Picture 1:- Helicopter view of the location of swimming pool in courtyard
Source: google earth

The swimming pool is mainly for recreational purposes and is mostly used by Hospital staff residing in the Nursing Residence.

On the 07 July 2021, a condition assessment was carried-out by myself and Mr Mwandla, who is the Chief Artisan at Addington Hospital. This report is also attached (see **Annexure A**) to this project brief to give a more concise picture in terms of the magnitude for any possible refurbishment intervention required to deliver a fully functional swimming pool and water fountain.

The dimensions of the swimming pool is approximately 24 x 10 meters and is approximately 60% full of stagnant water, mostly due to rain.

It would be advisable to allow for a suitable membrane material to act as lining on the entire surface of the swimming pool to ensure that an imported sandy material does not stick against the walls of the swimming pool and make it easier in the future to remove the sandy material should any possible refurbishment be conducted.

After the attached condition assessment report was presented to Infrastructure Management, a decision was taken to concentrate all our efforts on mission critical projects other than waste taxpayer's money to refurbish this swimming pool, given both the high capital outlay required coupled to the almost zero utilization of this asset.

This maintenance brief seeks to organise a long-term solution that will most importantly make safe the exposed swimming pool and can easily be reversed should any possible future refurbishment needs arise.

2.2. Project Outcome

- To de-commission the redundant swimming pool with the main focus of keeping the project costs to bear minimum.

2.3. Project Objective

- A safe courtyard with no further maintenance related costs towards the redundant swimming pool

2.4. Project Success Criteria

- A decommissioned swimming pool and a safe courtyard

2.5. Statutory Requirements

2.5.1. Legislation

- Legislation: Minimum applicable legislation (latest version) include:
 - The Occupational Health and Safety Act (Act 85, 1993) as amended
 - All other applicable legislations

3. Technical Brief

3.1. Detail Scope of Work

- Pump-out rain water inside swimming pool
- Properly cover and isolate all water inlet and outlet inside swimming pool
- Remove all swimming pool access ladders, wrap and store as directed by Addington Management/Maintenance staff and any other protruding items
- Cover all swimming pool drainage outlets to ensure no foreign objects falling inside pipework
- Import suitable river sand material that can easily be removed in the future and completely fill swimming pool
- Properly compact imported river sand material "as-you-go" in order to mitigate against settling
- Import and properly compact a layer of top soil in order to ensure proper growth of ready-lawn
- Import and plant ready-lawn to cover the entire surface of swimming
- Ensure all rubble; broken air-bricks, broken paving tiles, broken pre-cast concrete benches and etc. is removed from site
- Remove all over-grown vegetation/plants and replant flowers and plants
