SUBJECT HS 3110 WASHER SERIAL NO UNKNOWN.

Barcode: AA345018

ATTENTION: CHRIS.

With regards to the above listed washer HS 3110, this washer has been out of service for quite some time, the reason for this was that the main bearings, computer board and motor bearings had failed along with shocks out of balance switches and various other components.

The cost of repair was to be uneconomical.

All back and some side panels are missing, this in its own is a safety risk, not safe to operate.

In our professional opinion, we recommend this unit be condemned.

If I can be of any further assistance to you in this regard, please don't hesitate to contact me.
