**REQUIREMENTS FROM CONTRACTORS FOR SEPTIC TANK DISLUDGING CONTRACT AT
MOLWENI CLINIC**

For the company to successfully quote, it must be in possession of the following documents and meet the requirements sets out below:

1. The contractor shall provide the facility with 12 x collection requests or sewer disludge upon request from the facility via KwaDabeka CHC Systems Component. The 12 times is the number of call outs to be made by the facility to the contractor, it does not constitute the trips the contractor may have to make as far as desludging is concerned.
2. The company must be Registered with Waste Water Metro/Municipality to undertake the type of work for sewer waste desludging
3. The company must possess a valid Road Haulage Certificate which permits domestic effluent transportation and disposal services by EThekweni Water and Sanitation Services or any other official Municipality
4. The size of the truck must be at least 24000 litres to accommodate the capacity of domestic sewer effluent to be dislodged
5. All 5 septic tanks on site to be disludged until they are all empty. The contractor is subject to do multiple trips from the clinic to the landfill site to dispose of the sewer effluent disludged until the client is satisfied that the sewer effluent is completely disludged.
6. The truck must be in possession of a valid weigh bridge certificate
7. First load disludged to be certified at the weigh bridge for load capacity confirmation
8. Every load disposed must come with disposal certificate from the suitable and approved disposal site
