10. Available configurations:
 - a. Extra Temperature Sensor with 16x2 LCD

31. An independent USB to PDF catalogue is also available. It is the size of a tag and must be replaced after 2.5 years. By default, it reads the temperature every 5 to 15 minutes (adjustable).

Changing the Temperature

The current product does not SMS the physical temperature value, only whether the temperature is over/under or temperature OK. There is a Beta version that can SMS the physical temperature contained within the SMS. When T is outside the WINDOW, the Delay Counter will count up or down, when it reaches 0 or 100 only then a SMS will be sent. This is to prevent a flood of sent SMS messages when the doors are temporarily opened.

1. Reboot the LCD display – Hold in both the UP and DOWN button.
2. During startup, when pressing the UP button, the delay counter can be changed (default 5 = 5 minutes).
3. Press the UP button to set the Low Temperature value.
4. Press the Down button to set the High Temperature value.
5. If you miss the value, just continue and the values will loop(circle) at -50 and +125.
