

I AM A CLINICAL ASSOCIATE

I am a well-trained member of a doctor-led care team.

I have earned a Bachelor's Degree in Clinical Medical Practice from an accredited university and am registered with the Health Professions Council of South Africa.

I help make quality health care services accessible to patients.

While I often see patients by myself, I always work closely with a doctor to diagnose and treat a wide range of illnesses and injuries.

I obtain patient histories, perform physical exams, order diagnostic or therapeutic procedures, and interpret findings.

I develop, implement, and monitor treatment plans.

I assist with surgeries.

I provide patient education and counseling, as well as many other prevention and wellness services.

I am a qualified health care professional —
I am a Clinical Associate.
