SECTION G SPECIFICATIONS, SCOPE, EVALUATION

AN ENTITY TO PROVIDE A MULTI-DISCIPLINARY TEAM OF EXPERIENCED AND SKILLED PROFESSIONAL CONSULTING SERVICES WITH A CIVIL ENGINEER AS LEAD CONSULTANT

1. Project Description:

Inanda C CHC: Supply and Installation of elevated 72 hour water storage tank.

2. Project Background

According to the SANS, the Red Book and National Core Standards a Health Facility should be equipped with a water storage with a capacity to supply the facility with water of 72 hours which is the equivalent of 3 days.

The facility is connected to EThekweni District Municipality water supply scheme. There is currently no constant water supply into the facility. Due to the high demand of water in the area, various government facilities are competing with the entire community for water consumption which leaves the facility with insufficient water.

The Province of KwaZulu Natal as a whole has been susceptible to prolonged droughts which have had an impact on the Water Services Authorities ability to supply water to the Healthcare facilities.

Currently, the Municipality is running a water shedding around the area from 5pm to 8am which leaves the facility to operate on backup plastic tanks with a capacity of 20 000 litres.

The below pictorial evidence shows the current backup water storage in the facility

These plastic tanks have reached its lifespan and during the site inspection on 6 April 2022 it was evident that they are leaking and in various areas the reticulation system is leaking. Currently the maintenance facility is implementing a minor maintenance project to investigate the water loss in the reticulation system.

The below pictorial evidence shows the leaks in the storage tanks and water reticulation system

The facility operates 24 hours with an average headcount of 18 000 per month. These stats were shared by the facility in a meeting on 6 April 2022. It was further revealed that the facility supports the surrounding Health facilities including Newtown CHC on specialised services such as the maternity.

As part of Stage 2, concept and feasibility the DOH-KZN will appoint PSP to determine and present to HIAC the most advantageous final placement of the 72 hour elevated water storage tank. The most suitable positions will factor for amongst many other considerations space availability for the ground tank installation and proximity to municipal water meter etc.
