## SECTION H: CERTIFICATE OF INDEPENDENT BID DETERMINATION

- 1 This Standard Bidding Document (SBD) must form part of all bids invited.
2. Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging). Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
- 3 Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:
  - a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution's supply chain management system and or committed fraud or any other improper conduct in relation to such system.
  - b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.
- 4 In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

**Bid rigging (or collusive bidding)** occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.

## DOUBLE LUMEN ENDOBRONCHIAL TUBES – COLLECTIVE REQUIREMENTS

Consists of:

**Double Lumen clear PVC tube:**

Thermo-sensitive with radio-opaque lines and markers at key features. Markings starting at 26 cm from distal end marked every 2 cm up to and about 32 cm

Tubes to be flexible enough to allow manipulation through distorted airways, but without luminal collapse. Smooth transition of inner lumen with no narrowing, to allow for easy passage of flexible fibre-optic-bronchoscope.

**Stylet:** Malleable shape forming - packaged in place down the bronchial lumen

**2 Right-angled swivel connectors** with a double sealing cap that allows for easy passage of either a flexible fibre-optic-bronchoscope, or a suction catheter – both without a leak.

Connectors to be clearly labelled “tracheal” or “bronchial” and must connect to a standard Y-connector.

**1 Carlens’ style Y connector:** ID: 15 mm (x2), OD: 15 mm

**2 - 4 Suction catheters:** with suction control, to fit the total length of the tube

**Colourless tracheal** high volume, low pressure **cuff** – with colourless pilot balloon, clearly labelled “tracheal”

**Blue bronchial** low pressure **cuff** - with blue pilot balloon, clearly labelled “bronchial”

One-way valves in pilot balloons.

Cuffs to inflate and deflate easily, and pilot cuffs must indicate the degree of inflation accurately.

Cuffs must be resistant to nitrous oxide effects. When deflated, cuffs must conform closely to the tube to minimise the risk of trauma during intubation and extubation.

Manufactured from: PVC: tubes; Polyurethane: cuffs, Medical grade plastic: connectors

All components latex free.

Sterile and individually packed in peel pouch

Single use only
