FHE HEARTBEAT 🔫

"At the heart of healthcare"

RK Khan IPC Department held a hand hygiene awareness day to emphasize the importance of hand washing. Handwashing is one of the best ways to protect oneself and family from getting germs. It must be done regularly to avoid getting sick, and prevent the spread of germs to others whether one is at home, work, travelling, or out in the community. As a healthcare worker, have you mastered the handwashing technique to ensure that your hands are clean? Outpatients' Department can demonstrate to one exactly how it is done as they were once again awarded the title of champions of hand washing!

HAND HYGIENE PHOTO GALLERY

World Hearing Day 2022 "To hear for life, listen with

This World Hearing Day 2022, RK Khan Hospital ENT Department spread the message to patients in Outpatients, Pharmacy and Paediatric Outpatients to ensure that they are empowered to identify hearing problems within their households and communities. Dr Sigonya, HCU of ENT and her team emphasized the importance of *safe* listening so as to hear across the life's course, also shared statistics on the increasing number of people living with or at risk of hearing loss. Dr Sigonya highlighted noise control as one of the key interventions and stressed the importance of mitigating exposure to loud noise. Patients were warned if they have signs of hearing loss, they should get their hearing checked by consulting a health professional who would facilitate appropriate referral.
