## Neonatal and Pediatric Equipment

**Symba** was developed through extensive technical and market research.

It goes beyond current cot-beds offering a safe, mobile and accessible product tailored for both patients, parents and medical professionals.

Cotsides are controlled using a dual locking spring system:  
Allows user to position cotside in four safety configurations.  
System engages and indicates when the cotside is secure.  
Dual locking system ensures cotsides are properly locked into place.  
Cotsides can be lowered quickly in an emergency situation.

### **Accessibility and modular**

The mattress cradle can be configured into:  
Various positions essential for recovery including a semi-fowlers and high fowlers position.  
Quick access to change position and adjust the mattress support.  
Lockable gas springs provide an easy to position yet strong lock on the cradle position.  
Easy to set up Trendelenburg position.
