WHEN TECHNOLOGY REINVENTS THE PAST

LAINOX®

Sapiens, SO MUCH EASIER, INTUITIVE AND COMPLETE

All the innovative technology is in the background, assisting you in preparing even the most complex dishes, safe in the knowledge that the cooking parameters are correct.

For anyone who is not seeking for hard-core electronics, but wants to cook and program using simple, manual commands, without, however, forgoing the precision of digital controls.

For anyone looking for an oven that is easy to operate, but hard-wearing, suitable for everyone, but advanced, with a traditional approach, yet packed with content; an appliance that is reassuring and efficient then LAINOX has just what you need. The solution is called Sapiens.

Sapiens is the oven providing assisted cooking with electronically-controlled manual commands. Sapiens automatic cooking procedures are easy to manage and ensure constant, high-quality results.

All the functions are controlled electronically, step by step, with maximum efficiency. This means that Sapiens constantly adjusts the cooking mode automatically, resulting in ideal preparations every time: succulent meat; perfect browning and golden crusts; uniformly, perfectly cooked food; desserts or fragrant bread; crispy, dry fried food; delicious gratin dishes.

Sapiens, EVERYTHING YOU NEED.

Sapiens is not lacking any of the automatic or manual controls that are indispensable for the best and most consistent cooking results.
The Sapiens equipment and functionality demonstrate the treatment of the project and attention that LAINOX has dedicated to the user.

CONVECTION COOKING

A distinctive trait of convection cooking is its uniformity, a result that Sapiens always ensures for numerous sweet and savoury foods.

Whether aimed for crispy and dry or soft and juicy, the systems designed by LAINOX offer excellent dishes even at full loads, without waste or food that is not presentable.

The variable high or low ventilation speed with automatic power reduction slashes energy consumption and waste and ensure perfect cooking uniformity thanks to the exclusive cooking chamber heat distribution system designed by LAINOX and the bi-directional fan.

FAST DRY

The patented Fast Dry[®] system (active cooking chamber dehumidification system) ensures perfect crispiness and browning of fried foods, grilled foods, desserts and bread, even at full loads. It uses 100% of the load capacity.

6 FAN SPEEDS

Variable fan speed with choice of up to six speeds
Intermittent fan mode available for special cooking requirements.
Auto reverse (automatic reverse of fan rotation) for perfect cooking uniformity.

STEAM COOKING

Steam cooking maintains all of the food's nutritional value. The colours stay bright, less seasoning, water and salt are needed and, therefore, production costs are lower.

Sapiens lets you steam cook at low temperatures from 50/85°C, with absolute precision and with minimum water and energy consumption.

Cooking at 100°C steam allows you to cook any type of food that otherwise must be cooked in a traditional system in boiling water, with greater quality and with savings of over 20%.

Finally, forced steam cooking, up to 130°C, is ideal for frozen products, especially in large quantities. Cooking times are very quick with lower processing costs.

VACUUM COOKING

Innovative steam cooking technique, with controlled cooking times, that can be used for different types of products. There are numerous quality advantages and also medium to long storage times. It is also a new way of presenting food.

VACUUM COOKING IN GLASS JARS

This cooking technique requires the utmost precision of both the cooking chamber and internal core temperatures. This can be ensured thanks to the needle probe specifically for these types of cooking, maintaining maximum nutritional quality and the absolute lowest possible weight loss.

ECOVAPOR

Sapiens recognizes the level of steam and only uses the amount of energy required. With the EcoVapor system, there is a definite reduction in water and energy consumption thanks to automatic control of the steam saturation in the cooking chamber.

COOKING PROGRAMS

Sapiens includes LAINOX automatic programs: 95 pre-loaded cooking procedures, featuring up to 99 cooking procedures, which can be programmed and stored by the user, by choosing the name and icon, each one of which can have up to 9 cycles in automatic sequence.

Thanks to the programming, the oven manages all the different steps and various cooking parameters in complete autonomy.

- by selecting the cooking mode (from convection, steam, combined steam + hot air)
- by keeping a constant check on the temperature
- by detecting the level of humidity in the cooking chamber
- by adjusting the fan speed

It also allows you to start manual cooking directly or select a program with the dedicated scroller from your favourites with the scroll & function.

LAINOX has also concentrated on savings and taken great care over all the aspects which cut consumption and impact, not just from an economic point of view.

ECOSPEED

With the Ecospeed function, by recognizing the quantity and type of product being cooked, Sapiens optimizes and controls the delivery of energy and maintains the correct cooking temperature, preventing any fluctuations. Result: I use only the amount of energy needed and maximise energy efficiency.

GREEN FINE TUNING

The new GFT (Green Fine Tuning) burner modulation system and the patented high efficiency exchanger prevent power waste and reduce harmful emissions.

AUTOMATIC WASH FOR PERFECT CLEANING RESULTS

Just choose the right wash level and Sapiens does the rest on its own, thanks to the automatic wash cycle with liquid detergent. The COMBICLEAN detergent, specially developed by Lainox, guarantees maximum hygiene and comes in a handy 100% recyclable cartridge/conister. No more handling and dangerous decanting.

HALF THE WASHING TIME

The drastic reduction in washing times compared to conventional systems is another added advantage.

100% RECYCLABLE LIQUID DETERGENT CARTRIDGES

The COMBICLEAN ready-to-use, liquid detergent is slotted into the special, hidden compartment, with pull-down closure.

The Sapiens floor-standing ovens have automatic washing systems with liquid detergent in 10-litre canisters.

CALFREE is the product developed by LAINOX which keeps the steam generator free from limescale and prevents it from forming. It always guarantees high quality and ample amounts of steam for excellent cooking results.

The advantages obtained by using CALFREE are numerous: Elimination of faults due to limescale build-up, maximum energy efficiency and therefore, less consumption.

The CALFREE cartridge also has a slot next to the COMBICLEAN compartment; the different liquid colours and caps prevent them from getting mixed up.

13. PENALTIES

- 13.1. If at any time during the contract period, the service provider is unable to perform in a timely manner, the service provider must notify the institution in writing/email of the cause of and the duration of the delay. Upon receipt of the notification, the institution should evaluate the circumstances and, if deemed necessary, the institution may extend the service provider's time for performance.
- 13.2. In the event of delayed performance that extends beyond the delivery period, the institution is entitled to purchase commodities of a similar quantity and quality as a substitution for the outstanding commodities, without terminating the contract, as well as return commodities delivered at a later stage at the service provider's expense.
- 13.3. Alternatively, the institution may elect to terminate the contract and procure the necessary commodities in order to complete the contract. In the event that the contract is terminated the institution may claim damages from the service provider in the form of a penalty. The service provider's performance should be captured on the service provider database in order to determine whether or not the service provider should be awarded any contracts in the future.
- 13.4. If the supplier fails to deliver any or all of the goods or to perform the services within the period(s) specified in the contract, the purchaser shall, without prejudice to its other remedies under the contract, deduct from the contract price, as a penalty, a sum calculated on the delivered price of the delayed goods or unperformed services using the current prime interest rate calculated for each day of the delay until actual delivery or performance.

- 14.3. Where the purchaser terminates the contract in whole or in part, the purchaser may decide to impose a restriction penalty on the supplier by prohibiting such supplier from doing business with the public sector for a period not exceeding 10 years.

CERTIFICATE OF INDEPENDENT BID DETERMINATION

SBD 9

- 1 This Standard Bidding Document (SBD) must form part of all bids¹ invited.
- 2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
- 3 Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:
 - a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution's supply chain management system and or committed fraud or any other improper conduct in relation to such system.
 - b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.
- 4 This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
- 5 In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.

CERTIFICATE OF INDEPENDENT BID DETERMINATION
