INSTITUTIONAL EMERGENCY POWER GENERATION – REMEDIAL ACTION FOR DIESEL FUEL AND DIESEL FUEL STORAGE TANKS.

It has come to the attention of this office that some Institutions are failing to adequately care for the diesel fuel that is stored on site in bulk tanks holding 2000 litres or more for use by the emergency power generators.

In order to minimise the occurrence of emergency power generators failing to operate due to contaminated diesel fuel during times of Eskom / Municipal power failures / outages the affected Institutions shall on an ANNUAL basis introduce a regime of fuel tank cleaning and in situ diesel fuel reconditioning using the attached specification and diesel fuel analysis test sheet when calling for bids.

The institutions are strongly advised to implement this regime as soon as possible to avoid any malpractice claims due to the non-performance of the essential plant and equipment. All costs must be claimed against the institutional maintenance budget.

Failure to adhere to this annual procedure could destroy the generator motor due to water and dirt entering the motor from the fuel tanks. The current average cost to replace generators is in the region of R 750 000.00 inclusive. The institutions shall be held accountable for any losses incurred should the regime of diesel fuel reconditioning and diesel fuel storage tank cleaning not be carried out regularly.

The specification and fuel analysis test sheet is also located on the Intranet home page under the heading: Head Office Components - Infrastructure Development - Circulars.
