QUALITY ASSURANCE & INFECTION CONTROL

Together these two departments are going places.

Quarterly ,Wards and Departments are inspected by quality team which comprises of the Quality Assurance Manager, Infection Control Manager, Nursing Service Manager, Public Relations Officer and Unit Managers from each department.

After each inspection a report and rating of each ward is made as per Infection Control and Quality Assurance Standards. This calls for competition within the departments.

For the month of July to August, Pae-

diatric Ward came first to this competition and they decided to have a celebration party for

WOMEN'S DAY CELEBRATION

Women's day was celebrated in a quiet mode at Greytown Hospital where all the women on duty were provided with lunch from one of our local businesses.

This was done to show every woman that this nation wouldn't be here if it wasn't for powerful,

strong and perseverance of the woman.

They were all in struggle mood singing: *Wathinta abafazi Wathinta imbokodo.*

What a shame for men who were on duty as they came to join the queue but they were told that it was only meant

for women. *"Umkhumiso ulingene izintondolo"*

Dudu, Thembeka, Nonhlanhla and Khanyi after dishing their delicious meal for the day.

DONATIONS TO THE NEEDY....

Greytown Hospital played an important role when together with SAPS (Greytown Central Station) donated clothing and shoes to the community of Lindelani and Tintown

Informal Settlement

This was initiated by SAPS and sup-

ported by the Hospital which also collected clothes from staff members and gave them

GREAT CHANGE IN FOOD SERVICES DEPARTMENT

Quality is seen in Greytown Hospital. Our Food Services has prepared a new menu and bought new cutlery. Our patients are now served in well presented and descent manner. Gone are the days when patients would complain to their relatives about food. We proudly serve food in front of relatives, Management and everyone around, because it's of high quality and well prepared for different dietary requirements.

Food served to the patient covered with new plate cover and delivered to the ward.

Meal for Diabetic patients in our new menu

Meal for ordinary patients in our menu as Wednesday lunch.

New plate covers, serving tray and bowls.

LAUGHING IS LIFE

An old man was struggling a bit with the English. He walks in to the Restaurant and wants to order a chicken, but unfortunately he can't remember what is chicken called in English. The waiter who wants to take his order is only English proficient. So the old man sees the guy at the table next to him with a plate with 4 baked eggs on it. The old man points to the plate of eggs and says to the English waiter: I want their mother.

QUALITY ASSURANCE DEPARTMENT

Mrs. P. Mgobhozi : Quality Assurance Manager

“A challenge will make you grow, not physical but psychological.”

A staff survey was conducted at Greytown Hospital as part of Quality Initiative, the objectives were 1. to Ensure Staff Satisfaction. 2. to identify reasons for staff turn over. 3. to develop strategies to reduce staff turnover.

A Questioner was distributed, staff members were requested to answer questions and air

their views about their experiences in Greytown Hospital.

A lot of positive was acknowledged to the sec-

tions that did well we say
THANK YOU FOR
YOUR DEDICATION.
PLEASE KEEP IT UP !!!.

Challenges and gaps were identified in some of the departments. To those departments, no offence colleagues it was just an evaluation of our performance please don't be discouraged, take this as a challenge to your department. A challenge will make you

grow, not physical but psychologically. I quote “ do not focus on a problem or challenge because you will magnify it, but rather focus on potential by that you will increase chances of achieving. If you expand something you make it bigger and it becomes dominant and make you forget about your potentials”. So guys the choice is yours whether you focus on a challenge or on a potential. Once again I thank you very much fro your participation.

A plan of action has been drawn to address your concerns hoping that interventions will take place soon.
PROMOTING QUALITY THROUGH PARTICIPATION!!!

MY SIDE:

I don't want your sympathy ; I want your acceptance!
I don't want your condemnation' I want your compassion.
I don't want your patronage; I want your support.
I don't want your indulgence; I want an opportunity.
A chance to live, a chance to serve, a chance to die.
Knowing that I have lived to my full potential as a human being.....
