

## **TOOL 13:** NEONATAL HAND HYGIENE AUDIT

Date:		Unit:	
To be assessed monthly by Ope	rational or IPC Manager		

A. Handwashing Facilities										
1. Mark each item- ✓ or ➤ and then total										
Basin No.	1.	2.	3.	4.	5.	6.	7.	8.	9.	10.
Water available										
2. Basin clean										
3. Basin deep enough to prevent splashing										
4. Basin only used for handwashing & not for disposal of body fluids										
5. Tiled splash back										
6. Elbow operated taps										
7. Taps functional and not leaking										
8. Mixer tap allows easy rinsing to the elbow and does not point										
directly over basin outlet										
9. Elbow operated/non touch liquid soap										
10. Soap dispenser clean & soap available										
11. Paper towels available in dispenser										
12. Hand wash poster displayed										
13. Functional pedal/non touch bin available										
14. Bin not overflowing										
Totals										
Divided by 14										
X100 =%										
Total % & divide by no. of basins Total Handwashing Facilities		%								

## B. Hand Hygiene Practice

- 1. Observe handwashing practices in the unit for at least 15mins during a busy period eg feeding time, and score compliance using the WHO hand hygiene observation tool
- 2. Record scores from the WHO tool, for each moment and category of person below.
- 3. Calculate overall hand hygiene practice score by totally the score for each moment and dividing by 6.

Moment One:	Spraying/rubl	oing hands before touching baby	1				
Doctors:		Nurses:	Mothers:	Other:			
			Total score for	Moment One:	%		
Moment Two:	Washing hand	ds before a sterile(clean) proced	ure				
Doctors:		Nurses:					
			Total score for	Moment Two:	%		
Moment Three: Washing hands after procedure / exposure to body fluids							
Doctors:		Nurses:	Mothers:	Other:			
			Total score for I	Moment Three:	%		
Moment four:	Spraying/rub	bing hands after contact with ba	by				
Doctors:		Nurses:	Mothers:	Other:			
			Total score for	Moment Four:	%
