCM Transactions and the AFS Disclosures.
- The Departments strategy and processes relative to all of the focus areas that will be required to be embarked upon by Head Office and all institutions to ensure that the Department obtains an Unqualified Audit Opinion.
- The responsibilities of the Finance Managers as well as the District Monitoring and Evaluation teams in respect of the validation and reporting on the following Annual Financial Statements (AFS) disclosure items amongst others:
  - Irregular Expenditure
  - Asset Management
  - Commitments
  - Accruals
  - Receivables
  - Goods and Services

# 2022/23 ANNUAL REPORT

---

- The quarterly reporting by all facilities on the status of implemented actions in respect of the findings on the Audit Log.
- Inventory Management and the use of the Goods Receipt Note (GRN).
- Expenditure Management and Guidance on the correct accounting for Accruals and Payables Not Recognised (PNR).

## 3. STRENGTHENING INTERNAL CONTROLS

In strengthening internal controls, the Department has embarked on the following initiatives:

### a. Management Reporting Packs

- The Department has developed a financial management reporting tool to assist institutional Chief Executive Officers (CEOs) to verify financial and other information monthly.
- These monthly reporting packs are assessed, and the results / reports of the review / assessments are discussed with the CEOs and Finance Managers at scheduled meetings that are convened.
- These engagements which are convened on a regular basis are chaired by the Deputy Director-General: Clinical Services, with the panel members comprising of the Chief Financial Officer, the Deputy Director-General: Clinical Support Services and Chief Directors from Clinical Services, the Chief Risk Officer and Audit and Internal Control.
- During these engagements, the findings of the assessment are discussed, and institutions are thereafter tasked with ensuring that corrective actions are implemented relative to the findings.

### b. Validations Of Supply Chain Management Transactions

- In ensuring that all supply chain management transactions meet the scrutiny of an audit process, both the institutional management teams and the District M&E have been instructed to ensure that all supply chain management transactions for the 2022/23 financial year are validated to ensure the correct disclosure of the following:
  - Commitments
  - Accruals and Payables Not Recognised (PNR's)
  - Irregular Expenditure
  - Receipting of goods and services as evidenced by a Goods Receipt Note (GRN)

## 2022/23 ANNUAL REPORT

---

- Further, the District M&E teams have commenced with the validation and verification of SCM transactions at a facility level to confirm the accuracy of the accruals listings as well as to confirm whether a Goods Receipt Note has been used to evidence the receipting of goods and services.

### c. Internal Control Reviews / Assessments

- In 2021, the Departments Audit and Internal Control component had commenced with and undertaken assessments relative to the implementation of the Goods Receipt Note (GRN) as well as on the Accruals and Payables Not Recognised listings and where deficiencies were identified, corrective action was taken immediately to address the findings.
- This had resulted in the Department identifying misstatements prior to the disclosure of the Accruals and PNR's in the Annual Financial Statements.
- This had contributed to the Department receiving modified opinions for Accruals and Payables Not Recognised and in respect of Goods and Services.

Considering the above, Audit and Internal Control has commenced with Internal Control Assessments relative to the following:

- Supply Chain Management processes at various facilities. These assessments will be focussed on the entire SCM value chain and will be concentrating on the following aspects:
  - Acquisitions management to identify if any irregular expenditure was incurred and whether this was accurately and completely disclosed
  - Commitments
  - The correct and accurate disclosure of Accruals and Payables Not Recognised (PNR's)
  - To confirm that the receipting of goods and services was evidenced by a Goods Receipt Note (GRN)
  - To confirm whether payments were made within thirty (30) days of receipt of the invoice
- Validation of implemented actions as recorded on the Audit Improvement Plan

Further to the above, the Internal Audit Unit will be engaged to undertake audits on the following focus areas where the Auditor-General had recorded poor audit outcomes:

- Supply Chain Management with specific reference to procurement and contract management

## 2022/23 ANNUAL REPORT

---

- Expenditure Management with a focus on the accurate and complete disclosure of all Annual Financial Disclosure items
- Predetermined Objectives

The Department has also taken cognisance of previous audit qualifications that have been overturned. In its efforts to maintain the unqualified audit opinion relative to the following, Internal Audits / Internal Control Assessments will be undertaken in the 3<sup>rd</sup> and 4<sup>th</sup> quarters of 2022/23:

- Commuted Overtime
- Capital Work in Progress
- Capital Commitments
- Contingent Liabilities

It is anticipated that through these initiatives, the Department is on the path to ensuring a strengthened control environment and ultimately obtaining an Unqualified Audit Opinion.

### RESOLUTION 169/2022: DEPARTMENT OF HEALTH: INTERNAL INVESTIGATIONS

Noting that:

- (a) *The special investigations unit at the department performed 169 investigations relating to allegations of incorrect awarding of contracts, theft, employees performing unauthorised remunerative work outside the public service and misappropriation of inventory, covering the period 1 April 2018 to 31 March 2021.*
- (b) *The status of the investigations is as follows:*
- Seven (7) matters are still under investigation.*
  - Thirty-eight (38) matters have been completed and the reports are under final review.*
  - Sixty-three (63) matters have been completed and referred to the Labour Relations Unit for disciplinary action or referral for criminal investigation.*
  - One (1) matter has been closed due to the allegations being unfounded.*
  - Sixty (60) matters have been finalised at a disciplinary hearing stage.*

The Committee resolves: -

That the Accounting Officer report to the Committee by 31 January 2023 on:

# 2022/23 ANNUAL REPORT

- [1] Progress made in finalising the 7 investigations still in progress and the 38 matters under review, as well as the anticipated time frames for finalisation.
- [2] The nature of the allegations in the 63 matters referred to Labour Relations, the amounts involved, progress made in the disciplinary matters or criminal referrals, steps taken to recover any losses and the anticipated time frames for finalisation.
- [3] The nature of the transgressions in the 60 matters that have been finalised in terms of disciplinary hearings, the amounts involved, the sanctions imposed, as well as steps taken to recover any losses, alternatively the reasons for not pursuing recovery.

## RESPONSE OF THE DEPARTMENT

The Resolution of the Committee is noted. Appended are the responses of the Department relative to the resolutions of the committee.

- [1] Progress made in finalising the 7 investigations still in progress and the 38 matters under review, as well as the anticipated time frames for finalisation.

In respect of the 7 investigations which were in progress, 5 were finalised and the remaining 2 cases are under investigation, and it is anticipated that these will be finalised before 31 March 2023. Further, in respect of the 38 cases which were under review, 10 were closed and 28 were completed and referred to the Departments Labour Relations Component for implementation of recommendations.

- [2] The nature of the allegations in the 63 matters referred to Labour Relations, the amounts involved, progress made in the disciplinary matters or criminal referrals, steps taken to recover any losses and the anticipated time frames for finalisation.

Appended is a summary of the 63 cases as per the matters raised in the Resolutions of the Committee.

NO. OF CASES	STATUS OF THE CASES
17	Cases closed due to lack of evidence/alternative remedial action/no disciplinary action to be effected
24	Cases were referred for disciplinary action and were subsequently finalised. Sanctions are listed below: <ul style="list-style-type: none"> <li>▪ 11 cases - Final Written Warning</li> <li>▪ 1 case - Written Warning</li> <li>▪ 6 cases - Three months suspension and Final Written Warning</li> <li>▪ 1 case - Resigned before discipline can be finalized</li> <li>▪ 3 cases - Dismissal</li> <li>▪ 2 cases - Not guilty</li> </ul>
22	Cases are pending disciplinary process

## 2022/23 ANNUAL REPORT

[3] The nature of the transgressions in the 60 matters that have been finalised in terms of disciplinary hearings, the amounts involved, the sanctions imposed, as well as steps taken to recover any losses, alternatively the reasons for not pursuing recovery.

Appended is a status of the 60 matters that were finalised in terms of disciplinary hearings:

NO. OF CASES	STATUS OF THE CASES
58	Cases closed due to lack of evidence/alternative remedial action/no disciplinary action to be effected
2	Cases were referred for disciplinary action and were finalized. Sanctions are indicated on the attached report. 1 case - Three months suspension and Final Written Warning 1 case - Found not guilty

### RESOLUTION 170/2022: DEPARTMENT OF HEALTH: INVESTIGATIONS BY FORENSIC UNIT

Noting that:

- (a) The Forensic Investigation Unit conducted seventeen (17) investigations at the request of the department, covering the period 1 June 2016 to 31 March 2022. These investigations related to irregularities around deviation from work and various orders in respect of projects managed by the department, and alleged fraud and corruption in the appointment and termination of contracts of service providers.
- (b) Nine (9) of the investigations have been completed and eight (8) are still in progress.
- (c) The status of the completed investigations is as follows:

FR11/2016	The matter was referred to HOD for further handling.
FR27/2016	4 investigations finalised. 1 official dismissed, 3 received final written warning with three months suspension without pay.
FR 02/2017	The report is under consideration by the department for implementation of disciplinary action.
FR 05/2018	The Hawks is conducting a criminal investigation. The department is proceeding with disciplinary action.
FR 06/ 2018	The department is quantifying the value of the irregular, unauthorised and fruitless and wasteful expenditure before proceeding with disciplinary action.
FR 11/2016	The matter has been referred to the Accounting Officer for further attention.
FR 27/2016	4 Disciplinary hearings have been finalised. One official was dismissed, and three officials received final written warnings with three months' suspension without pay.
FR 08/2018	The matters have been completed at disciplinary hearing stage.
FR 17/2018	The matter is under criminal investigation by the Hawks.

# 2022/23 ANNUAL REPORT

FR 10/2019	<i>The Auditor-general is evaluating the appropriateness of the actions taken by the Accounting Officer to ensure the material irregularity is addressed.</i>
------------	---

The Committee resolves: -

That the Accounting Officer report to the Committee by 31 January 2023 on:

- [1] *The nature of the allegations and the amounts involved in each of the completed investigations.*
- [2] *The findings and recommendations in each matter, including the matter investigated under FR 11/2016.*
- [3] *Progress made in the implementation of the recommendations in the matter investigated under FR 11/2016 and time frames for implementation.*
- [4] *Steps taken to recover any losses and progress made therein, alternatively the reasons for not pursuing recovery.*
- [5] *Progress made in the implementation of disciplinary action in the matters under FR 02/2017, FR 05/2018 and FR 06/ 2018 and time frames for finalisation thereof.*
- [6] *The outcomes of the disciplinary matters in FR 08/2018 and the sanctions imposed.*
- [7] *Details of the material irregularity under FR 10/2019 and the steps taken by the Accounting Officer to address the matter.*
- [8] *Other remedial actions taken to avoid a recurrence of the incidents investigated.*

## RESPONSE OF THE DEPARTMENT

The Resolution of the Committee is noted. Appended are the responses of the Department relative to the resolutions of the committee.

1. FR11/2016

a. The findings and recommendations under FR11/2016

The investigation found that KZN Oncology was only registered as an entity with the CIPC in August 2015 and registered as a supplier on the KZN Treasury's supplier database in September 2015.

KZN Oncology's initial price to repair the oncology equipment increased from R 5,490,000 to R 5,695, 641.21 to R 6,850,000.00 and then to R 9,492,690.00, allegedly due to the increase in Rand/Dollar exchange rate and the fact that one of the Rapidrac oncology equipment required a "waiveguide" which was expensive.

## 2022/23 ANNUAL REPORT

---

KZN Oncology was paid R 5,695,641.21 (60% of the total cost of R9 492 690) in April 2016 for the repair of one of the Rapidrac oncology equipment. Considering the irregular appointment of KZN Oncology and the deviation from procurement process in this regard, this amount can be deemed as irregular expenditure. It was noted that various officials within the Department had supported, recommended and authorised the payment accordingly.

There was no evidence that a variation order for the increase in costs was submitted and approved.

It should be noted that the implicated officials, all of whom have since resigned from the Department, were instrumental in supporting and approving KZN Oncology's appointment.

### b. Recommendations

It was recommended that the Department consider taking disciplinary action against these officials for:

- Failing to ensure that KZN Oncology had the necessary experience to repair oncology equipment.
- Failing to comply with the prescripts of National Treasury Practice Note.
- Failing to comply with the prescripts of Treasury Regulations.
- Failing to prevent the irregular expenditure (as defined by the PFMA) of R5 695 641, 21 when they irregularly appointed KZN Oncology; and
- Failing to comply with the section 40 (3) (a) and (b) and section 38 (c) of the PFMA.

Considering the above, the following was to be actioned:

- The Departments HRMS is to update the PERSAL records on the basis that the implicated officials had resigned from the Department before the disciplinary action could be instituted against them.
- Legal Services is to explore the feasibility of instituting civil recovery procedures against KZN Oncology; and
- The Departments SCM Unit to engage Provincial Treasury with regards to the blacklisting of KZN Oncology on the Central Supplier Database.

### c. Progress made in implementing the recommendations

The Department is in the process of implementing the recommendations in its entirety and a progress report will be made available by 30 April 2023.

However, with regards to updating the PERSAL records of the implicated officials, HRMS has implemented the recommendations by recording on PERSAL that the implicated employees

## 2022/23 ANNUAL REPORT

had terminated their services pending the disciplinary enquiry. In the event that they are re-employed in any Public Service institutions, the disciplinary action will be considered for the related irregularities.

Further to the above, appended is a status update regarding the other matters:

NO	DESCRIPTION	STATUS OF IMPLEMENTATION
1	FR11/2016	As reported above, the Department is in the process of implementing the recommendations in its entirety and the progress report will be made available by the 30 <sup>th</sup> of April 2023.
2	FR27/2016	Four Disciplinary Hearings have been finalised. One official dismissed and three officials received Final Written Warnings with <b>three month's suspensions without pay.</b>
3	FR02/2017	The Department is currently conducting an exercise to determine if the Department has obtained value for money and if any officials should be subjected to disciplinary processes for irregular and wasteful expenditure. Due to the nature and extent of the matters, this will take some time to complete. Once the exercise has been completed, and if there is evidence of unauthorised, irregular and wasteful expenditure, disciplinary action will be instituted against the implicated officials.
4	FR05/2018	The KwaZulu-Natal Provincial Hawks Office is currently conducting the criminal investigation and have been engaging with the Department as well as the National Prosecuting Authority and the Office of the Public Protector to source information. There have been several requests for information from the KZN Hawks and all requested information has been sourced and provided to the investigating team. Considering the above, the matter is still under investigation and a status report is awaited from the KZN Hawks.
5	FR06/2018	The Department is currently conducting an exercise to quantify and analyse the expenditure incurred to determine the exact value of the irregular, unauthorised and wasteful expenditure. Thereafter, officials responsible will be subjected to disciplinary processes.
6	FR08/2018	The matters have been subjected to and completed at disciplinary hearing stage. The officials were issued with written warnings and the money wrongly paid to the company was recovered. The matter has been finalised.
7	FR17/2018	The criminal investigation is currently underway with the Hawks.
8	FR10/2019	The Auditor-General had indicated that the representations made and the substantiating documents that were provided by the Department was considered, and it was concluded that appropriate actions had been taken to address the material irregularity. The matter has since been closed.

# 2022/23 ANNUAL REPORT

---

RESOLUTION 171/2022: DEPARTMENT OF HEALTH: UNAUTHORISED EXPENDITURE:  
R108.074 MILLION IN PRIOR FINANCIAL YEARS NOT YET  
AUTHORISED

Noting that:

Unauthorised expenditure of R108.074 million relating to prior financial years has not yet been authorised.

The Committee resolves: -

That the Accounting Officer report to the Committee in detail by 31 January 2023 on:

- [1] A breakdown of the amounts of unauthorised expenditure per financial year.
- [2] The reasons for the unauthorised expenditure per financial year.
- [3] Whether the Vote itself was overspent in each year due to any over-expenditure.
- [4] Measures put in place to prevent a recurrence.
- [5] Details of disciplinary action taken against the officials responsible for the unauthorised expenditure and the outcomes thereof.
- [6] Steps taken to recover any losses incurred due to the unauthorised expenditure.

## RESPONSE OF THE DEPARTMENT

The Resolution of the Committee is noted. Appended are the responses of the Department relative to the resolutions of the committee.

[1] A breakdown of the amounts of unauthorised expenditure per financial year.

- The unauthorised expenditure of R 2,208,523.25 in 2017/18
- The unauthorised expenditure of R 14,248,580.04 in 2018/19
- The unauthorised expenditure of R 91,617,553.28 in 2019/20

[2] The reasons for the unauthorised expenditure per financial year.

- Unauthorised Expenditure 2017/18

The Vote was underspent by R 19,157 million, mainly under Programme 7: Health care Support (R 12,803 million) due to delays in the delivery of hospital linen. Programme 2: District Health Services was underspent by R 6,354 under Machinery and Equipment as a result of challenges, including lengthy SCM processes, as well as enforced savings to reduce over-expenditure.

## 2022/23 ANNUAL REPORT

---

Cash-blocking had also impacted on the spending under these Programmes and had resulted in the overspending of the Vote as a whole.

Whilst the overall Vote was underspent, the Health Facility Revitalisation Grant was overspent by R 2,209 million. This was largely due to a higher-than-expected costs on maintenance at facilities as well as the construction costs relating to the Jozini CHC project, amongst others.

Further, in respect of the HIV/AIDs Conditional Grant, there was an increase in clients diagnosed with HIV which had resulted in more clients being initiated on ARV Treatment. Medication in this regard could not be stopped.

- Unauthorised Expenditure 2018/19

The Vote was overspent by R 2,658 million, mainly under Programme 4: Provincial Hospital Services. This was due to a higher than budgeted expenditure for medico-legal claims. The Human Papillomavirus Vaccine Grant was under-spent by R 11,590 million. This was primarily due to the delayed receipt of invoices for the procurement of the vaccine fridges and the rental vehicle hire costs. The delayed invoices had resulted in the Department being unable to process the payments timeously. A further factor that contributed to the underspend was the unavailability of vaccines from suppliers.

The unauthorised expenditure of R 14,248,580.04 in the 2018/19 financial year was as a result of the overall overspending and the surrendering of the underspent conditional grant funds.

- Unauthorised Expenditure 2019/20

In the 2019/20 financial year, the over-spending of the Vote amounted to R 74,740 million, mainly under Programme 2: District Health Services, due to pressures relating to ARV medicines. This was due to an increase in clients diagnosed with HIV which had resulted in more clients being initiated on ARV Treatment, and thus the issuing of medicines could not be stopped.

The National Health Insurance grant which largely provides for the contracting of private doctors at NHI pilot sites was only allocated funding in the Adjustments Estimate. The Grant was under-spent by R 16,877 million largely due to the late receipt of the Grant and the Department's inability to develop a contingency plan due to restrictive DORA conditions, which only allow for the appointment of health care professionals from the Grant.

In summary, the unauthorised expenditure of R 91,617,553.28 in the 2019/20 financial year had resulted from an overall overspending and the surrendering of the underspent conditional grant funds.

[3] *Whether the Vote itself was overspent in each year due to any over-expenditure.*

## 2022/23 ANNUAL REPORT

---

- The unauthorized expenditure of R 2,208,523.25 in 2017/18 resulted in the exceeding the Health Facilities Revitalisation Grant (HFRG)
- The unauthorized expenditure of R 14,248,580.04 in 2018/19 resulted in the exceeding the Vote.
- The unauthorized expenditure of R 91,617,553.28 in 2019/20 resulted in the exceeding the Vote.

[4] *Measures put in place to prevent a recurrence.*

In its endeavour to prevent unauthorised expenditure, the Department was forced to delay the filling most the vacant posts as well as deferring the procurement of machinery and equipment.

In respect of HIV/AIDs, the Department had budgeted based on the projections of patients that will be initiated on treatment and to mitigate the challenge of unauthorised expenditure, representations were made to the National Department of Health for the provision of donations which the Department had received as follows:

- 2020/21 Financial Year - R 47 million
- 2021/22 Financial Year - R 218 million

In light of the aforementioned, the Department was able to contain its expenditure.

### Medico-legal Claims

In its endeavours to prevent unauthorised expenditure, the Department undertakes the following on an annual basis:

- The budget for medico-legal matters are set in the most beneficial scenario for the Department at the beginning of the financial year. During the mid-year adjustment, all expenditure incurred for the settlement of medico-legal claims is balanced and estimates for the next six (6) months is provided.
- The year-end adjustment process focuses on optimising the allocated budget per program and per economic classification.
- The review of patient safety incidents is undertaken at a facility and district level, in line with guidelines issued by the National Department of Health.
- The Department is in a difficult position regarding the allocation of increased budget for medico-legal claims as this results in the reprioritisation of the service delivery budget which is required to address issues like shortage of key staff, medical equipment, electronic patient record system, etc.

[5] *Details of disciplinary action taken against the officials responsible for the unauthorised expenditure and the outcomes thereof.*

# 2022/23 ANNUAL REPORT

- Overspending on ARV medicine - No disciplinary actions was taken against officials as patients could not be denied life-saving treatment.
- Medico-legal Claims - Over spending as a result of Higher than Budgeted for medico legal claims
  - It is extremely difficult to estimate the medico-legal claims that will be settled within a financial year as the court decides which cases will be prioritised / attended to.
  - 96.8 % of the claims settled over the years related to cases where the Department conceded liability. The Department settled had 404 cases (385 with conceded liability and 19 without). The percentage for 2018/19 financial years is slightly less and 95.5%.
  - Where is it deemed necessary, gross transgressions are reported to the respective professional bodies for the health professionals

[6] *Steps taken to recover any losses incurred due to the unauthorised expenditure.*

The unauthorised expenditure was unavoidable despite the Department implementing strict controls and was unfortunately unable to prevent the over-expenditure. The over-expenditure that was incurred was for service delivery and thus no particular official can be held accountable.

## TRANSVERSAL RESOLUTIONS

### RESOLUTION 217/2022 - TRANSVERSAL RESOLUTION – FILLING OF CRITICAL POSTS

*Noting:*

*That vacancies exist in critical management posts within departments and public entities and the adverse effect this is having on audit findings, particularly on compliance with legislation, internal controls, and financial and performance management.*

*The Committee resolves:*

*That the Accounting Officers and Accounting Authorities of the relevant departments and public entities report to the Committee by 31 January 2023 on progress made in the filling of critical management posts and the time frames for the filling of those posts.*

### RESPONSE OF THE DEPARTMENT

The Resolution of the Committee is noted.

The Department has made the following progress in the filling of critical management posts from 1 April 2022 to date:

# 2022/23 ANNUAL REPORT

CEO posts:

- Chief Executive Officer: Nkandla Hospital
- Chief Executive Officer: Benedictine Hospital
- Chief Executive Officer: Nkonjeni / St Francis Hospital
- Chief Executive Officer: Fort Napier Hospital
- Chief Executive Officer: Catherine Booth Hospital
- Chief Executive Officer: Pholela CHC

SMS posts:

- 2x Chief Directors
- 4x Director Posts
- 1x Chief Financial Officer
- 3x District Directors

## RESOLUTION 218/2022 – TRANSVERSAL RESOLUTION: COMPLIANCE WITH HRM MATTERS

Noting:

The following reports on compliance by SMS members with Human Resources Management (HRM) matters.

Department/Entity	Signing of Performance Agreements	Security Vetting	Submission of Financial Disclosures	Verification of Qualifications
Office of the Premier	100%	100%	100%	100%
Zulu Royal Household Trust	100%	100%	100%	100%

Department of Cooperative Governance and Traditional Affairs	100%	66%	100%	82%
Department of Transport	No report	No report	No report	No report
Department of Social Development	86%	100%	100%	100%
Department of Public Works	100%	100%	100%	100%
Department of Arts and Culture	100%	100%	100%	100%

The Committee resolves: -

*That the relevant Accounting Officers and Accounting Authorities report to the Committee by 31 January 2023 on measures taken to ensure full compliance with HRM matters in relations to signing of performance agreements, security vetting, submission of financial disclosure forms and verification of qualifications.*

### RESPONSE OF THE DEPARTMENT

The Resolution of the Committee is noted.

- The Department of Health achieved a 99% for compliance with EPMDS.
- 100% compliance was not reached as one Senior Manager was suspended during the reporting period.

### RESOLUTION 219/2022 - TRANSVERSAL RESOLUTION: SPECIAL INVESTIGATION UNIT

Noting that:

*In accordance with proclamation R23 of 2020, the SIU provided service to the departments and the municipalities. After the provision of service, the departments and entities are expected to pay the SIU for service rendered. It is however noted that to date most departments have not fulfilled their payments according to the memorandum of understanding signed.*

## 2022/23 ANNUAL REPORT

Below is the table reflecting departments and municipalities which have paid and those which have not paid.

### INVOICES VS PAYMENTS RECEIVED

STATE INSTITUTION	AMOUNT INVOICED	PAYMENTS RECEIVED
Dept of Education (KZN)	R5 826 705	0
Dept of Social Development (KZN)	R1 696 275	R1 277 085
Dept of Health (KZN)	R1 557 627,50	R1 012 757,50
Dept of Transport (KZN)	R57 950	R48 255
Office of the Premier (KZN)	R133 452,50	0
eThekweni Metropolitan Municipality	R4 324 755	0
KwaDukuza Local Municipality	R653 135	0
Newcastle Local Municipality	R467 280	0
Umdoni Local Municipality	R492 763,75	0
<u>TOTAL</u>	<u>R15 209 943,75</u>	<u>R2 338 097,50</u>

The Committee resolves: -

That the relevant Accounting Officers and Accounting Authorities report to the Committee by 31 January 2023 on measures taken to ensure full compliance with the obligations agreed upon to pay for the service rendered.

### RESPONSE OF THE DEPARTMENT

The Resolution of the Committee is noted.

On perusal of the Departments BAS Payment Transaction Listing, the amount of R 1,557,627.50 has been settled in full.

RESOLUTION 220/2022: TRANSVERSAL RESOLUTION: HUMAN RESOURCE MANAGEMENT: VACANCIES IN SENIOR MANAGEMENT AND CRITICAL POSITIONS

Noting that: -

- (a) Positions in senior management and critical positions were vacant for more than 12 months.
- (b) Vacant positions in senior management were not advertised within six months.
- (c) Delays in the filling of critical posts are attributed to the approval process involving Provincial Treasury and the Office of the Premier.

# 2022/23 ANNUAL REPORT

---

The Committee resolves: -

*That the Accounting Officer and the Accounting Authority report to the Committee by 31 January 2023 on progress made in the filling of senior management positions, critical positions as well as the outcomes of their engagements with Provincial Treasury and the Office of the Premier on the filling of posts and the funding thereof.*

## RESPONSE OF THE DEPARTMENT

The Resolution of the Committee is noted.

There are no further delays in the filling Senior Management and other critical posts within the Department.

The Department is filling all critical posts in line with the attached Department's HRM Circular 28 of 2022, provided the budget for Compensation of Employees is available. There have also been engagements with Provincial Treasury requesting for additional funding for the filling of posts.

# 2022/23 ANNUAL REPORT

## Prior modifications to Audit reports

Nature of qualification, disclaimer, adverse opinion and matters of non-compliance	Financial year in which it first arose	Progress made in clearing / resolving the matter
Moveable Tangible Capital Assets (Qualified)	2008/09	The qualification in the 2021/22 financial year related to the valuation of assets. The Department has developed a detailed valuation methodology and has discussed this with the Provincial and National Treasury's as well as with the Auditor-General to determine the application of the valuation methodology.
Irregular Expenditure (Qualified)	2012/13	The Department has utilised an electronic tool to ensure the complete and accurate recording and disclosure of all Irregular Expenditure.
Accruals and Payables Not Recognised (Modified Audit Opinion)	2017/18	The Department will ensure the complete and accurate recording and disclosure of all Accruals as well the correct recognition of all Payables Not Recognised (PNR's).
Goods and Services (Modified Audit Opinion)	2019/20	The Goods Received Note (GRN) has been fully implemented. Assessments are currently being undertaken to ensure that all goods and services received in the Department are receipted accordingly and all supporting documentation is available for audit.

## Internal Control Unit

The Directorate: Audit and Internal Control which consists of two sub-directorates, namely Audit Management and Internal Control has been responsible for the following functions:

1. Audit Management
2. Internal Control
3. Co-ordination and collation of information for the compilation of reports to the Oversight Committees

### Audit Management

Audit and Internal Control is responsible for the management of all audit assignments that are undertaken in the Department by the Auditor-General and the Internal Audit Unit. In this regard, the component is responsible for ensuring that all audit queries/findings as identified by the Office of the Auditor-General and the Internal Audit Unit of the KwaZulu-Natal Provincial Treasury are analysed, co-ordinated and responded to, as well to create and maintain a

## 2022/23 ANNUAL REPORT

---

working relationship with both the Office of the Auditor-General and the Internal Audit Unit of the KwaZulu-Natal Provincial Treasury.

The component is also responsible for the compilation of the Audit Improvement Plans relative to the audits that were undertaken, undertaking validations / follow-ups of the implemented actions through assessments as well as the reporting on the status of implemented actions management and the Cluster Audit and Risk Committee (CARC).

### Internal Control

The Component is responsible for the undertaking and finalising of internal control assessments in respect of all administrative disciplines as well providing management at Head Office, Districts and Institutions with information concerning the various risk areas that prevail within their institutions/areas of responsibility as well as developing strategies and actions to ensure that the identified control weaknesses are mitigated.

Internal Control Assessments are undertaken on an ongoing basis, and meetings are subsequently convened with the management teams from the facilities that were reviewed who are then required to provide explanations regarding the findings of the assessments. The developed improvement plans are also discussed during these engagements.

Audit and Internal Control has also been assessing financial performance at institutions through the review of information that is collated by the CEO's and Finance Managers through the Management Reporting packs.

### Co-ordination and reporting to the Oversight Committees

The Component is also responsible for the drafting of reports to the Standing Committee on Public Accounts (SCOPA) and the Cluster Audit and Risk Committee (CARC) relative to the reports of the Auditor-General and that of the KwaZulu-Natal Provincial Treasury's Internal Audit Unit. Further, the Component is also responsible for the co-ordination, formulation and finalisation of all responses to resolutions of the Finance Portfolio Committee and the Health Portfolio Committee.

# 2022/23 ANNUAL REPORT

## Report of the Audit & Risk Committee on Vote 7 – Health

The Audit Committee herewith presents its report for the financial year ended 31 March 2023, as required by Treasury Regulation 3.1.13 read with section 77 of the Public Finance Management Act, 1999 (Act No. 1 of 1999, as amended by Act No. 29 of 1999).

The Provincial Audit and Risk Committee (PARC) is the shared audit and risk committee for the provincial departments and is further sub-divided into three Cluster Audit & Risk Committees (CARC's) that provide oversight of key functions to the KZN Provincial Government Departments. The Department of Health is served by the Social Protection, Community and Human Development (SPCHD) Cluster.

The Audit Committee reports that it has adopted formal terms of reference contained in its Audit and Risk Committee Charter. The Committee complied with its responsibilities arising from the Public Finance Management Act and Treasury Regulations.

### 1. Audit Committee Members and Attendance

The PARC and SPCHD CARC consisted of the members listed hereunder who have met as reflected below.

#	Name of Member	PARC Meetings Attended	SPCHD CARC Meetings Attended
1.	Mr Z Zulu – PARC Chairperson	5 of 5	4 of 4
2.	Mr S Mthethwa – CARC Chairperson	4 of 5	4 of 4
3.	Ms R Ramphal	5 of 5	4 of 4
4.	Mr S Maharaj	5 of 5	4 of 4
5.	Mr M Tarr	5 of 5	N/A*
6.	Ms S Makhathini	5 of 5	N/A*

\*Refers to PARC members who did not serve on the SPCHD CARC

### 2. The Effectiveness of Internal Control

The Committee has reviewed the reports from the Internal Audit Activity (refer to paragraph 3 below), the Audit Report on the Annual Financial Statements and Management Report of the Auditor General of South Africa (AGSA) and has noted with concern, the weaknesses in controls around the following areas:

- Implementation of Management Committed Action Plans from Previous Internal and External Audit Reports.

# 2022/23 ANNUAL REPORT

---

- Supply Chain Management.
- Contingent Liabilities.
- Annual Financial Statements.
- Accruals and Payables not recognised.
- Capital Commitments and Work in Progress.
- Performance Information.
- Expenditure Management.
- Procurement and Contract Management; and
- IT General Controls.

The appropriateness of management's planned interventions to improve the overall control environment were considered, however management again, did not adequately respond to internal control deficiencies raised by internal audit and the AGSA during the current and previous financial year as evidenced by the number of unresolved findings on both the AGSA and Internal Audit consolidated logs at year end. Management was urged to implement remedial interventions timeously, to ensure that the Department improves on its audit outcomes.

The Committee will monitor the corrective actions in respect of the detailed findings emanating from the current regulatory audit on a quarterly basis through the CARC processes.

### 3. Effectiveness of Internal Audit

The internal audit activity moved from Provincial Treasury to the Department of Health in December 2022 following a Cabinet resolution for the department to establish its own internal audit function. This necessitated that the Department drive the following processes:

- A. Develop various instruments that will guide the successful implementation of the internal audit activity in the department.
- B. Ensure that there is continuity in the execution of the internal audit plan as was previously executed by the Provincial Treasury Internal Audit Unit.

#### PIAS Internal Audit Activity

As per the 3<sup>rd</sup> quarter report presented by PIAS, of the 10 assurance engagements that were planned 4 were finalised and the rest were cancelled due to the move by the department to establish its own in-house internal audit activity, as alluded to below.

# 2022/23 ANNUAL REPORT

---

## Inhouse Internal Audit Activity

In December 2022, when the Internal Audit Function was effectively taken over from Provincial Treasury, KZN Health Internal Audit developed a coverage plan for the fourth quarter of 2022/2023 to ensure that there is continuity. The plan was essentially a continuation of internal audit activity that migrated from Provincial Treasury to the Department of Health, with very minor modifications. The modifications included carrying over the Pharmaceutical internal audit review to 2023/2024 financial year.

The KZN Health Internal Audit took over and executed six (6) assignments on the coverage plan for 2022/2023 financial year. Further, KZN Health Internal Audit executed activities that were not of an assurance nature, the purpose of which was to establish the guiding documents for the KZN Health Internal Audit function. These included amongst other, motivation for the separation of the Internal Audit Function from the Risk Management Function, the proposed Internal Audit Structure, the development of 3 Year Internal Audit Coverage Plan, Combined Assurance Framework, Skills Profiles and Training Plans, Risk Maturity Assessment Tool, Internal Audit Methodology, Internal Audit Quality Improvement Programme.

The Audit Committee (PARC and CARC) evaluated the internal audit reports presented by the Provincial Internal Audit Service (PIAS) from the 1<sup>st</sup> to the 3<sup>rd</sup> quarter of 2022/2023 financial year, whilst the activity was in the hands of the shared internal audit function under Provincial Treasury, and the reports from the inhouse KZN Health Internal Audit Activity from the 4<sup>th</sup> quarter of 2022/2023 financial year.

The Committee reviewed the reports from the Internal Audit Activity (both PIAS and in-house internal audit activity) and noted with concern, the weaknesses in controls identified, as listed in paragraph 2 above. The Committee will continue to monitor the progress made by KZN Health Internal Audit against Internal Audit Coverage Plan for the future years in order to ensure that it continues to fulfil its mandate and add value to the Department.

## Risk Management

The responsibilities of the Committee with respect to risk management are formally defined in its Charter. For the period under review, the Committee's responsibilities have been focused, amongst other things, on the quarterly review of the Department's risk register and monitoring progress against risk management operational plan.

At the end of the 2022/23 financial year, the Department's risk register status was as follows:

## 2022/23 ANNUAL REPORT

The Committee notes that the risk register statistics only relate to Head Office risks. As at 2022/23-year end reporting, a total of 95% of agreed mitigation plans have not been

Department's Risk Register	Critical	Major	Moderate	Minor	Insignificant	Total
Number of risks identified	61	89	32	4	6	192
Number of agreed actions	146	232	58	3	2	441
Number of completed action plans.	9	13	2	0	0	24
% of completed actions	6%	6%	3%	0%	0%	5%
% of outstanding action plans	94%	94%	97%	100%	100%	95%

implemented. The Department is advised to:

- 1) improve on the implementation of outstanding action plans for all residual risks; and
- 2) ensure that all key risks linked to outcomes are included in the Department's risk register.

The Committee noted that PIAS: RAS has validated the compliance with minimum risk management standards set for Provincial Departments as contained within the revised Provincial Risk Management Framework, focusing on the Risk Management Committee and Risk Management Function which have a total of six minimum standards.

As at the end of the financial year, the Department is fully compliant with five of the six minimum standards, partially compliant to the minimum standard on capacity within the risk management function as there are vacancies. The Committee noted that the Provincial Risk Management Committee (PRMC), to be constituted by all HODs and chaired by the DG, has been formally established at a COHOD meeting held on 27 March 2023.

#### 4. Quality of in year management and monthly/quarterly reports

Based on the reports of the Internal Auditors and the Auditor General, the Committee notes with concern the deficiencies identified in the usefulness and reliability of reported performance information due to the failure of the Department to implement adequate systems to collect, collate, verify and retain performance related data. The management of the Department has been urged to implement the appropriate improvement strategies in order to address the identified shortcomings with immediate effect.

# 2022/23 ANNUAL REPORT

---

## 5. Evaluation of Financial Statements

The Committee has:

- Reviewed and discussed the Annual Financial Statements, including the audit report, with the Accounting Officer, Auditor General and KZN Health Internal Audit.
- Reviewed the Auditor General's Management Report.
- Reviewed the Department's compliance with legal and regulatory provisions, and concerns have been noted around the reliability of performance information, Strategic Planning, expenditure management, procurement and contract management, failure to prevent irregular expenditure as a result of non-compliance with supply chain management prescripts and the lack of appropriate consequence management in certain instances.
- Reviewed the conclusions on the reliability and usefulness of performance information for Programme 2: District Health Services. The Committee notes with concern that reported performance on significant targets was not reliable when compared to the source information or portfolio of evidence provided resulting in material findings raised.

The Committee will continue to monitor the progress of the material irregularities emanating from the previous regulatory audit on a quarterly basis through the CARC processes.

## 6. Forensic Investigations

The Committee draws attention to the paragraph in the audit report relating to investigations. The department and Forensic Investigation Services at the Office of the Premier are urged to promptly finalise the outstanding investigations and implement recommendations in the finalised investigations.

## 7. Auditor-**General's Report**

The Committee has met with the Auditor General of South Africa to discuss and evaluate the issues that emanated from the current regulatory audit.

The Committee will ensure that corrective actions in respect of the detailed findings emanating from the current regulatory audit are monitored on a quarterly basis through the CARC processes.

The Committee accepts the conclusion of the Auditor General's Unqualified opinion on the Annual Financial Statements and is of the opinion that the Audited Annual Financial Statements be accepted and read together with the report of the Auditor General.

# 2022/23 ANNUAL REPORT

---

## 8. Appreciation

The Committee wishes to express its appreciation to the Management of the Department, the Auditor General of South Africa, the Provincial Internal Audit Services, and KZN Health Internal Audit for the co-operation and support they have provided to enable us to compile this report.

---

Mr Z Zulu  
Acting Chairperson: Provincial Audit and Risk Committee  
05 August 2023

## 2022/23 ANNUAL REPORT

### B-BBEE Compliance performance information

The following table has been completed in accordance with the compliance to the Broad-Based Black economic Empowerment (BBBEE) requirements of the BBBEE Act of 2013 and as determined by the Department of Trade and Industry.

Has the Department / Public Entity applied any relevant Code of Good Practice (B-BBEE Certificate Levels 1 – 8) with regards to the following:		
Criteria	Response Yes / No	Discussion
Determining qualification criteria for the issuing of licences, concessions or other authorisations in respect of economic activity in terms of any law?	No	Not applicable for Department of Health as we do not have a mandate to issue B-BBEE related licences
Developing and implementing a preferential procurement policy?	Yes	The Policy took effect from 26 January 2023, to comply with Preferential Procurement Regulation 2022
Determining qualification criteria for the sale of state-owned enterprises?	No	Not applicable to Department of Health
Developing criteria for entering into partnerships with the private sector?	No	Not applicable to Department of Health
Determining criteria for the awarding of incentives, grants and investment schemes in support of Broad Based Black Economic Empowerment?	No	Not applicable to Department of Health

# 2022/23 ANNUAL REPORT

---

## INTRODUCTION

The information contained in this part of the annual report has been prescribed by the Minister for the Public Service and Administration for all departments in the public service.

Human Resource Management Services (HRMS) endeavoured to pursue its strategic intent by aligning internal human resource processes to Government's human resource policies and strategies, to ensure the execution of the Department's mandated functions. In doing so, HRMS accomplished significant achievements in some areas whilst the most prominent challenge experienced related to the Compensation of Employees (CoE) budget allocation received.

## OVERVIEW OF HUMAN RESOURCES

### Achievements

- The vacancy rate was reduced from 15.40% in 2021/2022 to 11.9% as at 31 March 2023. Further unfunded posts on PERSAL will be identified and a request will be forwarded to the Office of the Premier to abolish these posts on PERSAL.
- 6 Organisational structures were finalised during the reporting period and submitted for approval to the Executive Authority.
- The Annual Human Resource Planning Implementation Report (01 April 2021 to 31 March 2022) and Human Resource Plan for period 2021/22 to 2023/24 were assessed by the team comprised of all Departments on 16.08.2022. Assessment results were received from Office of the Premier (OTP) as per email dated 01.09.2022. The assessment results from OTP are as follows:
  - HR Plan for period 2021/22 to 2023/24: Compliance - 100%
  - HR Plan for period 2021/22 to 2023/24: Quality - 100%
  - HRP Implementation Report for period 01 April 2021 to 31 March 2022: Compliance - 100%
  - HRP Implementation Report for period 01 April 2021 to 31 March 2022: Quality - 100%.
- To ensure the availability of staff with scarce skills in the Department, the ratio of key personnel per 100 000 populated had an improved performance as follows during 2022/23. The improved performance can be ascribed to the increased allocation of Medical Interns and Community Service Medical Officers and the increased appointment of Professional Nurses to assist in the fight against COVID-19:
  - The actual performance of Medical Officers was 33.7 / 100 000 against a target of 27.4;
  - The actual performance of Professional Nurses was 160 / 100 000 against a target of 152.5.

# 2022/23 ANNUAL REPORT

---

- The Department has appointed 7 020 contract staff in various categories to assist with the fight against the COVID-19 pandemic. As at 31 March 2023, 1898 contract staff have been absorbed into permanent posts.
- The 2021/22 Job Access Strategic Framework Plan and Report was submitted to the DPSA on 28/10/2022 and acknowledged by the DPSA on 18/11/2022.
- The 2021/22 Gender Equality Strategic Framework (GESF) Report and the 2022/23 GESF Plan was submitted to the DPSA on 28/10/2022 and acknowledged by the DPSA on 18/11/2022.
- The Departmental Annual Employment Equity Report for period 01 October 2021 to 30 September 2022 was approved by the Head of Department on 18.11.2022. The Approved Annual EE Report was submitted to Department of Employment and Labour on 01.12.2022 and acknowledgement letter was received.
- The 2022 Report on Implementation of HOD's 8 Principles Action Plan Public Service Women in Management Week was submitted to the DPSA on 18/11/2022 and acknowledged by the DPSA on 18/11/2022.
- The report on the Incapacity Leave and Ill-Health Retirement cases has been submitted to OTP and DPSA. The last Provincial Policy and Procedure on Incapacity Leave and Ill-Health Retirement (PILIR) Steering Committee was held on 07/03/2023.
- The Department conducts staff satisfaction survey annually in November/December. Analysis and response plan is then finalized in quarter 4. EHW successfully achieved this target. Intervention programmes have been designed in response to variables and ready for implementation starting from Q1 of 2023/2024.
- Performance agreement between HOD and Executive Authority signed and submitted to DPME on 30 April 2022.
- Of the 79 SMS members, 75 signed performance agreements with their supervisors and complied by the deadline date, 2 were suspended and 2 non-compliant. In this regard all non-compliant managers were issued with disciplinary letters and furthermore did not qualify for package progressions.
- Four PHSDCBC Chamber meetings were held during 2022/23 between the employer and trade unions so as to create a platform to address transversal challenges affecting employees and the Department.
- 133 Persal users, against a target of 20, were trained on various Persal courses during 2022/23 as the COVID-19 restrictions were relaxed. This was a total of 88 females and 45 males.
- A total of 21 047 employees (13 873 females and 7174 males) have undergone various training and development initiatives during 2021/22 utilising the Department's skill development budget.

# 2022/23 ANNUAL REPORT

---

- 487 Managers were trained in Leadership Development programmes against a target of 200. The training budget was reprioritised, and an additional allocation was made for the training of Managers. Additionally, Managers were trained on the various modules for National Health Insurance (NHI) Leadership and Governance Programme, which was funded through the HWSETA Conditional Grant, and which influenced the increased number of Managers trained during the year.
- A total of 160 nursing students commenced their 1<sup>st</sup> year training in 2022/2023 against a target of 120. The numbers approved and admitted to nurse training has exceeded the target. This is due to the legacy programmes being phased out, and thus the R171 programme now being the only basic programme. The graduates from this programme will replace nurses who leave due to attrition and will form the foundation programme for nurses who would need to be replaced, should other nurses pursue post graduate studies.
- 9604 EMS employees, against a target of 540, were trained during 2022/23. The increased number of trained EMS personnel resulted from the suspension of contact training and the introduction of online training. The numbers include Advanced Life Support (ALS) -Clinical Practice Guidelines (CPGs) Updates, ALS online forum, Intermediate Life Support (ILS) -CPG Updates, Basic Ambulance Assistant (BAA) Update, Emergency Medical Dispatcher (EMD) training and Defensive Driver Techniques (DDT).
- 462 Internal employees were awarded bursaries against a planned target of 360. The target has been exceeded as a result of spending on the RSA-Cuban Medical Programme being reduced due to returning students that completed the programme and funding was re-directed to internal bursaries.
- 7697 Employees were trained through the Regional Training Centre against a target of 5067 and the increased training numbers can be ascribed to the fact that additional courses were conducted to catch-up on courses cancelled during the COVID-19 pandemic.
- With regards to the RSA/Cuban Medical Training Programme, in total, 27 students trained in Cuba qualified to be placed as medical interns in 2023. Currently, there are 12 students who are still studying in Cuba. 11 were expected write National Cuba Exam from 15 March 2023 in Pretoria.
- The Department continues to partner with the Office of the Premier and work with other Departments in ensuring ways to finalise labour cases within the prescribed period.

## Challenges

- It has been very difficult to reduce the vacancy rate in the Department due to an inadequate funding allocation received.
- There is shortage of Investigating Officers and Presiding Officers to handle the large volume of misconduct cases. There are also numerous requests for postponements by employee

## 2022/23 ANNUAL REPORT

and employer representatives. Additionally, there is a shortage of dedicated Labour Relations Practitioners in the facilities.

- Training initiatives and training intakes are limited due to the constricting funding envelope and this is evidenced by the fact that the Department did not award any health sciences bursaries during 2022/23.
- The reviewed process for the filling of posts has a negative impact on service delivery as replacement posts cannot be filled immediately which implies that existing staff have to take on additional workloads which, consequently, has a negative impact on staff well-being as well as service delivery backlogs of having unfilled posts.

### Personnel related expenditure

The following tables summarises the final audited personnel related expenditure by programme and by salary bands. In particular, it provides an indication of the following:

- amount spent on personnel
- amount spent on salaries, overtime, homeowner's allowances and medical aid.

TABLE 50: (3.1.1) PERSONNEL EXPENDITURE BY PROGRAMME FOR THE PERIOD 1 APRIL 2022 AND 31 MARCH 2023

Programme	Total expenditure (R'000)	Personnel expenditure (R'000)	Training expenditure (R'000)	Professional and special services expenditure (R'000)	Personnel expenditure as a % of total expenditure	Average personnel cost per employee (R'000)

## Employment and Vacancies

The tables in this section summarise the position with regard to employment and vacancies.

The following tables summarise the number of posts on the establishment, the number of employees, the vacancy rate, and whether there are any staff that are additional to the establishment.

This information is presented in terms of three key variables:

- programme
- salary band
- critical occupations (see definition in notes below).

Departments have identified critical occupations that need to be monitored. In terms of current regulations, it is possible to create a post on the establishment that can be occupied by more than one employee. Therefore, the vacancy rate reflects the percentage of posts that are not filled.

TABLE 54: (3.2.1) EMPLOYMENT AND VACANCIES BY PROGRAMME AS ON 31 MARCH 2023

Programme	Number of posts on approved establishment <sup>4</sup>	Number of posts filled <sup>5</sup>	Vacancy Rate	Number of employees additional to the establishment <sup>6</sup>
Administration	1 090	970	11	181
Central Hospital Services	6 366	5506	13,5	11
District Health Services	44 045	38786	11,9	5 851

<sup>4</sup> These are actual Posts on Persal. Organograms are not captured to ensure compliance with Cabinet Resolution to keep vacancy rates below 10%.

<sup>5</sup> This refers to filled posts. Please note that more than one sessional employee may occupy a post.

<sup>6</sup> Please note that as per a DPSA Directive, employees in training ranks e.g. Medical Interns and Community Service ranks e.g. Community Service Pharmacists are employed on contract and their posts are created as additional to the establishment in addition to additional to employment posts.

# 2022/23 ANNUAL REPORT

Programme	Number of posts on approved establishment <sup>4</sup>	Number of posts filled <sup>5</sup>	Vacancy Rate	Number of employees additional to the establishment <sup>6</sup>

## Notes

- The CORE classification, as prescribed by the DPSA, should be used for completion of this table.
- Critical occupations are defined as occupations or sub-categories within an occupation –
  - (a) in which there is a scarcity of qualified and experienced persons currently or anticipated in the future, either because such skilled persons are not available, or they are available but do not meet the applicable employment criteria.
  - (b) for which persons require advanced knowledge in a specified subject area or science or learning field and such knowledge is acquired by a prolonged course or study and/or specialised instruction.
  - (c) where the inherent nature of the occupation requires consistent exercise of discretion and is predominantly intellectual in nature; and
  - (d) in respect of which a department experiences a high degree of difficulty to recruit or retain the services of employees.

# 2022/23 ANNUAL REPORT

## Notes

In terms of the Public Service Regulations Chapter 1, Part VII C.1A.2, departments must indicate good cause or reason for not having complied with the filling of SMS posts within the prescribed timeframes. In the event of non-compliance with this regulation, the relevant executive authority or head of department must take appropriate disciplinary steps in terms of section 16A (1) or (2) of the Public Service Act.

## Job Evaluation

Within a nationally determined framework, executing authorities may evaluate or re-evaluate any job in his or her organisation. In terms of the Regulations all vacancies on salary levels 9 and higher must be evaluated before they are filled. The following table summarises the number of jobs that were evaluated during the year under review. The table also provides statistics on the number of posts that were upgraded or downgraded.

TABLE 62: (3.4.1) JOB EVALUATION BY SALARY BAND FOR THE PERIOD 1 APRIL 2022 AND 31 MARCH 2023

Salary band	Number of posts on approved establishment	Number of Jobs Evaluated	% of posts evaluated by salary bands	Posts Upgraded		Posts downgraded	
				Number	% of posts evaluated	Number	% of posts evaluated
Lower Skilled (Levels 1-2)	3 729	0	0	0	0	3	100

### Notes

- The CORE classification, as prescribed by the DPSA, should be used for completion of this table.
- Critical occupations are defined as occupations or sub-categories within an occupation –
  - (a) in which there is a scarcity of qualified and experienced persons currently or anticipated in the future, either because such skilled persons are not available, or they are available but do not meet the applicable employment criteria;
  - (b) for which persons require advanced knowledge in a specified subject area or science or learning field and such knowledge is acquired by a prolonged course or study and/or specialised instruction.
  - (c) where the inherent nature of the occupation requires consistent exercise of discretion and is predominantly intellectual in nature; and
  - (d) in respect of which a department experiences a high degree of difficulty to recruit or retain the services of employees.

The table below identifies the major reasons why staff left the department.

## 2022/23 ANNUAL REPORT

TABLE 68: (3.5.3) REASONS WHY STAFF LEFT THE DEPARTMENT FOR THE PERIOD 1 APRIL 2022 AND 31 MARCH 2023

Termination Type	Number	% of Total Resignations

## Signing of Performance Agreements by SMS Members

All members of the SMS must conclude and sign performance agreements within specific timeframes. Information regarding the signing of performance agreements by SMS members, the reasons for not complying within the prescribed timeframes and disciplinary steps taken is presented here.

TABLE 78: (3.7.1) SIGNING OF PERFORMANCE AGREEMENTS BY SMS MEMBERS AS ON 31 MAY 2023

SMS Level	Total number of funded SMS posts	Total number of SMS members	Total number of signed performance agreements	Signed performance agreements as % of total number of SMS members
Head of Department	1	1	1	100%
Salary Level 16	1	1	1	100%
Salary Level 15	7	4	3	75%
Salary Level 14	21	12	12	100%
Salary Level 13	87	68	64	94%
Total	117	86	81	94%

Source: Director: HRD

# 2022/23 ANNUAL REPORT

## Notes

- In the event of a National or Provincial election occurring within the first three months of a financial year all members of the SMS must conclude and sign their performance agreements for that financial year within three months following the month in which the elections took place. For example, if elections took place in April, the reporting date in the heading of the table above should change to 31 July 2022.

TABLE 79: (3.7.2) REASONS FOR NOT HAVING CONCLUDED PERFORMANCE AGREEMENTS FOR ALL SMS MEMBERS AS ON 31 MARCH 2023

Reasons
2 SMS members are on suspension and 3 were non-compliant

Source: Director: HRD

## Notes

- The reporting date in the heading of this table should be aligned with that of Table 3.7.1.

TABLE 80: (3.7.3) DISCIPLINARY STEPS TAKEN AGAINST SMS MEMBERS FOR NOT HAVING CONCLUDED PERFORMANCE AGREEMENTS AS ON 31 MARCH 2023

Reasons
Consequence management will be implemented and non-payment of pay progression

Source: Director: HRD

## Notes

- The reporting date in the heading of this table should be aligned with that of Table 3.7.1.

## Performance Rewards

To encourage good performance, the department has granted the following performance rewards during the year under review. The information is presented in terms of race, gender, disability, salary bands and critical occupations (see definition in notes below).

TABLE 81: (3.8.1) PERFORMANCE REWARDS BY RACE, GENDER AND DISABILITY FOR THE PERIOD 1 APRIL 2022 TO 31 MARCH 2023<sup>14</sup>

Race and Gender	Beneficiary Profile			Cost	
	Number of beneficiaries	Number of employees	% Of total within group	Cost (R'000)	Average cost per employee
African, Female	0	44476	0	0	0
African, Male	0	16124	0	0	0

<sup>14</sup> Not Applicable as Pay Progressions and Performance rewards were not implemented on 1/7/2021 as per directive from DPSA.

### Notes

- The CORE classification, as prescribed by the DPSA, should be used for completion of this table.
- Critical occupations are defined as occupations or sub-categories within an occupation
  - (a) in which there is a scarcity of qualified and experienced persons currently or anticipated in the future, either because such skilled persons are not available, or they are available but do not meet the applicable employment criteria.

## 2022/23 ANNUAL REPORT

- (b) for which persons require advanced knowledge in a specified subject area or science or learning field and such knowledge is acquired by a prolonged course or study and/or specialised instruction.
- (c) where the inherent nature of the occupation requires consistent exercise of discretion and is predominantly intellectual in nature; and
- (d) in respect of which a department experiences a high degree of difficulty to recruit or retain the services of employees.

TABLE 84: (3.8.4) PERFORMANCE RELATED REWARDS (CASH BONUS), BY SALARY BAND FOR SENIOR MANAGEMENT SERVICE FOR THE PERIOD 1 APRIL 2022 TO 31 MARCH 2023

# 2022/23 ANNUAL REPORT

## 1.1 HIV/AIDS & Health Promotion Programmes

TABLE 92: (3.11.1) STEPS TAKEN TO REDUCE THE RISK OF OCCUPATIONAL EXPOSURE

Units/categories of employees identified to be at high risk of contracting HIV & related diseases (if any)	Key steps taken to reduce the risk
The Department has a pool of employees in the childbearing age, these are most likely to have unprotected sex and get exposed to HIV/AIDS/STIs.	<ul style="list-style-type: none"> <li>• Aggressive awareness on HIV/AIDS &amp; STI.</li> <li>• Continuous distribution of condoms.</li> <li>• Prevention and treatment programmes.</li> </ul>
The other group is that of employees who work off site for the longest period. Since they are away from their partners for long periods, the risk is higher of them engaging in extra spousal sexual relations and contracting sexually transmitted diseases.	<ul style="list-style-type: none"> <li>• Aggressive awareness on HIV/AIDS &amp; STI.</li> <li>• Continuous distribution of condoms.</li> <li>• Prevention and treatment programmes.</li> </ul>

Source: Director: EH&W

TABLE 93: (3.11.2) DETAILS OF HEALTH PROMOTION AND HIV/AIDS PROGRAMMES (TICK THE APPLICABLE BOXES AND PROVIDE THE REQUIRED INFORMATION)

Question	Yes	No	Details, if yes
1. Has the department designated a member of the SMS to implement the provisions contained in Part VI E of Chapter 1 of the Public Service Regulations, 2001? If so, provide her/his name and position.	Yes		Dr Nokuthula Dlamini
2. Does the department have a dedicated unit or has it designated specific staff members to promote the health and well-being of your employees? If so, indicate the number of employees who are involved in this task and the annual budget that is available for this purpose.	Yes		Department has EH&W unit with: <ul style="list-style-type: none"> <li>• 1 Director</li> <li>• 5 Deputy Directors: (OHS &amp; Wellness)</li> <li>• 1 AD (occupational Health)</li> <li>• 4 Wellness Practitioners</li> <li>• 2 Admin Officers</li> </ul> Budget is linked to HRMS
3. Has the department introduced an Employee Assistance or Health Promotion Programme for your employees? If so, indicate the key elements/services of this Programme.	Yes		4 elements or pillars: <ul style="list-style-type: none"> <li>• HIV/AIDS, TB &amp; STI management</li> <li>• Occupational Health and safety</li> <li>• Wellness management (individual and organizational)</li> <li>• Health and productivity management (Non-communicable and communicable diseases management)</li> </ul>
4. Has the department established (a) committee(s) as contemplated in Part VI E.5 (e) of Chapter 1 of the Public Service Regulations, 2001? If so, please provide the	Yes		1. Corporate Services/Maintenance (Ms N Nsele) 2. OHS (Ms Nonhlanhla Fihlela)

## 2022/23 ANNUAL REPORT

Question	Yes	No	Details, if yes
names of the members of the committee and the stakeholder(s) that they represent.			3. DOH Finance/Office Of MEC For Health (Linda Mvuyana) 4. Risk Management Services/ Department Investigation Services (Ayanda Mabaso) 5. Labour Relations/Security Services (Khanyisani Hlophe) 6. DOH Corporate Communications (Nonhle Hadebe) 7. Legal Services (Nonhlanhla Dlamini) 8. Office Of The Head Of Department (Owetu Matwebu) 9. Contract Management (Londiwe Makhathini) 10. SCM Risk, Compliance and Institutional Support (Mr Zamani Bavu) 11. Infrastructure (Jackie Paul) 12. Emergency Medical Services (Mrs G Ramchand)
5. Has the department reviewed its employment policies and practices to ensure that these do not unfairly discriminate against employees on the basis of their HIV status? If so, list the employment policies/practices so reviewed.		No	The review of EHW policies and SOP is currently under way. The following policies are under the process of being reviewed: <ul style="list-style-type: none"> <li>• HIV/AIDS, TB &amp; STI</li> <li>• OHS Policy</li> <li>• Wellness policy</li> <li>• Health and productivity</li> <li>• Substance abuse</li> <li>• Bereavement policy</li> <li>• Sexual Harassment</li> </ul>
6. Has the department introduced measures to protect HIV-positive employees or those perceived to be HIV-positive from discrimination? If so, list the key elements of these measures.	Yes		<ul style="list-style-type: none"> <li>• Implementation of workplace policies on human rights.</li> <li>• Promotion of HIV health in the workplace.</li> <li>• Non stigmatizing communication/language when HIV/AIDS matters are discussed.</li> <li>• Non-tolerance of discrimination and on infringements on human rights.</li> </ul>

# 2022/23 ANNUAL REPORT

Question	Yes	No	Details, if yes
7. Does the department encourage its employees to undergo Voluntary Counselling and Testing? If so, list the results that you have achieved.	Yes		The department would like to see all employees undergoing VCT. The uptake is low; however, employees are encouraged to know their status. Opportunities to test are made available in the occupational health clinic, but also, the Department has partnered with external companies like GEMS and different NGOs to encourage employees to test. Moreover, they are encouraged to utilize their private doctors as well if they prefer.
8. Has the department developed measures/indicators to monitor & evaluate the impact of its health promotion programme? If so, list these measures/indicators.	Yes		Continuous monitoring of the programme is done through: <ul style="list-style-type: none"> <li>• Medical surveillance</li> <li>• Sick leave statistics</li> <li>• Absenteeism stats</li> <li>• Participation in health promotion events</li> <li>• Staff Satisfaction Survey</li> <li>• Stress survey</li> </ul>

# REPORT OF THE AUDITOR-GENERAL

2022-23

KwaZulu-Natal Department of Health

## Report of the auditor-general to KwaZulu-Natal Provincial Legislature on vote no. 7: Department of Health

### Report on the audit of the financial statements

#### Opinion

1. I have audited the financial statements of the Department of Health set out on pages 357 to 407, which comprise the appropriation statement, statement of financial position as at 31 March 2023, statement of financial performance, statement of changes in net assets, and cash flow statement for the year then ended, as well as notes to the financial statements, including a summary of significant accounting policies.
2. In my opinion, the financial statements present fairly, in all material respects, the financial position of the Department of Health as at 31 March 2023, and its financial performance and cash flows for the year then ended in accordance with the Modified Cash Standards (MCS) as prescribed by the National Treasury and the requirements of the Public Finance Management Act of South Africa, 1999 (Act No. 1 of 1999) (PFMA) and the Division of Revenue Act of South Africa, 2022 (Act No. 5 of 2022) (Dora).

#### Basis for opinion

3. I conducted my audit in accordance with the International Standards on Auditing (ISAs). My responsibilities under those standards are further described in the responsibilities of the auditor-general for the audit of the financial statements section of my report.
4. I am independent of the department in accordance with the International Ethics Standards Board for Accountants' *International code of ethics for professional accountants (including International Independence Standards)* (IESBA code) as well as other ethical requirements that are relevant to my audit in South Africa. I have fulfilled my other ethical responsibilities in accordance with these requirements and the IESBA code.
5. I believe that the audit evidence I have obtained is sufficient and appropriate to provide a basis for my opinion.

#### Emphasis of matters

6. I draw attention to the matters below. My opinion is not modified in respect of these matters.

#### Uncertainty relating to the future outcome of litigation

7. The department is a defendant on various litigation matters relating to medical negligence and claims against the state amounting to R7,87 billion as disclosed in note 19.1 to the financial statements. The ultimate outcome of these matters could not be determined and no provision for any liability that may result was made in the financial statements.

# 2022/23 ANNUAL REPORT

---

## Payables

8. As disclosed in note 21.2 to the financial statements, payables not recognised of R212,05 million exceeded the payment term of 30 days, as required by treasury regulation 8.2.3. This amount, in turn, exceeded the R5,90 million of voted funds to be surrendered by R206,15 million as per the statement of financial performance. The amount of R206,15 million would therefore have constituted unauthorised expenditure had the amounts due been paid on time.

## Other matters

9. I draw attention to the matters below. My opinion is not modified in respect of these matters.

## National Treasury Instruction No. 4 of 2022/2023: PFMA Compliance and Reporting Framework

10. On 23 December 2022 National Treasury issued Instruction Note No. 4: PFMA Compliance and Reporting Framework of 2022-23 in terms of section 76(1)(b), (e) and (f), 2(e) and (4)(a) and (c) of the PFMA, which came into effect on 3 January 2023. The PFMA Compliance and Reporting Framework also addresses the disclosure of unauthorised expenditure, irregular expenditure and fruitless and wasteful expenditure. Among the effects of this framework is that irregular and fruitless and wasteful expenditure incurred in previous financial years and not addressed is no longer disclosed in the disclosure notes of the annual financial statements, only the current year and prior year figures are disclosed in note 25 to the financial statements. The movements in respect of irregular expenditure and fruitless and wasteful expenditure is no longer disclosed in the notes to the annual financial statements of the Department of Health. The disclosure of these movements (e.g., condoned, recoverable, removed, written off, under assessment, under determination and under investigation) are now required to be included as part of other information in the annual report of the auditees.
11. I do not express an opinion on the disclosure of irregular expenditure and fruitless and wasteful expenditure in the annual report.

## Unaudited supplementary schedules

12. The supplementary information set out on pages 408 to 438 does not form part of the financial statements and is presented as additional information. I have not audited these schedules and, accordingly, I do not express an opinion on them.

## Responsibilities of the accounting officer for the financial statements

13. The accounting officer is responsible for the preparation and fair presentation of the financial statements in accordance with the MCS and the requirements of the PFMA and Dora, and for such internal control as the accounting officer determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

## 2022/23 ANNUAL REPORT

14. In preparing the financial statements, the accounting officer is responsible for assessing the department's ability to continue as a going concern, disclosing, as applicable, matters relating to going concern, and using the going concern basis of accounting unless the appropriate governance structure either intends to liquidate the department or to cease operations, or has no realistic alternative but to do so.

### Responsibilities of the auditor-general for the audit of the financial statements

15. My objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error; and to issue an auditor's report that includes my opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with the ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.
16. A further description of my responsibilities for the audit of the financial statements is included in the annexure to this auditor's report.

### Report on the audit of the annual performance report

17. In accordance with the Public Audit Act, 2004 (Act No. 25 of 2004) (PAA) and the general notice issued in terms thereof, I must audit and report on the usefulness and reliability of the reported performance against predetermined objectives for selected programmes presented in the annual performance report. The accounting officer is responsible for the preparation of the annual performance report.
18. I selected the following programmes presented in the annual performance report for the year ended 31 March 2023 for auditing. I selected programmes that measure the department's performance on its primary mandated functions and that are of significant national, community or public interest.

Programme	Page numbers	Purpose
1. <b>District health services</b>	2. 93	3. To render primary health care and district hospital services.
4. <b>Provincial hospitals</b>	5. 129	6. Deliver hospital services, which are accessible, appropriate, and effective and provide general specialist services, including rehabilitation services, as well as a platform for training health professionals and research.

19. I evaluated the reported performance information for the selected programmes against the criteria developed from the performance management and reporting framework, as defined in

## 2022/23 ANNUAL REPORT

the general notice. When an annual performance report is prepared using these criteria, it provides useful and reliable information and insights to users on the department's planning and delivery on its mandate and objectives.

20. I performed procedures to test whether:

- the indicators used for planning and reporting on performance can be linked directly to the department's mandate and the achievement of its planned objectives
- the indicators are well defined and verifiable to ensure that they are easy to understand and apply consistently and that I can confirm the methods and processes to be used for measuring achievements
- the targets can be linked directly to the achievement of the indicators and are specific, time bound and measurable to ensure that it is easy to understand what should be delivered and by when, the required level of performance as well as how performance will be evaluated
- the indicators and targets reported on in the annual performance report are the same as what was committed to in the approved initial or revised planning documents
- the reported performance information is presented in the annual performance report in the prescribed manner
- there are adequate supporting evidence for the achievements reported and for the reasons provided for any over- or underachievement of targets.

21. I performed the procedures for the purpose of reporting material findings only; and not to express an assurance opinion.

22. The material findings on the performance information of the selected programmes are as follows:

### District health services

#### Various indicators

23. Some supporting evidence was not provided for auditing; and, where it was, I identified material differences between the actual and reported achievements. Consequently, the achievements might be more or less than reported and were not reliable for determining if the targets had been achieved.

Indicator description	Planned target	Reported achievement
Child under 5 years pneumonia case fatality rate – District hospital	1,7%	1,3%

## 2022/23 ANNUAL REPORT

Indicator description	Planned target	Reported achievement
All DS-TB client treatment success rate	85%	82,6%
ART Adult viral load suppressed rate (12 months)	90%	91%
ART Child viral load suppressed rate (12 months)	90%	66,3%
HIV positive 15-24 year olds (excl ANC) rate	2,9%	1,8%
All DS-TB client lost to follow up rate	6,0%	9,1%
ART adult remain in care rate (12 months)	90%	67,5%
Infant PCR test positive around 10 weeks rate	0,5%	0,35%
Child under 5 years Pneumonia case fatality rate – total	2,0%	1,9%
Antenatal 1st visit before 20 weeks rate	77%	73,8%
Mother postnatal visit within 6 days rate	90%	83,5%
Couple year protection rate	62,5%	56,7%
Immunisation under 1 year coverage	90%	92,2%
Measles 2nd dose coverage	94%	89,5%

### Ideal clinic status rate

24. An achievement of 93,4% was reported against a target of 80,1%. I could not determine if the reported achievement was correct, as adequate supporting evidence was not provided for auditing. Consequently, the reported achievement might be more or less than reported and was not reliable for determining if the target had been achieved.

### Provincial hospital services

#### Various indicators

25. Based on audit evidence, the actual achievements for two indicators did not agree to what was reported. I could not determine the actual achievements, but I estimated them to be materially more.

## 2022/23 ANNUAL REPORT

Indicator description	Planned target	Reported achievement
Child under 5 years diarrhoea case fatality rate – Regional hospital	1,6%	2,6%
Child under 5 years pneumonia case fatality rate – Regional hospital	2,2%	2,0%

### Other matters

26. I draw attention to the matters below.

#### Achievement of planned targets

27. The annual performance report includes information on reported achievements against planned targets and provides explanations for over- and under achievements. This information should be considered in the context of the material findings on the reported performance information.
28. The department plays a key role in delivering services to South Africans. The annual performance report includes the following service delivery achievements against planned targets:

Key service delivery indicators not achieved	Planned target	Reported achievement
District health services Targets achieved: 49,3% Budget spent: 100%		
Child under 5 years severe acute malnutrition case fatality rate – District hospital	6,1%	8,8%
All DS-TB client treatment success rate	85,0%	82,6%
ART Child viral load suppressed rate (12 months)	90,0%	66,3%
All DS-TB client lost to follow up rate	6,0%	9,1%
ART adult remain in care rate (12 months)	90,0%	67,5%
ART child remain in care rate (12 months)	90,0%	77,7%
Live Birth under 2 500g in facility rate – Total	11,3%	12,7%
Child under 5 years severe acute malnutrition case fatality rate – total	5,5%	9,2%
Couple year protection rate	62,5%	57,6%
Antenatal 1st visit before 20 weeks rate	77,0%	73,8%

## 2022/23 ANNUAL REPORT

Key service delivery indicators not achieved	Planned target	Reported achievement
Mother postnatal visit within 6 days rate	90,0%	83,5%
Measles 2nd dose coverage	94,0%	89,5%
Malaria case fatality rate	0%	1,7%
Provincial hospital services Targets achieved: 36,4% Budget spent: 100%		
Child under 5 years diarrhoea case fatality rate – Regional hospital	1,6%	2,6%
Child under 5 years severe acute malnutrition case fatality rate – Regional hospital	5,9%	10,3%

Reasons for the underachievement of targets are included in the annual performance report on pages 52 to 175.

### Material misstatements

29. I identified material misstatements in the annual performance report submitted for auditing. These material misstatements were in the reported performance information of district health services and provincial hospital services programmes. Management did not correct all of the misstatements and I reported material findings in this regard.

### Report on compliance with legislation

30. In accordance with the PAA and the general notice issued in terms thereof, I must audit and report on compliance with applicable legislation relating to financial matters, financial management and other related matters. The accounting officer is responsible for the department's compliance with legislation.
31. I performed procedures to test compliance with selected requirements in key legislation in accordance with the findings engagement methodology of the Auditor-General of South Africa (AGSA). This engagement is not an assurance engagement. Accordingly, I do not express an assurance opinion or conclusion.
32. Through an established AGSA process, I selected requirements in key legislation for compliance testing that are relevant to the financial and performance management of the department, clear to allow consistent measurement and evaluation, while also sufficiently detailed and readily available to report in an understandable manner. The selected legislative requirements are included in the annexure to this auditor's report.

## 2022/23 ANNUAL REPORT

---

33. The material findings on compliance with the selected legislative requirements, presented per compliance theme, are as follows:

### **Expenditure management**

34. Effective and appropriate steps were not taken to prevent irregular expenditure, as required by section 38(1)(c)(ii) of the PFMA and treasury regulation 9.1.1. The majority of the irregular expenditure disclosed in the financial statements was as a result of the continued use of and payments made on expired contracts.

35. Payments were not made within 30 days or an agreed period after receipt of an invoice, as required by treasury regulation 8.2.3.

### **Procurement and contract management**

36. I was unable to obtain sufficient appropriate audit evidence that all contracts were awarded in accordance with the legislative requirements as a result of poor records management. Similar limitations were also reported in the prior year.

37. Some of the quotations were not awarded in an economical manner and the prices of the goods or services were not reasonable as required by PFMA 38(1)(b) and PFMA 45(b).

38. Some of the goods and services of a transaction value above R1 000 000 were procured without inviting competitive bids and deviations were approved by the accounting officer but it was practical to invite competitive bids, as required by Treasury Regulation 16A6.1, paragraph 3.3.1 of NTI 02 of 2021-22, paragraph 4.1 of NTI 03 of 2021-22 and TR 16A6.4. Similar non-compliance was also reported in the prior year.

39. Some of the contracts were awarded to bidders based on evaluation criteria that were not stipulated and/or differed from those stipulated in the original invitation for bidding and quotations as required by Treasury Regulation 16A6.3(a) and (b).

40. The preference point system was not applied in some of the procurement of goods and services as required by section 2(a) of the Preferential Procurement Policy Framework, 2000 (Act No. 5 of 2000) and Treasury Regulation 16A6.3(b). Similar non-compliance was also reported in the prior year.

41. I was unable to obtain sufficient appropriate audit evidence that construction contracts were awarded to contractors that were registered with the Construction Industry Development Board (CIDB) and qualified for the contract in accordance with section 18(1) of the CIDB Act and CIDB Regulations 17 and 25(7A).

42. Bid documentation or invitation to tender for procurement of commodities designated for local content and production, did not stipulated the minimum threshold for local production and content as required by the 2017 procurement regulation 8(2). Similar non-compliance was also reported in the prior year.

## 2022/23 ANNUAL REPORT

---

43. Persons in service of the department who had a private or business interest in contracts awarded by the department failed to disclose such interest, as required by Treasury Regulation 16A8.4 and the Public Service Regulations 18(1). Similar non-compliance was reported in the previous year and disciplinary action was not taken against the officials involved.
44. Persons in service of the department whose close family members, partners or associates had a private or business interest in contracts awarded by the department failed to disclose such interest, as required by Treasury Regulation 16A8.4. Similar non-compliance was reported in the previous year and disciplinary action was not taken against the officials involved.

### Consequence management

45. I was unable to obtain sufficient appropriate audit evidence that disciplinary steps were taken against officials who had incurred unauthorised, irregular as well as fruitless and wasteful expenditure as required by section 38(1)(h)(iii) of the PFMA. This was due to proper and complete records that were not maintained as evidence to support the investigations into unauthorised, irregular as well as fruitless and wasteful expenditure.

### Strategic planning and performance management

46. Specific information systems were not implemented to enable the monitoring of progress made towards achieving targets, core objectives and service delivery as required by public service regulation 25(1)(e)(i) and (iii).

### Other information in the annual report

47. The accounting officer is responsible for the other information included in the annual report. The other information referred to does not include the financial statements, the auditor's report and those selected programmes presented in the annual performance report that have been specifically reported on in this auditor's report.
48. My opinion on the financial statements, the report on the audit of the annual performance report and the report on compliance with legislation, do not cover the other information included in the annual report and I do not express an audit opinion or any form of assurance conclusion on it.
49. My responsibility is to read this other information and, in doing so, consider whether it is materially inconsistent with the financial statements and the selected programmes presented in the annual performance report, or my knowledge obtained in the audit, or otherwise appears to be materially misstated.
50. I did not receive the other information prior to the date of this auditor's report. When I do receive and read this information, if I conclude that there is a material misstatement therein, I am required to communicate the matter to those charged with governance and request that the other information be corrected. If the other information is not corrected, I may have to retract

## 2022/23 ANNUAL REPORT

this auditor's report and re-issue an amended report as appropriate. However, if it is corrected this will not be necessary.

### Internal control deficiencies

51. I considered internal control relevant to my audit of the financial statements, annual performance report and compliance with applicable legislation; however, my objective was not to express any form of assurance on it.
52. The matters reported below are limited to the significant internal control deficiencies that resulted in the material findings on the annual performance report and the material findings on compliance with legislation included in this report.
53. Leadership did not provide adequate oversight and monitoring to ensure that action plans were implemented to fully address previous audit findings on predetermined objectives and compliance with legislation. Furthermore, consequence management was not effectively implemented for transgressions of legislation.
54. Management did not effectively implement a proper document management and record keeping systems to ensure that complete, relevant and accurate information is accessible and available to support performance reporting and compliance with legislation. In addition, the overall information technology (IT) control environment requires intervention due to inadequate IT governance, IT security management, user access management, IT service continuity, program change management and cybersecurity.

### Material irregularities

55. In accordance with the PAA and the Material Irregularity Regulations, I have a responsibility to report on material irregularities identified during the audit and on the status of material irregularities as previously reported in the auditor's report.

### Status of previously reported material irregularities

#### Procurement of sanitiser detergent at prices higher than permissible

56. Through an emergency procurement process on 25 March 2020, the department ordered 40 000 units of 1L hand sanitiser at R143 per unit. The total value of the order and payments made were R5,72 million.
57. The department did not comply with paragraph 3.7.6(ii) of National Treasury Instruction note 8 of 2019-20 which states that institutions may approach any other supplier to obtain quotes and may procure from such suppliers on condition that the prices are equal to or lower than the prices in Annexure A. The price in Annexure A for sanitisers as at 24 March 2020 was R110.40 per unit of 1 litre. The non-compliance resulted in a material financial loss amounting to R1,3 million for the department as the sanitiser was procured at prices which were excessive.

## 2022/23 ANNUAL REPORT

---

58. The accounting officer was notified of the material irregularity on 12 February 2021 and the matter was investigated by the Special Investigations Unit (SIU) from which R1,1 million of the material financial loss was recovered from the supplier. Furthermore, responsible officials from the department were issued with warning letters.
59. The actions taken by the accounting officer were considered sufficient and appropriate in addressing the material irregularity.

### **Material irregularities identified during the audit**

#### **Interest on overdue account**

60. The department did not comply with treasury regulation 8.2.3 which indicates that unless determined otherwise in a contract or other agreement, all payments due to creditors must be settled within 30 days from receipt of an invoice or, in the case of civil claims, from the date of settlement or court judgement.
61. The department incurred a financial loss of R2,09 million in relation to interest paid on overdue accounts. The interest was imposed as a result of the department not paying within 30 days of receiving invoices and statements. This amounted to a non-compliance with treasury regulation 8.2.3.
62. The accounting officer was notified of the material irregularity on 26 August 2022 and invited to make a written submission on the actions taken or to be taken to address the matter. An investigation into this material irregularity was undertaken and it was noted that a portion of this interest was incorrectly charged by the service provider.
63. Furthermore, the interest that was incorrectly calculated amounting to R1,45 million was refunded back to the department. The department is currently conducting an enquiry/ investigation on the remaining balance amounting to R0,64 million.
64. I will follow up on the outcome of the investigation in the next audit.

#### **Other reports**

65. In addition to the investigations relating to material irregularities, I draw attention to the following engagements conducted by various parties. These reports did not form part of my opinion on the financial statements or my findings on the reported performance information or compliance with legislation.
66. The special investigations unit at the department, other appointed service providers and Office of the Premier are performing investigations relating to allegations of incorrect awarding of certain contracts, accusations of theft, employees performing unauthorised remunerative work outside the public service and the misappropriation of inventory. The investigations cover the period 1 July 2008 to 31 March 2023 and were still in progress at the date of this report.

*Auditor - General.*

Pietermaritzburg

31 July 2023

## **Annexure to the auditor's report**

The annexure includes the following:

- the auditor-general's responsibility for the audit
- the selected legislative requirements for compliance testing.

### **Auditor-general's responsibility for the audit**

#### **Professional judgement and professional scepticism**

As part of an audit in accordance with the ISAs, I exercise professional judgement and maintain professional scepticism throughout my audit of the financial statements and the procedures performed on reported performance information for selected programmes and on the department's compliance with selected requirements in key legislation.

#### **Financial statements**

In addition to my responsibility for the audit of the financial statements as described in this auditor's report, I also:

- identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error; design and perform audit procedures responsive to those risks; and obtain audit evidence that is sufficient and appropriate to provide a basis for my opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations or the override of internal control
- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the department's internal control
- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made
- conclude on the appropriateness of the use of the going concern basis of accounting in the preparation of the financial statements. I also conclude, based on the audit evidence obtained, whether a material uncertainty exists relating to events or conditions that may cast significant doubt on the ability of the department to continue as a going concern. If I conclude that a material uncertainty exists, I am required to draw attention in my auditor's report to the related disclosures in the financial statements about the material uncertainty or, if such disclosures are inadequate, to modify my opinion on the financial statements. My conclusions are based on the information available to me at the date of this auditor's report. However, future events or conditions may cause a department to cease operating as a going concern
- evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and determine whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

## 2022/23 ANNUAL REPORT

---

### **Communication with those charged with governance**

I communicate with the accounting officer regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that I identify during my audit.

I also provide the accounting officer with a statement that I have complied with relevant ethical requirements regarding independence and to communicate with them all relationships and other matters that may reasonably be thought to bear on my independence and, where applicable, actions taken to eliminate threats or safeguards applied.

# 2022/23 ANNUAL REPORT

## Compliance with legislation – selected legislative requirements

The selected legislative requirements are as follows:

Legislation	Sections or regulations
Public Finance Management Act No.1 of 1999 (PFMA)	PFMA 38(1)(c)(i), 40(1)(a), 40(1)(b), 40(1)(c)(i), 38(1)(b), 38(1)(c)(ii), 39(1)(a), 39(2)(a), 43(4), 45(b), 38(1)(d), 38(1)(h)(iii), 38(1)(a)(iv), 38(1)(b), 38(1)(c), 38(1)(c)(ii), 44, 44(1), 44(2), 45(b), 50 (3) and 50(3)(a)
Treasury Regulations for departments, trading entities, constitutional institutions and public entities (TR)	TR 7.2.1, 11.4.1, 11.4.2, 11.5.1, 17.1.1, 18.2, 19.8.4, 6.3.1(a), 6.3.1(b), 6.3.1(c), 6.3.1(d), 6.4.1(b), 8.1.1, 8.2.1, 8.2.3, 9.1.1, 15.10.1.2(c), 10.1.1(a), 10.1.2, 16A.7.1, 16A.7.3, 16A.7.6, 16A.7.7, 8.4.1, 5.1.1, 5.2.1, 5.2.3(a), 5.2.3(d), 5.3.1, 4.1.1, 4.1.3, 9.1.4, 12.5.1, 16A9.1(b)(ii), 16A9.1(e), 16A9.1(f), 16A 3.1, 16A 3.2 (fairness), 16A 3.2(a), 16A 6.1, 16A6.2(a), 16A6.2 (b), 16A6.2(e), 16A 6.3(a), 16A 6.3(a)(i), 16A 6.3(b), 16A 6.3(c), 16A 6.3(d), 16A 6.3(e), 16A 6.4, 16A 6.5, 16A 6.6, 16A8.2 (1), 16A8.2 (2), 16A 8.3, 16A 8.3(d), 16A 8.4, 16A 9, 16A 9.1, 16A9.1 (c), 16A 9.1(d), 16A 9.1(e), 16A 9.2, 16A 9.2(a)(ii), 16A 9.2(a)(iii), 8.2.1 and 8.2.2
Public service regulation	PSR 25(1)(e)(i), 25(1)(e)(iii), 13 (c), 18, 18 (1) and 18(2)
Prevention and Combating of Corrupt Activities Act No.12 of 2004 (PRECCA)	PRECCA 34(1) and 29
Construction Industry Development Board Act No.38 of 2000 (CIDB)	CIDB Act 18(1)

## ACCOUNTING POLICIES FOR THE YEAR ENDED 31 MARCH 2023

### Summary of significant accounting policies

The financial statements have been prepared in accordance with the following policies, which have been applied consistently in all material aspects, unless otherwise indicated. Management has concluded that the financial statements present fairly the department's primary and secondary information.

The historical cost convention has been used, except where otherwise indicated. Management has used assessments and estimates in preparing the annual financial statements. These are based on the best information available at the time of preparation.

Where appropriate and meaningful, additional information has been disclosed to enhance the usefulness of the financial statements and to comply with the statutory requirements of the Public Finance Management Act (PFMA), Act 1 of 1999 (as amended by Act 29 of 1999), and the Treasury Regulations issued in terms of the PFMA and the annual Division of Revenue Act.

<b>1</b>	<p><b>Basis of preparation</b></p> <p>The financial statements have been prepared in accordance with the Modified Cash Standard.</p>
<b>2</b>	<p><b>Going concern</b></p> <p>The financial statements have been prepared on a going concern basis.</p>
<b>3</b>	<p><b>Presentation currency</b></p> <p>Amounts have been presented in the currency of the South African Rand (R) which is also the functional currency of the department.</p>
<b>4</b>	<p><b>Rounding</b></p> <p>Unless otherwise stated financial figures have been rounded to the nearest one thousand Rand (R'000).</p>
<b>5</b>	<p><b>Foreign currency translation</b></p> <p>Cash flows arising from foreign currency transactions are translated into South African Rands using the spot exchange rates prevailing at the date of payment / receipt.</p>
<b>6</b>	<p><b>Comparative information</b></p>
<b>6.1</b>	<p><b>Prior period comparative information</b></p> <p>Prior period comparative information has been presented in the current year's financial statements. Where necessary figures included in the prior period financial statements have been reclassified to ensure that the format in which the information is presented is consistent with the format of the current year's financial statements.</p>
<b>6.2</b>	<p><b>Current year comparison with budget</b></p> <p>A comparison between the approved, final budget and actual amounts for each programme and economic classification is included in the appropriation statement.</p>

# 2022/23 ANNUAL REPORT

## ACCOUNTING POLICIES FOR THE YEAR ENDED 31 MARCH 2023

<b>7</b>	<b>Revenue</b>
<b>7.1</b>	<p><b>Appropriated funds</b></p> <p>Appropriated funds comprises of departmental allocations as well as direct charges against the revenue fund (i.e. statutory appropriation).</p> <p>Appropriated funds are recognised in the statement of financial performance on the date the appropriation becomes effective. Adjustments made in terms of the adjustments budget process are recognised in the statement of financial performance on the date the adjustments become effective.</p> <p>The net amount of any appropriated funds due to / from the relevant revenue fund at the reporting date is recognised as a payable / receivable in the statement of financial position.</p>
<b>7.2</b>	<p><b>Departmental revenue</b></p> <p>Departmental revenue is recognised in the statement of financial performance when received and is subsequently paid into the relevant revenue fund, unless stated otherwise.</p> <p>Any amount owing to the relevant revenue fund at the reporting date is recognised as a payable in the statement of financial position.</p>
<b>7.3</b>	<p><b>Accrued departmental revenue</b></p> <p>Accruals in respect of departmental revenue (excluding tax revenue) are recorded in the notes to the financial statements when:</p> <ul style="list-style-type: none"> <li>it is probable that the economic benefits or service potential associated with the transaction will flow to the department; and</li> <li>the amount of revenue can be measured reliably.</li> </ul> <p>The accrued revenue is measured at the fair value of the consideration receivable.</p> <p>Accrued tax revenue (and related interest and / penalties) is measured at amounts receivable from collecting agents.</p> <p>Write-offs are made according to the department's debt write-off policy</p>
<b>8</b>	<b>Expenditure</b>
<b>8.1</b>	<b>Compensation of employees</b>
<b>8.1.1</b>	<p><b>Salaries and wages</b></p> <p>Salaries and wages are recognised in the statement of financial performance on the date of payment.</p>
<b>8.1.2</b>	<p><b>Social contributions</b></p> <p>Social contributions made by the department in respect of current employees are recognised in the statement of financial performance on the date of payment.</p> <p>Social contributions made by the department in respect of ex-employees are classified as transfers to households in the statement of financial performance on the date of payment.</p>
<b>8.2</b>	<p><b>Other expenditure</b></p> <p>Other expenditure (such as goods and services, transfers and subsidies and payments for capital assets) is recognised in the statement of financial performance on the date of payment. The expense is classified as a capital expense if the total consideration paid is more than the capitalisation threshold.</p>

# 2022/23 ANNUAL REPORT

## ACCOUNTING POLICIES FOR THE YEAR ENDED 31 MARCH 2023

<b>8.3</b>	<b>Accruals and payables not recognised</b> Accruals and payables not recognised are recorded in the notes to the financial statements at cost at the reporting date.
<b>8.4</b>	<b>Leases</b>
<b>8.4.1</b>	<b>Operating leases</b> Operating lease payments made during the reporting period are recognised as current expenditure in the statement of financial performance on the date of payment. The operating lease commitments are recorded in the notes to the financial statements.
<b>8.4.2</b>	<b>Finance leases</b> Finance lease payments made during the reporting period are recognised as capital expenditure in the statement of financial performance on the date of payment. The finance lease commitments are recorded in the notes to the financial statements and are not apportioned between the capital and interest portions. Finance lease assets acquired at the end of the lease term are recorded and measured at the lower of: <ul style="list-style-type: none"> <li>• cost, being the fair value of the asset; or</li> <li>• the sum of the minimum lease payments made, including any payments made to acquire ownership at the end of the lease term, excluding interest.</li> </ul>
<b>9</b>	<b>Aid Assistance</b>
<b>9.1</b>	<b>Aid assistance received</b> Aid assistance received in cash is recognised in the statement of financial performance when received. In-kind aid assistance is recorded in the notes to the financial statements on the date of receipt and is measured at fair value. Aid assistance not spent for the intended purpose and any unutilised funds from aid assistance that are required to be refunded to the donor are recognised as a payable in the statement of financial position.
<b>9.2</b>	<b>Aid assistance paid</b> Aid assistance paid is recognised in the statement of financial performance on the date of payment. Aid assistance payments made prior to the receipt of funds are recognised as a receivable in the statement of financial position.
<b>10</b>	<b>Cash and cash equivalents</b> Cash and cash equivalents are stated at cost in the statement of financial position. Bank overdrafts are shown separately on the face of the statement of financial position as a current liability. For the purposes of the cash flow statement, cash and cash equivalents comprise cash on hand, deposits held, other short-term highly liquid investments and bank overdrafts.

# 2022/23 ANNUAL REPORT

## ACCOUNTING POLICIES FOR THE YEAR ENDED 31 MARCH 2023

<b>11</b>	<p><b>Prepayments and advances</b></p> <p>Prepayments and advances are recognised in the statement of financial position when the department receives or disburses the cash.</p> <p>Prepayments and advances are initially and subsequently measured at cost.</p> <p>&lt;Indicate when prepayments are expensed and under what circumstances.&gt;</p>
<b>12</b>	<p><b>Payables</b></p> <p>Payables recognised in the statement of financial position are recognised at cost.</p>
<b>13</b>	<p><b>Capital Assets</b></p>
<b>13.1</b>	<p><b>Immovable capital assets</b></p> <p>Immovable assets reflected in the asset register of the department are recorded in the notes to the financial statements at cost or fair value where the cost cannot be determined reliably. Immovable assets acquired in a non-exchange transaction are recorded at fair value at the date of acquisition. Immovable assets are subsequently carried in the asset register at cost and are not currently subject to depreciation or impairment.</p> <p>Subsequent expenditure of a capital nature forms part of the cost of the existing asset when ready for use.</p> <p>Additional information on immovable assets not reflected in the assets register is provided in the notes to financial statements.</p>
<b>13.2</b>	<p><b>Movable capital assets</b></p> <p>Movable capital assets are initially recorded in the notes to the financial statements at cost. Movable capital assets acquired through a non-exchange transaction is measured at fair value as at the date of acquisition.</p> <p>Where the cost of movable capital assets cannot be determined reliably, the movable capital assets are measured at fair value and where fair value cannot be determined; the movable assets are measured at R1.</p> <p>All assets acquired prior to 1 April 2002 (or a later date as approved by the OAG) may be recorded at R1.</p> <p>Movable capital assets are subsequently carried at cost and are not subject to depreciation or impairment.</p> <p>Subsequent expenditure that is of a capital nature forms part of the cost of the existing asset when ready for use.</p>
<b>13.3</b>	<p><b>Intangible assets</b></p> <p>Intangible assets are initially recorded in the notes to the financial statements at cost. Intangible assets acquired through a non-exchange transaction are measured at fair value as at the date of acquisition.</p> <p>Internally generated intangible assets are recorded in the notes to the financial statements when the department commences the development phase of the project.</p> <p>Where the cost of intangible assets cannot be determined reliably, the intangible capital assets are measured at fair value and where fair value cannot be determined; the intangible assets are measured at R1.</p> <p>All assets acquired prior to 1 April 2002 (or a later date as approved by the OAG) may be recorded at R1.</p> <p>Intangible assets are subsequently carried at cost and are not subject to depreciation or impairment.</p> <p>Subsequent expenditure of a capital nature forms part of the cost of the existing asset when ready for use.</p>

# 2022/23 ANNUAL REPORT

## ACCOUNTING POLICIES FOR THE YEAR ENDED 31 MARCH 2023

13.4	<p><b>Project Costs: Work-in-progress</b></p> <p>Expenditure of a capital nature is initially recognised in the statement of financial performance at cost when paid.</p> <p>Amounts paid towards capital projects are separated from the amounts recognised and accumulated in work-in-progress until the underlying asset is ready for use. Once ready for use, the total accumulated payments are recorded in an asset register. Subsequent payments to complete the project are added to the capital asset in the asset register.</p> <p>Where the department is not the custodian of the completed project asset, the asset is transferred to the custodian subsequent to completion.</p>
14	<p><b>Provisions and Contingents</b></p>
14.1	<p><b>Provisions</b></p> <p>Provisions are recorded in the notes to the financial statements when there is a present legal or constructive obligation to forfeit economic benefits as a result of events in the past and it is probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation and a reliable estimate of the obligation can be made. The provision is measured as the best estimate of the funds required to settle the present obligation at the reporting date.</p>
14.2	<p><b>Contingent liabilities</b></p> <p>Contingent liabilities are recorded in the notes to the financial statements when there is a possible obligation that arises from past events, and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not within the control of the department or when there is a present obligation that is not recognised because it is not probable that an outflow of resources will be required to settle the obligation or the amount of the obligation cannot be measured reliably.</p>
14.3	<p><b>Contingent assets</b></p> <p>Contingent assets are recorded in the notes to the financial statements when a possible asset arises from past events, and whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events not within the control of the department.</p>
14.4	<p><b>Capital Commitments</b></p> <p>Capital Commitments (other than for transfers and subsidies) are recorded at cost in the notes to the financial statements when there is a contractual arrangement or an approval by management in a manner that raises a valid expectation that the department will discharge its responsibilities thereby incurring future expenditure that will result in the outflow of cash.</p>
15	<p><b>Unauthorised expenditure</b></p> <p>Unauthorised expenditure is recognised in the statement of financial position until such time as the expenditure is either:</p> <ul style="list-style-type: none"> <li>• approved by Parliament or the Provincial Legislature with funding and the related funds are received; or</li> <li>• approved by Parliament or the Provincial Legislature without funding and is written off against the appropriation in the statement of financial performance; or</li> <li>• Transferred to receivables for recovery.</li> </ul> <p>Unauthorised expenditure is measured at the amount of the confirmed unauthorised expenditure.</p>

# 2022/23 ANNUAL REPORT

## ACCOUNTING POLICIES FOR THE YEAR ENDED 31 MARCH 2023

<p><b>16</b></p>	<p><b>Fruitless and wasteful expenditure</b></p> <p>Fruitless and wasteful expenditure is recorded in the notes to the financial statements when confirmed. The amount recorded is equal to the total value of the fruitless and or wasteful expenditure incurred.</p> <p>Fruitless and wasteful expenditure is removed from the notes to the financial statements when it is resolved or transferred to receivables for recovery.</p> <p>Fruitless and wasteful expenditure receivables are measured at the amount that is expected to be recoverable and are de-recognised when settled or subsequently written-off as irrecoverable.</p>
<p><b>17</b></p>	<p><b>Irregular expenditure</b></p> <p>Irregular expenditure is recorded in the notes to the financial statements when confirmed. The amount recorded is equal to the value of the irregular expenditure incurred unless it is impracticable to determine, in which case reasons therefor are provided in the note.</p> <p>Irregular expenditure is removed from the note when it is either condoned by the relevant authority, transferred to receivables for recovery or not condoned and is not recoverable.</p> <p>Irregular expenditure receivables are measured at the amount that is expected to be recoverable and are de-recognised when settled or subsequently written-off as irrecoverable.</p>
<p><b>18</b></p>	<p><b>Changes in accounting policies, accounting estimates and errors</b></p> <p>Changes in accounting policies that are effected by management have been applied retrospectively in accordance with MCS requirements, except to the extent that it is impracticable to determine the period-specific effects or the cumulative effect of the change in policy. In such instances the department shall restate the opening balances of assets, liabilities and net assets for the earliest period for which retrospective restatement is practicable.</p> <p>Changes in accounting estimates are applied prospectively in accordance with MCS requirements.</p> <p>Correction of errors is applied retrospectively in the period in which the error has occurred in accordance with MCS requirements, except to the extent that it is impracticable to determine the period-specific effects or the cumulative effect of the error. In such cases the department shall restate the opening balances of assets, liabilities and net assets for the earliest period for which retrospective restatement is practicable.</p>
<p><b>19</b></p>	<p><b>Events after the reporting date</b></p> <p>Events after the reporting date that are classified as adjusting events have been accounted for in the financial statements. The events after the reporting date that are classified as non-adjusting events after the reporting date have been disclosed in the notes to the financial statements.</p>
<p><b>20</b></p>	<p><b>Recoverable revenue</b></p> <p>Amounts are recognised as recoverable revenue when a payment made in a previous financial year becomes recoverable from a debtor in the current financial year. Amounts are either transferred to the National/Provincial Revenue Fund when recovered or are transferred to the statement of financial performance when written-off.</p>

# 2022/23 ANNUAL REPORT

## ACCOUNTING POLICIES FOR THE YEAR ENDED 31 MARCH 2023

21	<p><b>Related party transactions</b></p> <p>A related party transaction is a transfer of resources, services or obligations between the reporting entity and a related party. Related party transactions within the Minister/MEC's portfolio are recorded in the notes to the financial statements when the transaction is not at arm's length.</p> <p>Key management personnel are those persons having the authority and responsibility for planning, directing and controlling the activities of the department. The number of individuals and their full compensation is recorded in the notes to the financial statements.</p>
22	<p><b>Inventories</b></p> <p>At the date of acquisition, inventories are recognised at cost in the statement of financial performance. Where inventories are acquired as part of a non-exchange transaction, the inventories are measured at fair value as at the date of acquisition.</p> <p>Inventories are subsequently measured at the lower of cost and net realisable value or where intended for distribution (or consumed in the production of goods for distribution) at no or a nominal charge, the lower of cost and current replacement value.</p> <p>The cost of inventories is assigned by using the weighted average cost basis.</p>
23	<p><b>Public-Private Partnerships</b></p> <p>Public Private Partnerships are accounted for based on the nature and or the substance of the partnership. The transaction is accounted for in accordance with the relevant accounting policies.</p> <p>A summary of the significant terms of the PPP agreement, the parties to the agreement, and the date of commencement thereof together with the description and nature of the concession fees received, the unitary fees paid, rights and obligations of the department are recorded in the notes to the financial statements.</p>
24	<p><b>Employee benefits</b></p> <p>The value of each major class of employee benefit obligation (accruals, payables not recognised and provisions) is disclosed in the Employee benefits note.</p>
25	<p><b>Best Estimate</b></p> <p>The amount disclosed as a provision and contingent shall be the best estimate of the funds required to settle the present obligation at the reporting date. The time value of money is ignored where the obligation will be settled sometime after the reporting date.</p>

## NOTES TO ANNUAL FINANCIAL STATEMENT FOR THE YEAR ENDED 31 MARCH 2023

### 27. Public Private Partnership

#### Inkosi Albert Luthuli Central Hospital PPP

The Department has in place a public private partnership agreement with Cowslip Investments (Pty) Ltd and Impilo Consortium for the delivery of non-clinical services to the Inkosi Albert Luthuli Central Hospital. The Department is satisfied that the performance of the PPP partners was adequately monitored in terms of the provisions of the agreement.

The Department has the right to the full use of the assets and the consortium may not pledge the assets as security against any borrowings for the duration of the agreement.

The Impilo Consortium is responsible for the provision of the following goods and services:

- supply of Equipment and IM&T Systems that are State of the Art and replace the Equipment and IM&T Systems so as to ensure that they remain State of the Art;
- supply and replacement of Non-Medical Equipment;
- provision of all Services necessary to manage the Project Assets in accordance with Best Industry Practice;
- maintenance and replacement of the Departmental Assets in terms of the replacement schedules;
- provision or procurement of Utilities and Consumables and Surgical Instruments; and
- Provision of Facilities Management Services.

The agreement was concluded with a view to provide the Department with the opportunity to concentrate on the delivery of clinical services at the highest standards in terms of quality, efficiency, effectiveness and patient focussed care.

The Department is responsible for the employment of all healthcare staff and the administration staff, together with the provision of all consumables used in the provision of the healthcare services.

Impilo Consortium is required at its own cost and risk to provide, deliver, Commission, manage, maintain and repair (as the case may be) Project Assets and Department Assets (or part thereof), including the renewal or replacement of Project Assets and Department Assets at such times and in such manner as to enable it to meet the IM&T Output Specifications and the FM Output Specifications; as to ensure that **the Department is, at all times, able to provide Clinical Services that fulfil Hospital's Output Specifications** using State of the Art Equipment and IM&T Systems; as would be required having regard to Best Industry Practice; and as required by Law.

# 2022/23 ANNUAL REPORT

---

## NOTES TO ANNUAL FINANCIAL STATEMENT FOR THE YEAR ENDED 31 MARCH 2023

The replacement of assets over the period of the contract is based on the Replacement Programme which operates on a rolling basis. To that end, at least 1 (one) month prior to the start of each Contract Year thereafter, Impilo Consortium is required to furnish to the Asset Replacement Committee for approval a revised Replacement Programme.

The assets will only transfer to the Department at the end of the period of the agreement.

The Impilo Consortium has to ensure that, at the end of the Project Term the Project Assets and Department Assets comply with the requirements of the Agreement and are in a state of repair which is sound and operationally safe, fair wear and tear excepted and the items comprising each level of Project Assets specified in the agreement between them have an average remaining useful life not less than one third of the original useful life.

Amendment 2 to the PPP agreement was concluded during December 2005. The main aim thereof was to consolidate various amendments agreed upon since the inception date of the contract and no additional financial implications were incurred as a result of the amendments.

The commencement date of the contract was 4 February 2002, with a final commissioning date for the hospital functions being 31 August 2003. The contract is for a period of 15 years from the commencement date. The Department has the option to renew the agreement only for a further year after 15 years.

The agreement requires the Department to pay a monthly service fee as stipulated in the schedule of payments to cover the monthly operational costs for facilities management, provision of information technology services, maintenance of equipment and the supply of equipment related consumables which the consortium is responsible for. The service fee is adjusted monthly for applicable performance penalties in accordance with the provisions of the penalty regime. The Department is also responsible for the payment of a quarterly fee towards the asset replacement reserve.

### Amendment

The PPP agreement contract was extended for expiry in July 2023. The commitment / obligation are as follows:

2023/2024      R 218,442
