### Clinics Operational Managers who received Gold and Platinum on Ideal Clinic.

CJM hospital commemorated an annual Quality Day on the 12<sup>th</sup> of December 2019; Quality Day is designed to recognize the contributions of health professionals and teams who have contributed a lot in providing health care services to the community of Nquthu. This event was to award hospital sections who have obtained 90-100% on National Core Standards, clinics who obtained Gold and Platinum on Ideal Clinic Assessments.

The purpose of this Quality Day' was to promote awareness of the important role quality plays in the successes of the hospital and in the development of an individual's health care workers prosperity. Quality can be defined as excellence in any act of ours and is celebrated with some basic quality-focused activities and events to initiate and encourage the implementation of quality practices around the world by putting in mind that "Quality is never an accident. It is always the result of high intention, sincere effort." Quality is also not a single incident; it is only achieved through hard work and repeated attempts."

This event was to commend health professionals for their hard work and dedication in providing quality health care to patients at all facilities. "Health professionals are required to demonstrate the art of nurturing by both applying professional competencies and positive emotions that will benefit both the health care workers and the healthcare user with inner harmony". You are invited to be part of the Quality journey towards achieving excellence and delivering quality care and service to all our patients" words by the hospital CEO (Mrs. M.Z. Khanyile). The recognition of those healthcare practitioners, teams and clinics that live Quality is extremely important, not only to award the individual but to create awareness amongst all staff.

On the same day the hospital awarded health care workers with long services awards for employees who have been on 10 to 40 years of service in department. The hospital management recognize that the strongest resource is our health care workers, as they provide safe, quality care to CJM Hospital every day. Many of those people have dedicated 10, 20 and 40 years of their lives improving the health of our patients.

## CJM HOSPITAL WORLD AIDS DAY CANDLE LIGHTING PRAYER

CJM Hospital commemorated World AIDS Day on 01 December 2019 by having a prayer at Out-patient Department. This prayer was to recognise the important the essential role that the health care works have played and continue to provide health care services to the people living with HIV and Aids in the community of Nquthu and the surrounding districts.

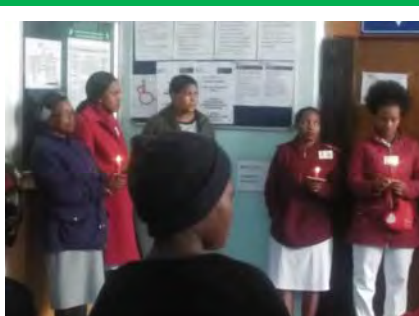

As the globe marks World Aids Day on December 1, the call has again gone out for people to join the fight against HIV and Aids, with the event being used as an opportunity to educate people and to remember those who have passed away.

This annual event has become an important annual reminder that HIV has not gone away and that there is still a vital need to increase awareness, fight prejudice and improve education. This year's theme for the world Aids, "**Communities make the difference**". Communities are encouraged to care for their health by getting tested, practicing safe sex and taking treatment. The Prayer was led by Rev. Shwabane who warned patients and staff to be brave and get tested for HIV.

"Don't just sit back and be clueless about your health status. Go and test your blood so that you'll stay aware of your health condition and get some assistance if you need it. Remember, the more you delay, the more the virus is taking charge of your body. Wise up, love your life, and take care of HIV before it takes care of you.

Hospital Management , staff members and patients who have joined World Aids Day candle lightning prayer led by Rev Shwabane from Lutheran Church.
