Access port for an external temperature probe

In the low temperature chest freezers with Comfort electronic controllers there is provision for an independent temperature probe allowing, for instance, a PT 100 probe or similar measuring elements to be positioned in the interior. The diameter of the access port is 10 mm.

Maximum temperature stability and temperature consistency

The precise Comfort controller guarantees maximum temperature control and stability. All laboratory chest freezers with comfort controller are tested to NFx 15-140 thus providing reliable and exact data on temperature stability and distribution within the freezer.

LED light

The freezer lid has an integrated LED light to improve visibility and potentially reduce lid opening duration.

One-piece lid

The lid of the LGT models is moulded from a single piece of steel. This makes it extremely resistant to any deformation from vacuum pressure after lid openings. Because it has no joints but instead radiused corners and edges it is also hygienic and easy to clean. The strong lid hinges are designed for at least 300 000 openings; they counterbalance the lid from about 45° thus improving safety and reducing the effort needed to open the freezer.

Practical accessories

NTC product temperature probe

An NTC product temperature probe for logging product temperatures is available as a retrofit kit for the low temperature chest freezers with Comfort electronic controllers. The logged product temperatures can either be read by the electronic controller or transferred to an external documentation system via the existing RS 485 interface.

Interface converter with documentation software

A special interface converter including documentation software is available for central documentation of the temperature profile data and alarm events of multiple appliances via the RS 485 serial interface. Up to 20 laboratory appliances can be networked for central monitoring and temperature recording.

Optional high-quality baskets

Optional baskets facilitate the storage of small items and can help to improve the handling and organising of the freezer contents. The baskets have retractable handles that can be stacked on the freezer top and/or hung from the top frame.
