BATHO PELE IN ACTION:
Know Your Hospital CEOs, District Directors, Emergency Medical Services, and Forensic Pathology Service Managers

This is why we have taken a decision that the state-issued cell phone numbers and email addresses of all hospital CEOs, district directors, district management of EMS and FPS, and service managers are made publicly available. We are of the view that this exercise will help to bridge the gap between the Department and the public that it serves. This will reduce the amount of unnecessary and burdensome requests that District Offices receive on social, print and electronic traditional media, sometimes due to issues that can be easily resolved.

This will all lead to better accountability, improved access to healthcare, as well as justice or recourse for healthcare users who may be aggrieved.

As a caring Government, we are serious about improving the quality of care and building public trust in the District officials who need to turn to in their time of need.
