

Infrastructure Update

New Creations

The hospital has the pleasure of reporting on the update of all projects currently taking place in the hospital.

We are all aware that things have not been normal at King Edward VIII Hospital since the storm which hit the most part of KZN, KEH was the most affected facility. As a result of this some of our services, patients and staff had to be accommodated in King Dinuzulu

and St Aidans hospitals.

Hospital Management would like to extend words of appreciation to the Head Office, especially Infrastructure Department for all developments and renovations that are currently taking place in the hospital.

Words of appreciation also go to **all KEH staff members** who have been more than patient and understanding through this time of crisis. Staff members continue to strive towards providing quality health care while working under challenging conditions. This does not go without notice and it is highly commended.

See progress photos in next few pages.
