JUNE 2023.

## MEASLES CAMPAIGN

Measles is a serious infection that may be deadly, yet it is completely preventable. Currently there has been a number of people affected by measles.

The best way to prevent measles is to vaccinate children at nine and 18 months. As a community health center we have a responsibility to ensure that children are vaccinated and are up to date. The CHC embarked in a immunization campaign to take vaccination services to the community door step. The following areas were visited Quarry Heights, Mancinza, Isolezwe ,Siyanda community residential unit – (Kwa Sobho ezitezi and Bhekuzulu Hall) to name a few.

FIGHTING DISEASE, FIGHTING POVERTY, GIVING HOPE
