

5 THINGS YOU SHOULD KNOW ABOUT DIABETES

1 WHAT IS DIABETES?

You develop diabetes when your body doesn't make enough insulin or use the insulin. Without insulin your body cannot get the energy it needs from your food.

2 Do I have it?

You will never know as there may be no obvious signs or symptoms, the following are common.

Always thirsty!

Always tired!

Frequent passing water! (urine)

Unwanted weightloss in people younger than 35 years

3 Is it serious?

Yes. Without proper management it can lead to heart and kidney disease, blindness and amputation. Diabetes is a life-long condition.

4 Is there a cure?

No. There is effective treatment, and if you know how to take good care of yourself, based on good medical advice, you can lead an active healthy life.

5 Who is at risk?

Anyone, anywhere, at any age can get diabetes. Being overweight, not exercising 3 times a week and having a family history of diabetes increases the risk.

Visit your local clinic, doctor or pharmacy for a test.
